- A. Lead

- B. Contact
- C. Case
- D. Campaign
- E. Opportunity

Answer: B,C,E

NEW QUESTION # 154

Universal Containers wants to automatically back up all the Salesforce data on a monthly basis. Which tool can a system administrator use to meet this requirement?

- A. Import wizard
- B. Scheduled report.
- C. Data export service
- D. Analytic snapshot

Answer: C

NEW QUESTION # 155

What relationship can be selected in a custom report type where accounts is the primary object and contacts is the related object? (2 Answers)

- A. Each account must have a related account
- B. Each account may or may not have related contacts.
- C. Each contact may or may or may not have a related account.
- D. Each account must not have related contacts

Answer: A,B

NEW QUESTION # 156

A financial services company needs to capture a new type of referral that has different required fields than what is currently configured in the org.

Which three steps should the administrator take to configure Financial Services Cloud correctly based on the scenario?

- A. Create a custom Referral object.
- B. Create a new referral record type mapper record.
- C. Update the lead page layout.
- D. Create a new record type Referral on the Lead object.
- E. Assign the record type to users.

Answer: C,D,E

Explanation:

Explanation

The following steps should be taken by the administrator to configure Financial Services Cloud correctly based on the scenario:

Assign the record type to users. You need to assign the new record type to the user profiles or permission sets that need to create or access referrals of that type. You can assign record types by going to Setup > Profiles > Object Settings > Leads > Record Types or Setup > Permission Sets > Object Settings > Leads > Record Types.

Create a new record type Referral on the Lead object. You need to create a new record type on the Lead object and name it Referral. You can use this record type to distinguish referrals from other types of leads and apply different page layouts, business processes, or validation rules for referrals.

Update the lead page layout. You need to update the page layout for the Referral record type and add or remove fields according to the requirements. You can also make some fields required or read-only on the page layout level. You can edit page layouts by going to Setup > Object Manager > Lead > Page Layouts.
