## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q22-Q27):

### NEW QUESTION # 22

Which type of testing should be done after a release upgrade has occurred?

- A. String tests
- B. Regression tests
- C. Integration tests
- D. User Acceptance tests

**Answer: B**

Explanation:

Regression tests are a type of testing that should be done after a release upgrade has occurred. Regression tests are performed to ensure that the existing functionality of the system is not affected by the changes introduced by the new release. Regression tests help to identify any defects or errors that may have been introduced or uncovered by the release upgrade. Regression tests are part of the quality assurance process and are essential for ensuring the stability and reliability of the system. ### NEW QUESTION # 23

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- B. SAP Cloud ALM Requirements app
- C. Availability and Dependencies of Solution Processes Excel
- **D. Business Driven Configuration Questionnaire**

**Answer: D**

Explanation:

The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. ### NEW QUESTION # 24

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. System consistency checks
- **B. The selected scope**
- C. Added partner content
- **D. The selected deployment target**

**Answer: B,D**

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

### NEW QUESTION # 25

You want to restrict end user activities for an application.

Where would you look up the business catalog(s) that grant access to the app?

- A. In the App Finder app
- B. In the Define Your Scope app
- C. In the SAP Fiori Apps Reference Library
- D. In the Configure Your Solution app

**Answer: C**

Explanation:

The SAP Fiori Apps Reference Library is a comprehensive online library of all available SAP Fiori apps. It provides information about the app features, technical data, configuration, and implementation. You can use the SAP Fiori Apps Reference Library to look up the business catalog(s) that grant access to an app by following these steps:

- \* Go to the SAP Fiori Apps Reference Library website and log in with your SAP credentials.
- \* In the search bar, enter the name or ID of the app you want to restrict access to, and click the search icon.
- \* In the search results, click on the app tile to open the app details page.
- \* On the app details page, scroll down to the Implementation Information section and expand the Configuration tab.
- \* Under the Configuration tab, you will see the Business Catalog field, which lists the business catalog(s) that contain the app. You can click on the business catalog ID to view more details about it, such as the business roles, business groups, and other apps that are assigned to it.
