Test 350-901 Dumps.zip, 350-901 Valid Dumps Questions

our 350-901 exam questions beckon exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our 350-901 simulating exam is the best. Our effort in building the content of our 350-901 Study Materials lead to the development of learning guide and strengthen their perfection. To add up your interests and simplify some difficult points, our experts try their best to design our study material and help you understand the learning guide better.

Cisco 350-901 Exam Topics:

Section	Weight	Objectives

Using APIs	20%	<ol style="list-style-type: none"> 1. Implement robust REST API error handling for time outs and rate limits 2. Implement control flow of consumer code for unrecoverable REST API errors 3. Identify ways to optimize API usage through HTTP cache controls 4. Construct an application that consumes a REST API that supports pagination 5. Describe the steps in the OAuth2 three-legged authorization code grant flow
Cisco Platforms	20%	<ol style="list-style-type: none"> 1. Construct API requests to implement chatops with Webex Teams API 2. Construct API requests to create and delete objects using Firepower device management (FDM) 3. Construct API requests using the Meraki platform to accomplish these tasks <ul style="list-style-type: none"> • Use Meraki Dashboard APIs to enable an SSID • Use Meraki location APIs to retrieve location data 4. Construct API calls to retrieve data from Intersight 5. Construct a Python script using the UCS APIs to provision a new UCS server given a template 6. Construct a Python script using the Cisco DNA center APIs to retrieve and display wireless health information 7. Describe the capabilities of AppDynamics when instrumenting an application 8. Describe steps to build a custom dashboard to present data collected from Cisco APIs

Training Materials for Passing DEVCOR 350-901 Test

The candidates can increase their chances to pass the official exam if they use verified training materials, such as:

- **Developing Applications using Cisco Core Platforms and APIs (DEVCOR) v1.0**

This is the official course offered by Cisco for helping candidates to prepare for DEVCOR 350-901 exam. It is suitable for those specialists who want to develop network automation engineering roles at a professional level. During this training, candidates will learn how to understand software development and network practices at their maximum capacity. Therefore, they will be able to meet the business needs by implementing different Cisco apps. Another advantage that the attendees will get is gaining expertise in working with Cisco platforms, as well as automation and applications. Also, this course will award the attendees 64 CE credits which can be used in the future for recertification. By attending this class, the candidates meet the eligibility criteria for DEVCOR 350-901 Exam and help them consolidate their skills to pass the test from the first attempt. Overall, the course is available in three different formats. The candidates can choose the instructor-led type of training, where they will attend a classroom course for 5 days. In this time, they will have a lot of hands-on experience. This period is followed by self-study, which is organized for 3 days. What is more, this type of training is also available in a virtual format. Its structure is identical to the classical instructor-led classes, with the only difference that it is delivered in an online-based mode. Finally, the candidates can choose the e-learning format, through which the examinees will receive access to different materials. The effort that they will need to invest during those e-learning lessons is equivalent to 8 days of the full class.

- **350-901 Developing Applications Using Cisco Core Platforms and APIs v1.0 (DEVCOR 350-901) Exam Latest and Updated Q&A**

This book is available on Amazon in Kindle format. The candidates can buy it for a price of slightly more than \$7. The candidates for DEVCOR 350-901 exam will find the answers to the majority of their questions. In general, this guide includes different questions that will help the exam-takers get used to the test objectives and difficulty. Also, as they will have access to the correct answers, the candidates can check their preparedness level. Therefore, they will accurately know when they are really ready to take the official exam. In addition, the author, Cert Pass, mentions that the manual is permanently updated whenever Cisco adds new information to the exam blueprint. Therefore, the candidates will find the latest details that they need to learn to successfully pass the actual test from the first attempt.

Cisco Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Sample Questions (Q247-Q252):

NEW QUESTION # 247

Refer to the exhibit.

```

2021-11-18 15:43:06.486466 :: INFO :: Recieved request from 10.8.4.2:46937
2021-11-18 15:43:06.613524 :: ERROR :: Error 61 connecting to localhost:6379. Connection refused.
2021-11-18 15:43:07.118302 :: INFO :: Unable to verify the users's identity, dropping request
2021-11-18 15:43:20.173824 :: INFO :: Recieved request from 10.8.4.4:49368
2021-11-18 15:43:21.613524 :: ERROR :: Error 61 connecting to localhost:6379. Connection refused.
2021-11-18 15:43:21.486466 :: INFO :: Unable to verify the users's identity, dropping request

```

A team of engineers deploys a new front-facing application that communicates with other services to handle user requests. An external authentication and authorization service on port 6379 is used. When users try the new application, errors are reported. What is the cause of the issue?

- A. The users are not authenticating properly.
- B. The new application drops user requests.
- C. The authentication service is unreachable.
- D. The new application cannot reach the client IPs.

Answer: C

NEW QUESTION # 248

Refer to the exhibit.

```

if self.response.status_code == 429 and tries < self.request_retries:
    try:
        retry_after = 
    except Exception:
        retry_after = 1

    print(f'Waiting for {retry_after} second(s) ...')
    sleep(retry_after)
    continue

```

Which line of code needs to be placed on the snippet where the code is missing to provide API rate-limiting to the requests?

- A. `int(self.response.headers.get('Retry-After'))`
- B. `int(response.headers.post('Retry-After'))`
- C. `int(self.response.headers.post('Retry-After'))`
- D. `int(response.headers.get('Retry-After'))`

Answer: A

NEW QUESTION # 249

A developer must package an application for Kubernetes to integrate into a prebuilt CD environment. The application utilizes a Docker image from Cisco DevNet public repository and is accessible from a specific port of the container. Drag and drop the code from the bottom onto the box where the code is missing in the Kubernetes YAML configuration file. Not all options are used.

apiVersion:apps/v1

NEW QUESTION # 250

Refer to the exhibit.

A developer is creating a Python script to use the Webex Teams REST API to list joined spaces, retry after the server-specified amount of time if a "Too many requests" response is received, and print any other error that is received. Drag and drop the code snippets from the left onto the item numbers on the right that match the missing sections in the exhibit to complete the script. Not all code snippets are used.

Answer:

Explanation:

response.status_code
429
response.headers['Retry-After']
seconds

NEW QUESTION # 251

Refer to the exhibit.

```
$ docker service ps cisco_devnet
```

ID	NAME	SERVICE	IMAGE	LAST
STATE	DESIRED STATE	MODE		
d61834d1d0ce	cisco_devnet.1	cisco_devnet	devnet/test:1.0	Running 25

minutes Running		dc4.cisco.com		

The cisco_devnet Docker swarm service runs across five replicas. The development team tags and imports a new image named devnet/test:1.1 and requests that the image be upgraded on each container. There must be no service outages during the upgrade process. Which two design approaches must be used? (Choose two.)

- A. Implement rolling upgrades by using the docker service update command
- B. Enable parallel upgrades by using the docker service update command
- C. Ensure that the service is hosted behind a VIP with no session persistence
- D. Ensure that the service replicas are set to a minimum of 5
- E. Update the restart policy of the containers to restart upon failure

Answer: A,C

NEW QUESTION # 252

.....

Some candidates have doubt about our one-year free updates and one year service assist for buyers who purchase PassLeaderVCE 350-901 valid exam bootcamp files. Please rest assured. We have been engaging in offering IT certificate exams materials many years and we pursue long-term development. We provide the warm and 24-hours online service for every buyer who has any question about our 350-901 Valid Exam Bootcamp files. If we release new version for the 350-901 exam files, we will notify buyers via email for free downloading.
