

Valid Study 1Z0-771 Reference—The Best Exam Cram Review for 1Z0-771 - High Pass-Rate 1Z0-771 New Braindumps Pdf

BONUS!!! Download part of SurePassExams 1Z0-771 dumps for free: <https://drive.google.com/open?id=15g7VE0I3bICWWbN71UvNLD9YC24n4p8n>

1Z0-771 exam questions are being offered in three easy-to-use and compatible formats. The Oracle 1Z0-771 PDF dumps file, desktop practice test software, and web-based practice test software. All three 1Z0-771 Exam Questions format contain the Oracle 1Z0-771 actual questions and help you in 1Z0-771 exam preparation entirely.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 2	Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 3	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.

Topic 4	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 5	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 6	Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 7	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 8	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 9	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 10	Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 11	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 12	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 13	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 14	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 15	Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Updated Study 1Z0-771 Reference by SurePassExams

If you want to pass the 1Z0-771 exam in the lest time with the lest efforts, then you only need to purchase our 1Z0-771 learning

guide. You can own the most important three versions of our 1Z0-771 practice materials if you buy the Value Pack! Also you can only choose the one you like best. As you know, the best for yourself is the best. Choosing the best product for you really saves a lot of time! 1Z0-771 Actual Exam look forward to be your best partner.

Oracle APEX Cloud Developer Professional Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which two statements are true about the APEX_MAIL API?

- A. You can receive emails using the APEX_MAIL package in an Oracle APEX application.
- **B. You can send emails using the APEX_MAIL package from an Oracle APEX application.**
- **C. You can add files as attachments to your emails using the APEX_MAIL package.**
- D. The APEX_MAIL package supports sending emails only to Oracle database users.

Answer: B,C

Explanation:

The APEX_MAIL API facilitates email functionality:

A . You can add files as attachments: Using APEX_MAIL.ADD_ATTACHMENT (e.g.,

APEX_MAIL.ADD_ATTACHMENT(p_mail_id, p_attachment, p_filename)), you can attach BLOBs (e.g., PDFs) to emails.

C . You can send emails: APEX_MAIL.SEND (e.g., APEX_MAIL.SEND(p_to => 'user@example.com', p_body => 'Hello')) sends emails from APEX, leveraging the configured mail server.

B . You can receive emails: False; APEX_MAIL is send-only; receiving requires custom integration (e.g., IMAP).

D . Only to Oracle database users: False; emails can go to any valid address, not just database users.

Pitfall: Ensure the mail queue is processed (APEX_MAIL.PUSH_QUEUE) for timely delivery.

NEW QUESTION # 41

There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- **A. Setting Display Location to Inline in Notification**
- B. Setting Value Required to Yes on P1_SALARY.
- C. Removing P1_SALARY from the validation Associated Item.

Answer: A

Explanation:

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

NEW QUESTION # 42

You must create a single master detail page where users can select a row in the master region and see the corresponding details in the detail region. Users must also interact with the master or the detail without leaving the page. Which type of master detail implementation should you use?

- A. Stacked
- **B. Side by Side**
- C. Drill Down

Answer: B

Explanation:

Master-detail pages in APEX link a master dataset (e.g., list of orders) to its details (e.g., order items). The requirements demand:

C . Side by Side: This layout places the master region (e.g., an Interactive Report) and detail region (e.g., a Form or Grid)

horizontally on the same page. Selecting a master row updates the detail region via AJAX, allowing interaction with both regions without navigation. It's ideal for workflows needing simultaneous visibility (e.g., editing details while browsing masters).

A . Drill Down: Master links to a separate detail page, requiring navigation, which violates the "without leaving the page" condition.

B . Stacked: Master and detail are vertically stacked, but interaction is less fluid than side-by-side due to scrolling, though still on one page. Side-by-side is preferred for its clarity and accessibility.

Pitfall: Ensure the detail region's "Server-side Condition" uses the master's selected key (e.g., P1_ID).

NEW QUESTION # 43

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. Welcome Message
- B. AI Assistant Name
- C. Initial Prompt

Answer: A

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

NEW QUESTION # 44

Which three Theme Components are available out-of-the-box with the Universal Theme?

- A. Badge
- B. Calendar
- C. Comments
- D. REST Data Sources

Answer: A,B,C

Explanation:

The Universal Theme (Theme 42) provides pre-built components:

A . Calendar: A region type for date-based displays (e.g., events), styled with Universal Theme templates (e.g., FullCalendar integration).

B . Comments: A region type for user feedback or notes, with built-in styling and moderation options.

C . Badge: A UI component for displaying counts or statuses (e.g., "5 New"), often in navigation or lists, styled via CSS classes.

D . REST Data Sources: A data feature, not a theme component; it's a Shared Component, not a UI element tied to Universal Theme.

Technical Insight: These components leverage Universal Theme's CSS (e.g., t-Badge, t-Calendar) and JavaScript for interactivity, reducing custom coding.

Use Case: A dashboard with a Calendar for schedules, Comments for feedback, and Badges for unread alerts.

Pitfall: Customizing requires Theme Roller or CSS overrides.

NEW QUESTION # 45

.....

If you purchasing our 1Z0-771 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful 1Z0-771practice materials by recommending our 1Z0-771 Guide

preparations for you. And we give you kind and professional supports by 24/7, as long as you can have problems on our 1Z0-771 study guide, then you can contact with us.
