Which statement about HPE OneView for VMware vCenter Server functionality is true for this environment?

- A. Only systems managed using HPE Oneview can use HPE Oneview for VMware vCenter Server functionalities
- B. HPE Synergy requires HPE Composer 2 for full functionality of HPE OneView for VMware vCenter Server
- C. HPE ProLiant servers need an HPE OneView for VMware vCenter Server license for full functionality
- D. Individual systems can be added to HPE OneView for VMware vCenter Server through an ILO management processor

Answer: A

- Two HPE Virtual Connect SE 100Gb F32 Modules for Synergy
- An appropriate number of vSAN Standard licenses for each compute node
- One HPE O3940 Storage Module with 40 SSDs - All required cables and options

Which statement about this request is true?

- A. One HPE Virtual Connect SE 100Gb F32 Module for Synergy should be replaced with 50GD/S ILM
- B. 20 SSD drives should be removed from this setup, as D3940 supports only 20 SSD or SAS drives.
- **C. vSphere licenses should be added, as vSAN licenses do not replace vSphere licenses**
- D. vSphere Standard licenses should be replaced with Enterprise Plus licenses to enable vSAN

Answer: C

Explanation:

vSAN licenses and vSphere licenses are separate entities.
