NEW QUESTION # 116

A sales representative delivers a proposal and is checking in with the prospect on the perceived value and alignment. At which stage are they in the sales process?

- A. Collaborate
- **B. Confirm**
- C. Connect

Answer: B

Explanation:

Confirming is the stage in the sales process where the sales representative delivers the proposal and checks in with the prospect on the perceived value and alignment. This stage is also known as the presentation or proposal stage, and it involves demonstrating how the solution meets the prospect's needs, goals, and challenges, and addressing any objections or concerns. The sales representative should also confirm the decision criteria, timeline, and next steps with the prospect, and ask for their commitment to move forward. Connecting is the stage where the sales representative identifies and reaches out to potential prospects, and establishes rapport and trust. Collaborating is the stage where the sales representative works with the prospect to understand their situation, needs, and desired outcomes, and co-creates a solution that fits their requirements. A sales representative spends time building their pipeline with many opportunities. Their conversion percentage is fairly high, yet the total pipeline volume is far from their quota.

Which strategy would help the sales rep increase their pipeline health?

- A. Be patient knowing that the numbers will eventually improve over time.
- B. Challenge their manager about whether their sales quota is realistic.
- **C. Analyze the potential deal size and decision makers' authority.**

Answer: C

Explanation:

Analyzing the potential deal size and decision makers' authority is the best strategy to increase the pipeline health, because it can help the sales rep to prioritize the most valuable and likely opportunities, and focus on influencing the key stakeholders who can approve the purchase. This can increase the average deal size and the win rate, and ultimately help the sales rep to achieve their quota. Being patient or challenging the manager are not effective strategies, because they do not address the root cause of the low pipeline volume, and may result in missed targets or reduced motivation. The sales rep should take proactive actions to improve their pipeline quality and quantity, and seek feedback and guidance from their manager if needed.
