WGU Scripting and Programming Foundations Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

A sequence diagram is shown:

What is the purpose of a sequence diagram?

- A. It outlines the needed computations.
- B. It depicts program operations, branches, and loops.
- C. It outlines the potential actions of a user
- D. It illustrates the communication steps for a particular software scenario.**

Answer: D

Explanation:

A sequence diagram is a type of interaction diagram that details how operations are carried out within a system. It is used to model the interactions between objects or components in a sequence that reflects the order of operations, particularly focusing on the messages exchanged between these objects over time. The vertical axis of a sequence diagram represents time, and the horizontal axis represents the objects involved in the interaction. The purpose of a sequence diagram is to illustrate the sequence of messages or events that occur between these objects, typically in the context of a specific use case or scenario within the software system.
