When looking for a job, of course, a lot of companies what the personnel managers will ask applicants that have you get the H19-102_V2.0 certification to prove their abilities, therefore, we need to use other ways to testify our knowledge we get when we study at college, such as get the H19-102_V2.0 Test Prep to obtained the qualification certificate to show their own all aspects of the comprehensive abilities, and the H19-102_V2.0 exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.

Huawei H19-102_V2.0 (HCSA-Sales-Transmission & Access V2.0) exam is a certification program designed to assess the knowledge and skills of sales personnel in the field of telecommunications. HCSA-Sales-Transmission & Access V2.0 certification is offered by Huawei Technologies Co. Ltd, a leading global provider of information and communications technology (ICT) infrastructure and smart devices.

Just choose the right Huawei H19-102_V2.0 exam questions format demo and download it quickly. Download the itPass4sure

Huawei H19-102_V2.0 exam questions demo now and check the top features of itPass4sure Huawei H19-102_V2.0 Exam Questions. If you think the itPass4sure Huawei H19-102_V2.0 exam dumps can work for you then take your buying decision. Best of luck in exams and career!!!

The HCSA-Sales-Transmission & Access V2.0 certification is offered by Huawei, one of the world's leading providers of telecommunications equipment and services. Huawei has a reputation for innovation and excellence, and its products are used by companies and telecommunications providers around the world. The Huawei H19-102_V2.0 (HCSA-Sales-Transmission) certification is just one example of the company's commitment to excellence in the industry.

Huawei HCSA-Sales-Transmission & Access V2.0 Sample Questions (Q46-Q51):

NEW QUESTION # 46

Web GUI is not applicable to a network with single device.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

The WebGUI (Web-based Graphical User Interface) for Huawei solutions like the OptiXtrans DC908 is designed for user-friendly management, including single-device scenarios. HCSA-Sales-Transmission & Access confirms that WebGUI can configure and monitor a standalone device (e.g., DC908), not just multi- device networks. The statement's negation is incorrect, making it FALSE.

NEW QUESTION # 47

What is the network topology in PON technology?

- A. P2P (Point-to-Point)
- B. P2MP (Point-to-Multipoint)

Answer: B

Explanation:

Passive Optical Networks (PON) use a Point-to-Multipoint (P2MP) topology where a single Optical Line Terminal (OLT) connects to multiple Optical Network Units (ONUs) or Optical Network Terminals (ONTs) using passive splitters.

#Efficient Bandwidth Sharing - A single fiber from the OLT is split among multiple users, reducing fiber deployment costs.

#Scalable and Cost-Effective - Supports higher user density with minimal fiber usage.

Since PON does not follow a Point-to-Point (P2P) model, the correct answer is P2MP.

NEW QUESTION # 48

Which of the following challenges are Campus Networks facing?

- A. Restriction of 100m makes network complex
- B. Devices are too large
- C. Hard to expand/upgrade cabling system
- D. Chimney networks hard to maintain

Answer: C,D

Explanation:

Campus networks today face several key challenges:

#Hard to expand/upgrade cabling system - Traditional Ethernet-based campus networks require extensive copper cabling, which is difficult to expand and upgrade, leading to higher costs and complexity.

#Chimney networks hard to maintain - Many legacy campus networks operate in a chimney-style architecture (vertical silos of network systems), making it difficult to manage and integrate different services.

#Restriction of 100m makes network complex - While Ethernet has a 100m distance limit, modern fiber-based Passive Optical LAN (POL) solutions overcome this restriction, making this less of a challenge today.

#Devices are too large - Modern networking equipment is compact and modular, making device size less of a concern in today's

campus networks.

Thus, the correct answers are A and D.

NEW QUESTION # 49

What is the maximum coverage distance in Campus OptiX solution?

- A. 20km
- B. 10km
- C. 40km

Answer: C

Explanation:

The Campus OptiX solution, based on POL and PON technology, leverages fiber optics for long-distance coverage. HCSA-Sales-Transmission & Access documents specify that the maximum coverage distance is 40km, enabled by PON's passive optical distribution network (ODN) and high-power optical modules. This suits large campus scenarios like airports or universities, making C the correct answer.

NEW QUESTION # 50

eSight can manage both IP and POL equipment in Campus OptiX solution.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

eSight is Huawei's network management system (NMS) designed to provide centralized management for various network elements. In the context of the Campus OptiX solution, HCSA-Sales-Transmission & Access documents confirm that eSight supports converged management of both IP-based equipment (e.g., switches, routers) and POL components (e.g., OLTs, ONUs). This capability enables unified monitoring, configuration, and fault detection across the hybrid IP+POL architecture, enhancing operational efficiency. The statement is consistent with eSight's documented functionality, making it TRUE.

NEW QUESTION # 51
