Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q104-Q109):

NEW QUESTION # 104

What are two ways Cortex XSIAM monitors for issues with data ingestion? (Choose two.)

- A. It automatically runs a copilot playbook to troubleshoot and resolve ingestion issues.
- B. The tenant's compute units consumption will change dramatically, indicating a collection issue.
- C. The Data Ingestion Health page identifies deviations from normal patterns of log collection
- D. The Cortex XSIAM Command Center dashboard will display a red icon if a data source is having issues.

Answer: C,D

Explanation:

The Data Ingestion Health page provides visibility into the normal patterns of log collection and highlights any deviations, which helps identify issues early on.

The Cortex XSIAM Command Center dashboard displays a red icon when there is an issue with a data source, providing a quick visual indication of ingestion problems.

NEW QUESTION # 105

A Cortex XSOAR customer wants to send a survey to users asking them to input their manager's email for a training use case so the manager can receive status reports on the employee's training. However, the customer is concerned users will provide incorrect information to avoid sending status updates to their manager.

How can Cortex XSOAR most efficiently sanitize user input prior to using the responses in the playbook?

- A. Create a sub-playbook and import a list of manager emails into XSOAR. Use a conditional task comparison to check if the response matches an email on the list. If no matches are found, loop the sub-playbook and send the survey back to the user until a match is found.
- B. Create a conditional task comparison to check if the response contains a valid email address.
- C. Create a manual task to ask the analyst to validate the survey response in the platform.
- D. Create a task that sends the survey responses to the analyst via email. If the responses are incorrect, the analyst fills out the correct response in the survey.

NEW QUESTION # 107

Which aspect of Cortex Xpanse allows for visibility over remote workforce risks?

- A. The deployment of a Cortex Xpanse agent on the remote endpoint
- B. The use of a VPN connection to scan remote devices
- C. The presence of a portal for remote workers to use for posture checking
- D. The ability to identify customer assets on residential networks

Answer: D

Explanation:

Cortex Xpanse provides visibility over remote workforce risks by identifying customer assets on residential networks. This allows organizations to monitor and secure assets that are outside of the traditional corporate network, which is particularly important as more employees work remotely and connect from various locations.
