

Valid Test Apple DEP-2025 Tutorial, Reliable DEP-2025 Practice Questions

P.S. Free & New DEP-2025 dumps are available on Google Drive shared by ActualCollection: <https://drive.google.com/open?id=1FoyNJ7fdgT5ZhTpoCmT1Nz981AkXywPs>

The Apple DEP-2025 certification exam offers a great opportunity for Apple professionals to demonstrate their expertise and knowledge level. In return, they can become competitive and updated with the latest technologies and trends. To do this they just need to enroll in Apple Deployment and Management Exam (DEP-2025) certification exam and have to put all efforts and resources to pass this challenging DEP-2025 exam. You should also keep in mind that to get success in the Apple DEP-2025 exam is not an easy task.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 2	Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 3	Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 4	Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 5	Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.

Topic 6	• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 7	• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 8	• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 9	• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.

Why Do You Need Valid and Updated Apple DEP-2025 Exam Dumps?

Our online test engine and windows software of the DEP-2025 test answers will let your experience the flexible learning style. Apart from basic knowledge, we have made use of the newest technology to enrich your study of the DEP-2025 exam study materials. Online learning platform is different from traditional learning methods. One of the great advantages is that you will soon get a feedback after you finish the exercises. So you are able to adjust your learning plan of the DEP-2025 Guide test flexibly. We hope that our new design can make study more interesting and colorful. You also can send us good suggestions about developing the study material.

Apple Deployment and Management Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

What's required to install a configuration profile on a device?

- A. An MDM solution
- **B. User acceptance**
- C. An APNs certificate
- D. An ADE token

Answer: B

Explanation:

To install a configuration profile on an Apple device, user acceptance is required unless the device is enrolled in an MDM solution with specific automation (e.g., Automated Device Enrollment). Configuration profiles, which contain settings or policies, are typically downloaded manually (e.g., via a website or email) and must be approved by the user through the Settings app on iOS/iPadOS or System Settings on macOS. An MDM solution (option A) can push profiles, but it's not required for manual installation. An APNs certificate (option B) is needed for MDM communication, not profile installation itself. An ADE token (option D) is for Automated Device Enrollment, not general profile installation. The Apple Platform Deployment Guidenotes that user consent is a default step for manual profile installation.

Reference: Apple Platform Deployment Guide(Chapter: Configuration Profiles).

NEW QUESTION # 36

You're assigning books that were bought in Apple Business Manager. Which of these can you assign the books to?

- A. Mac computers
- **B. Users with a Managed Apple Account**
- C. Shared iPad devices
- D. iPhone and iPad devices

Answer: B

Explanation:

In Apple Business Manager (ABM), books are assigned to users with Managed Apple Accounts, not directly to devices. This allows users to access books across multiple devices linked to their account. The Apple Business Manager User Guide states, "Books can be assigned to users with Managed Apple Accounts. Once assigned, users can access these books on any device where they're signed in with their Managed Apple Account." Options A, B, and D are incorrect because assignment is user-centric, not device-specific, though Macs can access books via the user's account.

Apple Deployment Guide for Education, "Content Distribution" section.

NEW QUESTION # 37

Which statement is true when you buy content in Apple Business Manager?

- A. Organizations are restricted to only free content available in the store.
- B. Only IT administrators can make purchases on behalf of the organization.
- C. Licenses for purchased apps can be transferred to another location.
- D. Content is automatically assigned to user accounts.

Answer: C

Explanation:

Apple's Apps and Books program within Apple Business Manager (ABM) allows organizations to purchase apps and books in volume. A critical benefit is the ability to transfer licenses between locations within the same ABM account. Apple Learning specifies that this feature enables schools, campuses, or departments to redistribute app licenses as organizational needs evolve, without changing the overall license count. Content is not automatically assigned to user accounts; admins choose device- or user-based assignment. Both free and paid apps are available, so there is no restriction to free content. Additionally, purchasing can be delegated to roles such as Content Managers, not just administrators. The ability to move licenses across locations makes management flexible and cost-efficient, while maintaining organizational ownership of the content.

NEW QUESTION # 38

Which aspect of your organization's infrastructure should you evaluate to ensure that your organization meets the network roaming needs of users throughout a building?

- A. Sources of interference caused by construction materials
- B. Number of devices per user
- C. Adequate number of access points per device
- D. Wi-Fi coverage and capacity

Answer: D

Explanation:

To support network roaming—where devices maintain connectivity while moving throughout a building—evaluating Wi-Fi coverage and capacity is essential. This involves assessing signal strength, bandwidth availability, and the ability of the wireless network to handle multiple devices seamlessly. Proper placement and power of access points ensure uninterrupted service. Number of devices per user (option A) is unrelated to roaming. Adequate access points per device (option C) is a specific detail within coverage and capacity, not the overarching aspect. Sources of interference (option D) is a factor to consider but secondary to overall coverage and capacity. The Apple Platform Deployment Guide stresses Wi-Fi infrastructure evaluation for mobility needs.

NEW QUESTION # 39

What do you need for account-driven User Enrollment?

- A. A Managed Apple Account
- B. A personal Apple Account with a signed enrollment profile
- C. An enrollment profile from a customized URL, mail message, or other means
- D. An enrollment certificate assigned to the account

Answer: A

Explanation:

Apple's User Enrollment workflow is specifically designed for BYOD scenarios, and account-driven User Enrollment makes this even simpler. Apple Learning specifies that the required element is a Managed Apple Account issued through Apple Business Manager or Apple School Manager. When a user signs into Settings with their Managed Apple Account, the iOS or iPadOS device automatically recognizes the account type and begins the enrollment process. This streamlines the workflow by removing the need for downloaded configuration profiles or certificates. Unlike Device Enrollment, User Enrollment establishes a cryptographically separated environment where organizational data and personal data remain isolated. This balance gives IT control of apps, calendars, and email while protecting the user's privacy. Thus, the Managed Apple Account is the key to enabling account-driven User Enrollment.
