Salesforce Certified B2C Commerce Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- B. The Architect should check to see If the LINK cartridge has been updated already, integrate It, apply the customisations, and teat thoroughly.
- C. The Architect should update all the deprecated API cats in the already integrated LINK cartridge and test thoroughly.
- D. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.

Answer: C

NEW QUESTION # 48

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by *total time" column. The following come as the top Ave items:

Controller Name	Function	Hits	Total Time	Average Time	Minimum Time	Maximum Time
Product	Detail	38,880	23,528,680	607	39	2,311
Search	Show	32,400	19,380,360	464	107	1,143
Home	IncludeHeaderMenu	5,154	10,776,564	2,079	2,056	2,200
Product	HitTile	228,780	7,944,480	33	10	245
Product	ShowInCategory	38,880	2,663,280	69	33	100

Which controller should the Architect focus on to further investigate the performance issue?

- A. Home-IncludeHeaderMenu as It has highest average time.
- B. Product-Detail as It has the highest total time and highest maximum time.
- C. Search Show as this Is one of the key controllers that the customer uses
- D. Product-HitTile as it has the highest hits during the load test.

Answer: A

NEW QUESTION # 49

The Client is creating a new Storefront and their requirements include:

- * ApplePay support
- * Log -n through a standard OAuth2 social media account
- * One Okie checkout process
- * Ay B testing forpromotions

Which two items require technical documentation for customizing the Storefront Reference Architecture?

Choose 2 answers

- A. ApplePay support
- B. A/B testing forpromotions

- C. One Click checkout process
- D. log in through a standard OAuth2 social media account

Answer: C,D

Explanation:

For customizing the Storefront Reference Architecture to meet specific requirements, the following items would require detailed technical documentation:

Option A (One Click checkout process): Implementing a one-click checkout process involves significant customization to streamline the checkout flow, potentially requiring integration with payment providers and modifications to the user session management.

Option C (Log in through a standard OAuth2 social media account): Integrating OAuth2 for social media logins involves handling authentication tokens, user sessions, and potentially syncing user data with the B2C Commerce profiles, all of which require detailed security and integration documentation.

These customizations require careful planning and implementation to ensure they work seamlessly with existing Storefront Reference Architecture components and meet security standards.

NEW QUESTION # 50

An Architect is performing an audit of production logs via Log Center and finds some potentially dangerous custom log output.

  order: 867173; email: peter@family.guy; firstName: Peter; lastName: Griffin;
  dress: 31 Spooner St; city: Quahog; state: RI; country: US;

```

In which two ways is this log output improper in a production environment? Choose 2 answers

- A. Information logs should not be used in a production environment
- B. The log information includes the customer's cardname as it appears along with the credit card number (PAN), which violates PCI.
- C. The log information includes the customer's card CW (card security code) and expiration date, which violates PCI.
- D. The log information includes the order number and customer's email, which violates PCI.

Answer: B,D

NEW QUESTION # 51

A new dent is moving from their existing ecommerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. It is required that the service implementation on the B2C Commerce site supports authentication and encoding.

What type should the Architect document this new service as?

- A. SOAP
- B. Generic
- C. HTTP Form
- D. HTTP

Answer: D
