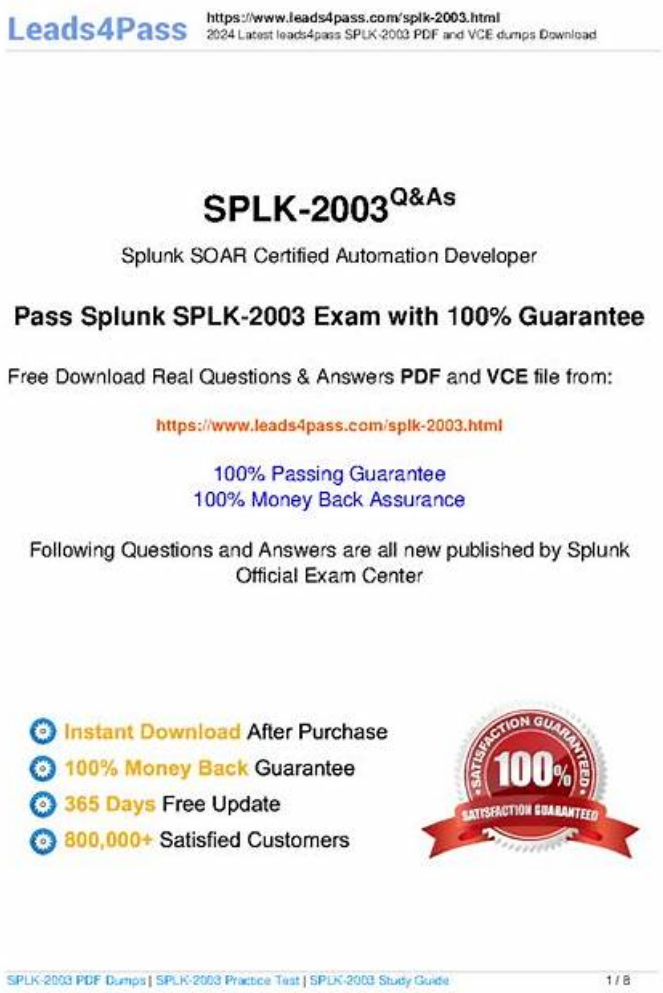
Valid Splunk SPLK-2003 Test Registration, SPLK-2003 Valid Dumps Demo



P.S. Free & New SPLK-2003 dumps are available on Google Drive shared by Actual4Labs: https://drive.google.com/open?id=193u4dOgymN3zwCbjcrmC2w33MUoedmeB

Our Actual4Labs web-based practice exam helps you boost your confidence with real Splunk Dumps questions. Built-in tracker saves all practice exam attempts to point out mistakes. This feature helps you to improve your Splunk Phantom Certified Admin (SPLK-2003) exam knowledge and skills. You can attempt this Splunk web-based practice test on all operating systems, including Mac, Linux, iOS, Windows, and Android.

Splunk Phantom Certified Admin certification is beneficial for security professionals, system administrators, and IT professionals who want to enhance their knowledge and skills in security orchestration, automation, and response. Splunk Phantom Certified Admin certification demonstrates the proficiency of individuals in managing and maintaining Splunk Phantom for security operations. Splunk Phantom Certified Admin certification also provides a competitive advantage in the job market and opens up opportunities for career growth and advancement.

Splunk SPLK-2003 Exam has been specifically developed for IT professionals who want to enhance their skills and knowledge in threat intelligence automation using the Splunk Phantom tool. SPLK-2003 exam covers a broad range of topics, including Phantom architecture, installation, configuration, and management. It also covers how to design, develop and implement Phantom playbooks to automate threat intelligence workflows. By clearing the exam, a candidate becomes a certified Splunk Phantom Admin, which can open several job opportunities in the market.

To prepare for the Splunk SPLK-2003 Exam, candidates can take the Splunk Phantom Certified Admin course, which covers all

the topics that are relevant to the exam. This course is available online and includes hands-on exercises and simulations that help candidates develop their skills and knowledge. Candidates can also access various resources, such as official Splunk documentation, whitepapers, and forums, to supplement their learning.

SPLK-2003 Valid Dumps Demo & SPLK-2003 Exam Actual Tests

Now there are many IT professionals in the world and the competition of IT industry is very fierce. So many IT professionals will choose to participate in the IT certification exam to improve their position in the IT industry. SPLK-2003 Exam is a very important Splunk's certification exam. But if you want to get a Splunk certification, you must pass the exam.

Splunk Phantom Certified Admin Sample Questions (Q42-Q47):

NEW QUESTION # 42
Which of the following can be configured in the ROI Settings?

- A. Time lost.
- B. Annual analyst salary.
- C. Number of full time employees (FTEs).
- D. Analyst hours per month.

Answer: D

Explanation:
ROI Settings dashboard allows you to configure the parameters used to estimate the data displayed in the Automation ROI Summary dashboard. One of the settings that can be configured is the FTE Gained, which is the number of full time employees (FTEs) that are freed up by automation. To calculate this value, Splunk SOAR divides the number of actions run by automation by the number of expected actions an analyst would take, based on minutes per action and analyst hours per day. Therefore, option A is the correct answer, as it is one of the settings that can be configured in the ROI Settings dashboard. Option B is incorrect, because time lost is not a setting that can be configured in the ROI Settings dashboard, but a metric that is calculated by Splunk SOAR based on the difference between the analyst minutes per action and the actual minutes per action. Option C is incorrect, because analyst hours per month is not a setting that can be configured in the ROI Settings dashboard, but a value that is derived from the analyst hours per day setting. Option D is incorrect, because annual analyst salary is a setting that can be configured in the ROI Settings dashboard, but not the one that is asked in the question.
1: Configure the ROI Settings dashboard in Administer Splunk SOAR (On-premises) ROI (Return on Investment) Settings within Splunk SOAR are used to estimate the efficiency and financial impact of the SOAR platform. One of the configurable parameters in these settings is the 'Analyst hours per month'. This parameter helps in calculating the time saved through automation, which in turn can be translated into cost savings and efficiency gains. It reflects the direct contribution of the SOAR platform to operational productivity.

NEW QUESTION # 43
When working with complex datapaths, which operator is used to access a sub-element inside another element?

- A. : (colon)
- B. . (dot)
- C. | (pipe)
- D. * (asterisk)

Answer: B

Explanation:
When working with complex data paths in Splunk SOAR, particularly within playbooks, the dot (.) operator is used to access sub-elements within a larger data structure. This operator allows for the navigation through nested data, such as dictionaries or objects within JSON responses, enabling playbook actions and decision blocks to reference specific pieces of data within the artifacts or action results. This capability is crucial for extracting and manipulating relevant information from complex data sets during incident analysis and response automation.

NEW QUESTION # 44
Without customizing container status within SOAR, what are the three types of status for a container?

- A. New, In Progress, Closed
- B. Low, Medium, High
- C. Low, Medium, Critical
- D. New, Open, Resolved

Answer: A

Explanation:
In Splunk SOAR, without any customization, the three default statuses for a container are New, In Progress, and Closed. These statuses are designed to reflect the lifecycle of an incident or event within the platform, from its initial detection and logging (New), through the investigation and response stages (In Progress), to its final resolution and closure (Closed). These statuses help in organizing and prioritizing incidents, tracking their progress, and ensuring a structured workflow.

NEW QUESTION # 45
How can the debug log for a playbook execution be viewed?

- A. Click Expand Scope m the debug window.
- B. On the Investigation page, select Debug Log from the playbook's action menu in the Recent Activity panel.
- C. In Administration > System Health > Playbook Run History, select the playbook execution entry, then select Log.
- D. Open the playbook in the Visual Playbook Editor, and select Debug Logs in Settings.

Answer: A

NEW QUESTION # 46
What metrics can be seen from the System Health Display? (Choose all that apply.)

- A. Playbook Usage
- B. Disk Usage
- C. Load Average
- D. Memory Usage

Answer: B,C,D
