The aim of our service is to provide the C\_ACDET\_2506 Exam Torrent to the client and help them pass the exam and not to disclose their privacy to others and seek illegal interests.

### SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>

### SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

Which read-only files show the key and English translations for custom field labels and helptips?

- A. The customerResource files that can be exported through AML & Translations Upload
- B. The JSON files that can be exported through ICM
- C. The JSON files that can be exported through AML & Translations Upload
- D. The customerResource files that can be exported through ICM

#### Answer: C

Explanation:

SAP Ariba stores translations for custom field labels and help tips in JSON files exported and imported via AML (Advanced Metadata List) & Translations Upload. These JSON files contain key-value pairs representing the translation keys and their English or localized strings. This mechanism supports language management and bulk updates of translated content.

ICM exports configuration bundles but does not handle translation files in JSON format. CustomerResource files are not the standard format for translation export/import.

Using AML & Translations Upload allows administrators to maintain and update translations across multiple languages efficiently, ensuring consistent user experience in multi-lingual deployments.

#### NEW QUESTION # 45

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in

the advanced tab of field configuration. What is likely the cause for this behavior?  
(Select 2 correct answers)

- A. The contract must be in an amendment state for this option to be visible in customizing.
- B. The field you are customizing is standard and therefore cannot be changed.
- C. The field you are customizing is not in the contract workspace or request classes.
- D. A customization is in flight and needs to be cleared and reset prior to making this change.

**Answer: A,C**

Explanation:

The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).

Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these classes will not show amendment-specific editability options (C).

The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class- applicable.

#### NEW QUESTION # 46

You need to revise a published form template. What steps do you follow?

- A. Create a new version, edit, test, and publish
- B. Delete and recreate
- C. Clone and change ID
- D. Edit directly in production

**Answer: A**

Explanation:

SAP Ariba requires that revisions to published form templates be handled through creating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

#### NEW QUESTION # 47

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data that will be captured in that standard field. How can this be achieved?

- A. All standard fields are reportable by default.
- B. Under Field Configurations, search for the field in the appropriate class, mark the field Reportable, Save and Publish.
- C. The system makes all fields reportable after a system refresh.
- D. Create a custom field that can be marked Reportable, default the custom field to the standard field value, publish, and then pull the field into reporting

**Answer: D**

#### NEW QUESTION # 48

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? Note: There are 2 correct answers to this question.

- A. SAP Ariba Category Management
- B. SAP Ariba Contracts
- C. SAP Ariba Supplier Lifecycle and Performance
- D. SAP Ariba Buying and Invoicing

**Answer: A,B**

## NEW QUESTION # 49
