SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.
Topic 2	Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Topic 3	System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.

The SAP E_S4CPE_2405 practice test software keeps track of each previous attempt and highlights the improvements with each attempt.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q35-Q40):

NEW QUESTION # 35

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is Completed
- **B. When the project status is Finished**
- C. When the project status is In Progress
- D. When the project status is Not Started

Answer: B

NEW QUESTION # 36

How are SAP Best Practices business processes activated in the SAP S/4HANA Cloud Private Edition production system?

- **A. Through SAP Solution Builder**
- B. Through transports
- C. Through SAP Signavio Process Navigator
- D. Through the SAP GUI

Answer: A

NEW QUESTION # 37

Which tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Cloud SDK
- **B. SAP Fiori extensibility apps**
- **C. SAP Build**
- D. SAP Business Application Studio

Answer: B,C

Explanation:

SAP provides tools that enable non-developers to create low-code/no-code extensions, facilitating customization without extensive programming knowledge.

Option A: SAP Business Application Studio

This option is incorrect. SAP Business Application Studio is a development environment designed for professional developers, offering comprehensive coding capabilities.

Option B: SAP Build

This option is correct. SAP Build is a suite of low-code/no-code tools that allow business users to create applications, automate processes, and design business sites with minimal coding. It includes SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone.

Option C: SAP Fiori extensibility apps

This option is correct. SAP Fiori extensibility apps are key user tools embedded in SAP S/4HANA that enable non-developers to adapt and extend SAP applications, such as adding custom fields or creating custom business objects, using a low-code/no-code approach.

Option D: SAP Cloud SDK

This option is incorrect. SAP Cloud SDK is intended for professional developers to build extensions and applications on SAP Cloud Platform, requiring coding expertise.

In summary, SAP Build and SAP Fiori extensibility apps empower non-developers to create low-code/no-code extensions within SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 38

Which activity in situation handling is exclusively available for the extended framework?

- A. Adapt predelivered situation handling templates to business requirements
- **B. Develop custom situation handling templates**
- C. SAP Fiori application extensions
- D. Collect situation data to prepare the automated response
- E. Navigate from notification to the app where the situation occurred to get more info and resolve

Answer: B

Explanation:

Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:

Option A: Adapt predelivered situation handling templates to business requirements This option is incorrect. Adapting predelivered templates is available in both the standard and extended frameworks.

Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.

Option C: Develop custom situation handling templates

This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.

Option D: Collect situation data to prepare the automated response

This option is incorrect. Data collection for automated responses is part of the standard framework.

In summary, the ability to develop custom situation handling templates is an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.

NEW QUESTION # 39

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- **A. Review Booklets**
- **B. SAC Stories**
- C. Lumira Dashboards
- **D. Multidimensional Reports**
- E. Object Views

Answer: A,B,D

NEW QUESTION # 40

.....
