

Valid SDS Dumps - SDS Valid Exam Camp

Are you worried about insufficient time to prepare the exam? Do you have a scientific learning plan? Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the SDS exam. Here we recommend our SDS test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. We are committed to designing a kind of scientific study material to balance your business and study schedule. With our SDS Exam Guide, all your learning process includes 20-30 hours.

With the best quality and high accuracy, our SDS vce braindumps are the best study materials for the certification exam among the dumps vendors. Our experts constantly keep the pace of the current exam requirement for SDS Actual Test to ensure the accuracy of our questions. The pass rate of our SDS exam dumps almost reach to 98% because our questions and answers always updated according to the latest exam information.

DASCA SDS Valid Exam Camp - SDS Training Materials

Our company is committed to the success of our customers. All company tenets are customer-oriented. Our SDS practice questions are created with the utmost profession for we are trained for this kind of SDS study prep with the experience and knowledge of professionals from leading organizations around the world. Our company SDS Exam Quiz is truly original question treasure created by specialist research and amended several times before publication.

DASCA Senior Data Scientist Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which of the following is CORRECT?

- i. CDMO should NOT own the data lake, the data warehouse, or any of the underlying data architecture or technologies.
- ii. CDMO should own the data lake, the data warehouse, or any of the underlying data architecture or technologies.
- iii. CIO should NOT own the data lake, the data warehouse, or any of the underlying data architecture or technologies.
- iv. CIO should own the data lake, the data warehouse, or any of the underlying data architecture or technologies.

- A. i, iv
- B. ii, iv
- C. ii, iii
- D. i, iii

Answer: A

Explanation:

The Chief Data Monetization Officer (CDMO) is responsible for driving value extraction from data assets, not owning infrastructure. By contrast, the Chief Information Officer (CIO) traditionally owns technology infrastructure, including data lakes, warehouses, and data architectures.

Statement i: Correct. CDMO should NOT own data infrastructure. Their role is strategic - monetizing insights, not managing systems.

Statement ii: Incorrect. CDMO focuses on monetization, not architecture ownership.

Statement iii: Incorrect. CIO indeed does own these systems.

Statement iv: Correct. CIO owns the data lake, data warehouse, and underlying architectures/technologies.

Thus, the correct combination is i and iv # Option C.

NEW QUESTION # 41

Which of the following is an example of NLP?

- A. Both A and C
- B. Finding which text documents are about similar topics
- C. Flagging e-mails as spam
- D. All of the above
- E. Using Twitter to assess public sentiment

Answer: D

Explanation:

Natural Language Processing (NLP) is the field of machine learning that deals with human language understanding and generation.

Applications include:

Option A (Spam detection): NLP techniques classify emails based on text patterns and context.

Option B (Sentiment analysis on Twitter): NLP models analyze textual data to extract emotions, opinions, and trends.

Option C (Topic modeling): NLP clustering and probabilistic models (e.g., LDA) classify documents by semantic similarity.

Since all are valid NLP applications, the correct answer is Option E (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Applications of Machine Learning: NLP in Real- World Use Cases.

NEW QUESTION # 42

Which of the following is NOT a correct situation to use Agile?

- A. When clients/stakeholders need to be able to change the scope
- B. When the final product isn't clearly defined
- C. None of the above
- D. When changes need to be implemented during the entire process

Answer: C

Explanation:

Agile methodology is widely adopted in data science projects because these projects often involve uncertain goals, exploratory

analysis, and changing requirements. Agile thrives in environments where iteration, collaboration, and adaptability are necessary.
Option A: True for Agile. If the final product is unclear (common in data science), Agile works well because it allows incremental discovery and iterative prototyping.

Option B: True for Agile. Agile frameworks (Scrum, Kanban) emphasize flexibility, which means the scope can evolve as stakeholders learn more from data and models.

Option C: True for Agile. Agile welcomes continuous changes through iterative sprints and feedback loops.

This adaptability is crucial in machine learning model development where data insights often reshape project direction.

Since all three situations are valid for Agile, the correct answer to "Which is NOT correct?" is None of the above (Option D).

NEW QUESTION # 43

Example of amortized performance is:

- A. HDFS dictionaries
- B. All of the above
- C. Hadoop dictionaries
- D. MapReduce dictionaries
- E. Python dictionaries

Answer: E

Explanation:

Amortized performance refers to averaging the cost of operations over a sequence of actions, ensuring that while some operations may be costly, the overall average time per operation remains efficient.

Python Dictionaries (Option B): Implemented using hash tables. Insertions, deletions, and lookups typically run in $O(1)$ average time, but occasionally require rehashing (costly). The high cost of rehashing is spread over many operations, giving amortized constant-time performance.

Option A (Hadoop dictionaries): Not standard terminology.

Option C (HDFS dictionaries): HDFS doesn't use dictionary structures in this sense.

Option D (MapReduce dictionaries): MapReduce uses key-value pairs, but amortized dictionary performance is not its focus.

Thus, the correct answer is Option B (Python dictionaries).

NEW QUESTION # 44

Which of the following is a "thinking like a data scientist" decomposition process?

- A. All of the above
- B. Both B and C
- C. Business Initiative
- D. Strategic Nouns
- E. Business Stakeholder

Answer: A

Explanation:

The "Thinking Like a Data Scientist" (TLADS) decomposition process is a structured approach to align data science projects with business goals. It breaks complex business problems into smaller, analyzable parts:

Business Initiative (Option A): Defines the overarching organizational challenge or objective (e.g., reduce churn, increase revenue).

Business Stakeholder (Option B): Identifies decision-makers and end users whose requirements shape the use cases.

Strategic Nouns (Option C): Focuses on the entities (e.g., customer, product, supplier) that generate and consume data, serving as anchors for analytics design.

Since all three are valid elements of the TLADS decomposition, the correct answer is Option E (All of the above).

NEW QUESTION # 45

.....

Our SDS study guide has become a brand for our candidates to get help for their exams. Because our SDS learning materials contain not only the newest questions appeared in real exams in these years, but the most classic knowledge to master. Besides, it is unavoidable that you may be confused by some question points during review process of the SDS Exam Questions, so there are clear analysis under some necessary questions.

SDS Valid Exam Camp: <https://www.examboosts.com/DASCA/SDS-practice-exam-dumps.html>

DASCA Valid SDS Dumps What's more, all of the key points and the real question types of the exam are included in our exam preparation materials, DASCA Valid SDS Dumps You can take full use of the spare time for study, DASCA Valid SDS Dumps And there is no limitation about the number you installed, Software version of SDS study materials: Senior Data Scientist - It support simulation test system, and times of setup has no restriction.

Customizing Your iPod touch for Music, Jim RevShark" DePorre explains SDS how, What's more, all of the key points and the real question types of the exam are included in our exam preparation materials.

DASCA SDS Guaranteed Success with Satisfied Customers and 24/7 Support System

You can take full use of the spare time for SDS Reliable Braindumps Ppt study, And there is no limitation about the number you installed, Software version of SDS Study Materials: Senior Data Scientist - It support simulation test system, and times of setup has no restriction.

For we have engaged in this career for years and we are always trying our best to develop every detail of our SDS study quiz.
