Do not let other Data-Architect Study Dumps mess up your performance or aggravate learning difficulties. The efficiency and accuracy of our Data-Architect learning guide will not let you down.

Salesforce Certified Data Architect Sample Questions (Q205-Q210):

NEW QUESTION # 205

UC is migrating individual customers (B2C) data from legacy systems to SF. There are millions of customers stored as accounts and contacts in legacy database.

Which object model should a data architect configure within SF ?

- A. Leverage custom person account object in SF
- B. Leverage custom account and contact object in SF
- C. Leverage person account object in Salesforce
- D. Leverage standard account and contact object in SF

Answer: C

NEW QUESTION # 206

A large retail B2C customer wants to build a 360 view of its customer for its call center agents. The customer interaction is currently maintained in the following system:

1. Salesforce CRM
3. Customer Master Data management (MDM)
4. Contract Management system
5. Marketing solution

What should a data architect recommend that would help upgrade uniquely identify customer across multiple systems:

- A. Store the salesforce id in all the solutions to identify the customer.
- B. Create a customer data base and use this id in all systems.
- C. Create a custom object that will serve as a cross reference for the customer id.
- D. Create a custom field as external id to maintain the customer Id from the MDM solution.

Answer: D

NEW QUESTION # 207

Universal Containers (UC) is implementing Salesforce and will be using Salesforce to track customer complaints, provide white papers on products, and provide subscription based support.

Which license type will UC users need to fulfill UC's requirements?

- A. Service Cloud License
- B. Lightning Platform Starter License
- C. Sales Cloud License
- D. Salesforce License

Answer: A

NEW QUESTION # 208

UC is preparing to implement sales cloud and would like to its users to have read only access to an account record if they have access to its child opportunity record. How would a data architect implement this sharing requirement between objects?

- A. Create an owner-based sharing rule.
- B. Implicit sharing will automatically handle with standard functionality.
- C. Add appropriate users to the account team.
- D. Create a criteria-based sharing rule.

Answer: B

Explanation:

Implicit sharing will automatically handle this sharing requirement with standard functionality, as it grants read-only access to parent accounts when users have access to child opportunities. This is also known as account-opportunity sharing³. Creating a criteria-based sharing rule (option A) or an owner-based sharing rule (option D) is not necessary, as they are used to grant additional access based on record criteria or ownership. Adding appropriate users to the account team (option C) is also not required, as it is used to grant access to specific users or groups for individual accounts.

NEW QUESTION # 209

UC migrating 100,000 Accounts from an enterprise resource planning (ERP) to salesforce and is concerned about ownership skew and performance.

Which 3 recommendations should a data architect provide to prevent ownership skew?

Choose 3 answers:

- A. Assign "view all" permission on profile to give access to account.
- B. Assign a default user as owner of account and do not assign any role to default user.
- C. Keep users out of public groups that can be used as the source for sharing rules.
- D. Assigned a default user as owner of accounts, and assign role in hierarchy.
- E. Assign a default user as owner of accounts and assigned top most role in hierarchy.

Answer: B,C,E

NEW QUESTION # 210

.....
