

Valid VMware 3V0-32.23 Test Practice, 3V0-32.23 Test Online

BTW, DOWNLOAD part of Pass4guide 3V0-32.23 dumps from Cloud Storage: <https://drive.google.com/open?id=1j90eMV6fh4TrxyNEMYYJezhkFsN9z3z>

The Pass4guide acknowledges that VMware aspirants are continuously juggling a couple of responsibilities, so 3V0-32.23 questions are ideal for short practise. Candidates can access those questions everywhere and at any time, the usage of any clever device, which allows them to examine at their very own tempo. The 3V0-32.23 Questions are portable and you can also print them.

The VMware 3V0-32.23 Exam is divided into six sections, with each section covering a specific topic. The first section covers cloud architecture and design, focusing on designing scalable and secure cloud solutions. The second section covers automation workflows and scripting, including the design and implementation of automation workflows using VMware technologies. The third section covers cloud security, including security policies, compliance, and auditing.

3V0-32.23 Test Online & 3V0-32.23 Sample Exam

Pass4guide helps you in doing self-assessment so that you reduce your chances of failure in the examination of Cloud Management and Automation Advanced Design (3V0-32.23) certification. Similarly, this desktop 3V0-32.23 practice exam software of Pass4guide is compatible with all Windows-based computers. You need no internet connection for it to function. The Internet is only required at the time of product license validation.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q149-Q154):

NEW QUESTION # 149

A company has a main office, three regional offices, and six branches offices. The network links are configured as shown in the exhibit. View the Exhibit:

During information gathering, an architect records:

The regional offices are located in secure bunkers. The CTO feels this would be a good location for all the vRealize Automation components to meet their BC/DR objectives. However, the CTO is looking for the best design while maintaining their very high security requirements.

The branch offices are located in very remote locations with unpredictable network performance.

Reliance on the main and regional offices needs to be minimal while still allowing provisioning of machines in the branch offices. The branch offices consist of three host vSphere clusters.

There is synchronous vSphere Metro Storage Cluster (vMSC) between the regional offices as well as replicated backups between the regional offices with replication running nightly. The CEO wants to have the lowest possible RPO and RTO of the vRealize portal including the ability to manage already provisioned machines while NOT increasing the amount of data being replicated between the regional offices as much as possible.

Referring to the exhibit, which two design specifications can the architect recommend to meet requirements? (Choose two.)

- A. vSphere agents in the regional offices that manage the regional and branch offices
- B. vSphere agents in each of the branch offices
- C. distributed vRealize Automation management solution in the main office
- D. distributed vRealize Automation management solution in each of the regional offices
- E. distributed vRealize Automation management solution across the regional offices

Answer: A,E

NEW QUESTION # 150

An organization has onboarded a new business unit whose role is to test the applications 5 days prior to the release date. The Service Broker administrator should allow a 2-day extension for these deployments before they are deleted permanently.

Which two options must be configured in the lease policy to meet the requirements? (Choose two.)

- A. A total maximum lease of 7 days
- B. A maximum lease of 5 days
- C. A maximum lease of 7 days
- D. A total maximum lease of 5 days
- E. A grace period of 5 days

Answer: A,B

NEW QUESTION # 151

In the context of a Cloud Management logical design, how does VMware Aria Automation contribute to efficiency?

- A. Streamlining procurement of physical servers
- B. Monitoring server temperature and humidity
- C. Automating repetitive tasks and workflows
- D. Managing customer relationship databases

Answer: C

NEW QUESTION # 152

An architect designs a private cloud environment for an organization. The solution must provide the capability to show pricing(showback) for Virtual Machine based services while being requested by the end user via a self-service portal. Which Cloud Management product should be integrated with VMware Aria Automation to meet this requirement?

- A. VMware Aria Operations for Applications
- B. VMware Aria Operations for Integrations
- C. VMware Aria Operations for Logs
- **D. VMware Aria Operations**

Answer: D

Explanation:

VMware Aria Operations integrates with Aria Automation to provide showback and pricing capabilities for virtual machine services in the self-service portal, allowing end users to see cost information during requests.

NEW QUESTION # 153

An architect was tasked with providing a temporary vRealize Automation instance for a test environment that includes a single vRealize Automation appliance and an IaaS server that includes a SQL database instance. After testing is complete, the architect is tasked to convert the existing instance into a distributed, load-balanced instance to be used for production. Which design solution would best address this request?

- **A. - Deploy a load balancer that routes appropriate traffic to the existing instance.**
- Deploy additional vRealize Automation appliances and join them to the existing machine to create a cluster.
- Deploy additional IaaS servers for Web, Manager, DEM workers and Agents.
- B. Deploy a new distributed load-balanced vRealize Automation environment.
Configure directories and groups the same as for the proof-of-concept instance.
Import the test-managed machines into the new instance using bulk import.
- C. - Deploy additional vRealize Automation appliances and join them to the existing machine to create a cluster.
- Deploy additional IaaS servers for Web, Manager, DEM workers, and Agents.
- Add the additional IaaS servers from the cluster tab under the vRealize Automation management page.
- D. - Deploy a new distributed load-balanced vRealize Automation environment.
- Configure directories and groups the same as for the proof-of-concept instance.
- Import the test-managed machines into the new instance using migration.

Answer: A

NEW QUESTION # 154

.....

3V0-32.23 dumps at Pass4guide are always kept up to date. Every addition or subtraction of 3V0-32.23 exam questions in the exam syllabus is updated in our braindumps instantly. Practice on real 3V0-32.23 exam questions and we have provided their answers too for your convenience. If you put just a bit of extra effort, you can score the highest possible score in the real 3V0-32.23 exam because our 3V0-32.23 Exam Preparation dumps are designed for the best results. Start learning the futuristic way. 3V0-32.23 exam practice software allows you to practice on real 3V0-32.23 questions. The 3V0-32.23 Practice Exam consists of multiple practice modes, with practice history records and self-assessment reports. You can customize the practice environment to suit your learning objectives.
