MB-500 exam measures the candidate's ability to design, build, test, deploy, and maintain applications for Dynamics 365 Finance and Operations. MB-500 Exam is intended for individuals who have a strong understanding of the development principles and techniques used in Dynamics 365 Finance and Operations apps.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q205-Q210):

NEW QUESTION # 205

A company plans to migrate purchase orders from an older system into Dynamics 365 Finance.

You need to generate field mapping between the source and the target data structures.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Create this type of project in the data management workspace:

	▼
Import	
Export	
View map	

Open the project and select:

	▼
Define an XML manifest	
Manage	
Download	

Select this UI option:

	▼
Generate mapping	
Generate integration	
Modify target mapping	

Microsoft

Answer:

Explanation:

Create this type of project in the data management workspace:	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Import</td><td></td></tr><tr><td>Export</td><td></td></tr><tr><td>View map</td><td></td></tr></table>		▼	Import		Export		View map	
	▼								
Import									
Export									
View map									
Open the project and select:	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Define an XML manifest</td><td></td></tr><tr><td>Manage</td><td></td></tr><tr><td>Download</td><td></td></tr></table>		▼	Define an XML manifest		Manage		Download	
	▼								
Define an XML manifest									
Manage									
Download									
Select this UI option:	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Generate mapping</td><td></td></tr><tr><td>Generate integration</td><td></td></tr><tr><td>Modify target mapping</td><td></td></tr></table>		▼	Generate mapping		Generate integration		Modify target mapping	
	▼								
Generate mapping									
Generate integration									
Modify target mapping									

Microsoft

Explanation:

Graphical user interface, text, application, email Description automatically generated

Create this type of project in the data management workspace:	<table border="1"><tr><td></td><td>▼</td></tr><tr><td>Import</td><td></td></tr><tr><td>Export</td><td></td></tr><tr><td>View map</td><td></td></tr></table>		▼	Import		Export		View map

NEW QUESTION # 206

You need to resolve the issue for UserB.

Which framework should you use?

- A. RunBaseBatch
- B. SysOperationSandBox
- C. SysOperation
- D. SysExtension

Answer: C

NEW QUESTION # 207

A company implements Dynamics 365 finance and operations apps.

You are developing code to consume OData service endpoints. You complete the application registration process and gather the details required to create a C# console application.

You need to ensure that the console application interacts with Dynamics 365 Finance OData services.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add the custom OData service endpoints in the ODataClient list.

Add the OData v4 client code generator.

Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance.

Generate proxy classes.

Answer Area

Add the OData v4 client code generator.

Add the custom OData service endpoints in the ODataClient list.

Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance.

Microsoft

Answer:

Explanation:

Actions

Add the custom OData service endpoints in the ODataClient list.

Add the OData v4 client code generator.

Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance.

Generate proxy classes.

Answer Area

Add the OData v4 client code generator.

Add the custom OData service endpoints in the ODataClient list.

Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance.

Microsoft

Explanation:

Graphical user interface, text, application Description automatically generated

Add the OData v4 client code generator.

Add the custom OData service endpoints in the ODataClient list.

Microsoft
Generate proxy classes.

Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance.

Step 1: Add the OData v4 client code generator

Install OData Client Code Generator

Step 2: Add the custom OData service endpoints to the ODataClient list

After you downloaded, installed the OData V4 Client Code Generator and restart the Visual Studio you will be able to find and add 'OData Client' item into our project.

Step 3: Generate proxy classes

Step 4: Point the MetadataDocumentUri variable to the Dynamics 365 Finance instance You need to set MetadataDocumentUri, which is generated by the OData Code Generator.

NEW QUESTION # 209

You are a Dynamics 365 Finance developer. You create a form.

You must ensure that only sales managers can view the form.

You need to set up security for the form.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Action
1	Add the menu item for the form to the entry point node of a new privilege. Add the form object to the entry point node of a new privilege. Add the form object to the directaccesspermissions node of a new privilege.
2	Add the privilege to a new duty. Add the menu item for the form to the directaccesspermissions node of a new privilege. Add the privilege to a new security policy.
3	Add the duty to the security role for sales managers. Add the security policy to the security role for sales managers.

Answer:

Explanation:

Step	Action
1	Add the menu item for the form to the entry point node of a new privilege. Add the form object to the entry point node of a new privilege. Add the form object to the directaccesspermissions node of a new privilege.
2	Add the privilege to a new duty. Add the menu item for the form to the directaccesspermissions node of a new privilege. Add the privilege to a new security policy.
3	Add the duty to the security role for sales managers. Add the security policy to the security role for sales managers.

Explanation:

Step	Action
1	Add the menu item for the form to the entry point node of a new privilege. Add the form object to the entry point node of a new privilege. Add the form object to the directaccesspermissions node of a new privilege.
2	Add the privilege to a new duty. Add the menu item for the form to the directaccesspermissions node of a new privilege. Add the privilege to a new security policy.
3	Add the duty to the security role for sales managers. Add the security policy to the security role for sales managers.

Step 1: Add the form object to the entry point node of a new privilege.

Your desired security privilege you can either directly set form control permissions or Entry Points.

For the Entry point method you need first need to add new entry point and set its object type and object name properties or for existing ones select desired entry point and click on drop down arrow and on controls right click and select new control, and now set its grant and name properties to desired control and its access rights.

Step 2: Add the privilege to a new duty

You need to assign this privilege in desired security role and security duty.

Step 3: Add the duty to the security role for sales managers.
