You can also use the Scrum Practice Test (Links to an external site.) engine to monitor your progress and review your answers to see where you need to improve for the SAFe Practitioner Exam (6.0) (SAFe-Practitioner) exam.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q203-Q208):

NEW QUESTION # 203

When is the System Demo conducted during program execution?

- A. At the end of every Iteration
- B. Each week
- C. Only when all the stakeholders are available
- D. When the System Team is ready

Answer: A

Explanation:

System Demo is a critical event that provides stakeholders an integrated view of the new features delivered by the Agile Release Train (ART) over the past iteration. It offers the ART a fact-based measure of current, system-level progress within the Program Increment (PI). It also enables fast feedback and learning cycles, which help the ART build the right solution and improve quality. The System Demo takes place as close to the end of the iteration as possible, ideally the next day. It requires implementing the scalable engineering practices necessary to support Continuous Integration across the ART12. NEW QUESTION # 204

Which of the following enables continuous deployment?

- A. feature toggles
- B. release notes
- C. none of the above
- D. continuous learning

Answer: A

NEW QUESTION # 205

Team A is a maintenance team that cannot always predictably plan their work. They like to meet daily to review the needs of the system and plan for how they can quickly address those needs during the workday.

Which of the following SAFe Lean-Agile methods should Team A use to plan and execute their work?

- A. SAFe XP Team
- B. SAFe Enabling Team
- C. SAFe Platform Team
- D. SAFe Team Kanban

Answer: D

Explanation:

SAFe Team Kanban is a method that enables teams to manage their flow of work using a visual board and a set of policies. It is especially suitable for teams that have unpredictable or interrupt-driven work, such as maintenance, support, or operations teams1. SAFe Team Kanban helps teams to visualize their work, limit their work in progress (WIP), measure and improve their flow, and implement feedback loops2. Team A is a maintenance team that cannot always predictably plan their work. They like to meet daily to review the needs of the system and plan for how they can quickly address those needs during the workday. Therefore, SAFe Team Kanban is the most appropriate SAFe Lean-Agile method for Team A to plan and execute their work. References: Team Kanban - Scaled Agile Framework, SAFe Lean-Agile Principles - Scaled Agile Framework SAFe Team Kanban is a method that helps teams facilitate the flow of value by visualizing workflow, establishing Work In Process (WIP) limits, measuring throughput,

and continuously improving their process¹. It is suitable for teams that have a rapid and uneven arrival of work and fast-changing priorities, such as maintenance teams². The other options are not appropriate for Team A's context. SAFe Platform Team is organized around developing and supporting platforms that provide services to other teams³. SAFe Enabling Team is organized to assist other groups with specialized capabilities and help them become proficient in new technologies⁴. SAFe XP Team is an Agile Team method that combines the power of Scrum with Extreme Programming (XP) practices and operates within the ART iteration cadence⁵.

NEW QUESTION # 206

Which SAFe Core Value includes "use common terminology" and "understand your customer"?

- A. Relentless Improvement
- B. Respect for People
- C. Alignment
- D. Transparency

Answer: C

Explanation:

= Alignment is one of the four core values of SAFe that represents the foundational beliefs that are key to SAFe's effectiveness. Alignment helps everyone in the SAFe portfolio work toward a common direction and deliver value with speed and quality. One of the ways to create and maintain alignment in SAFe is to speak with a common language and understand your customer. Speaking with a common language means using consistent terms and definitions across the enterprise to avoid confusion and ambiguity. Understanding your customer means identifying their needs, preferences, and expectations, and delivering solutions that meet or exceed them. References: = Core Values - Scaled Agile Framework, SAFe Core Values - Scaled Agile Framework

NEW QUESTION # 207

How does relentless improvement support value in the SAFe House of Lean?

- A. It allows teams to pivot without mercy or guilt
- B. It uses informed decision-making through fast feedback
- C. It optimizes the whole
- D. It builds long-term partnerships based on trust

Answer: B

Explanation:

Relentless improvement is the fourth pillar of the SAFe House of Lean, which represents the foundational beliefs that are key to SAFe's effectiveness¹. Relentless improvement encourages learning and growth through continuous reflection and process enhancements². It uses informed decision-making through fast feedback, which means that teams and individuals use empirical data and validated learning to evaluate their assumptions and outcomes, and adjust their actions accordingly³. This enables them to deliver value faster, with higher quality and lower risk, and to foster a culture of innovation and experimentation⁴.
