

Vce Juniper JN0-253 Test Simulator, JN0-253 Latest Learning Material

P.S. Free 2025 Juniper JN0-253 dumps are available on Google Drive shared by Itcertkey: https://drive.google.com/open?id=1N0viQXQJbu_YTcbYCKJut5veFqTDvmSD

Our JN0-253 learning materials are carefully compiled by industry experts based on the examination questions and industry trends. You don't have to worry about our learning from JN0-253 exam question. We assure you that our JN0-253 learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our JN0-253 Quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly.

Having more competitive advantage means that you will have more opportunities and have a job that will satisfy you. This is why more and more people have long been eager for the certification of JN0-253. Our JN0-253 test material can help you focus and learn effectively. You don't have to worry about not having a dedicated time to learn every day. You can learn our JN0-253 exam torrent in a piecemeal time, and you don't have to worry about the tedious and cumbersome learning content. We will simplify the complex concepts by adding diagrams and examples during your study. By choosing our JN0-253 test material, you will be able to use time more effectively than others and have the content of important information in the shortest time.

Itcertkey Study Guide Helps You Master All the Topics on the JN0-253 Exam

Now you need not be worried, if you are run short of time for JN0-253 exam preparation or your tough work schedule doesn't allow you spare time for studying preparatory guides. Relying on Itcertkey JN0-253 Dumps will award an easy course to get through the exam and obtain a credential such as JN0-253 you ever desired.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q49-Q54):

NEW QUESTION # 49

What are two solutions that Juniper Mist Location Services provide? (Choose two.)

- A. wayfinding
- B. asset location
- C. GPS location
- D. geofencing

Answer: A,B

Explanation:

Juniper Mist Location Services provide asset location and wayfinding. According to official Juniper documentation: "Juniper Mist provides location accuracy for wayfinding, asset visibility, and user engagement," leveraging cloud-native vBLE and Wi-Fi technologies.

* Asset location enables organizations to locate high-value resources, personnel, or IoT devices in real time with rich analytics, making it easy to find assets and people using the Mist dashboard and APIs.

* Wayfinding gives users turn-by-turn indoor navigation and mapping via mobile SDKs and the Mist cloud. While geofencing can be achieved as part of location-based engagement features, it is not listed as a primary Mist Location Service solution. GPS location is not directly supported; Mist Location Services operate indoors using Wi-Fi and BLE signals, not satellite GPS.

NEW QUESTION # 50

Which two statements are correct after you request the subscription renewal using e-mail? (Choose two.)

- A. Juniper Mist sends a cancellation notice.
- B. Juniper Mist sends a welcome package with promotional materials.
- C. Juniper Mist processes the order and sends an activation code.
- D. Juniper Mist e-mails the support request for the selected subscriptions.

Answer: C,D

Explanation:

When a customer requests a subscription renewal for Juniper Mist services via e-mail, the process is handled through a coordinated workflow between the Juniper Mist Cloud licensing system and Juniper Support. The renewal request ensures that existing service entitlements—such as Wireless Assurance, Wired Assurance, WAN Assurance, Marvis AI, or Premium Analytics—continue without interruption.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the renewal workflow is described as follows: "When a renewal request is submitted via e-mail, Juniper Mist support receives and validates the request, initiates processing for the selected subscriptions, and issues a new activation code once the renewal is completed." Here's what happens after the renewal request:

* B. The Juniper Mist system sends a confirmation e-mail acknowledging the renewal request and routes it to support for processing.

* C. Once processed, Juniper Mist generates and delivers an activation code via e-mail that must be entered into the Mist portal to activate the renewed subscription(s).

Incorrect options:

* A. No promotional materials or physical packages are sent.

* D. A cancellation notice is not sent for renewal requests; it applies only to expired or terminated subscriptions.

Therefore, the correct answers are B. Juniper Mist e-mails the support request for the selected subscriptions and C. Juniper Mist processes the order and sends an activation code.

NEW QUESTION # 51

Which Juniper Mist feature provides visibility into BGP operations for MX Series routers?

- A. Routing Assurance
- B. Wired Assurance
- C. Access Assurance
- D. WAN Assurance

Answer: A

Explanation:

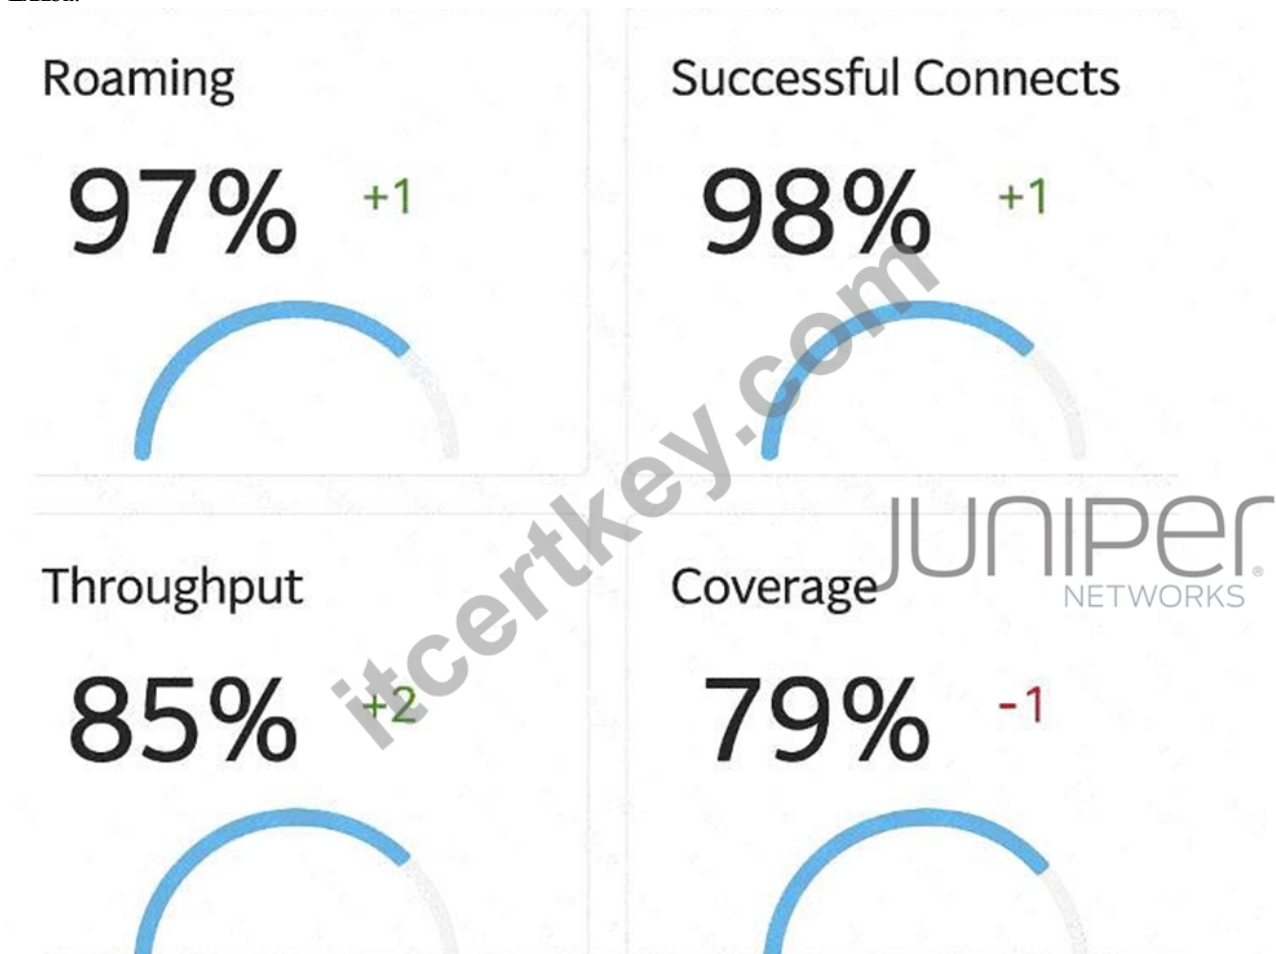

The feature that provides deep visibility into BGP operations for MX Series routers is Routing Assurance. According to official Juniper documentation: "Juniper Mist Routing Assurance provides insights about... routing, including routing events, routing protocol states, peer status analysis, routes, and more" for supported routers such as Juniper MX and ACX series. Routing Assurance extends Mist AI observability and analytics into the routing fabric, offering real-time visibility and telemetry for BGP peering session health, routing tables, events, path changes, and other core routing metrics. This empowers network operators with actionable insights and root cause analysis capabilities to maintain optimal WAN and core routing performance from the Mist cloud. Wired Assurance focuses on switch and port health and is not designed for routing protocol visibility.

NEW QUESTION # 52

Exhibit:

Referring to the exhibit, which SLE would an administrator investigate to troubleshoot weak signal issues?

- A. Roaming
- **B. Coverage**
- C. Successful Connects
- D. Throughput

Answer: B

Explanation:

In Juniper Mist Wireless Assurance, Service Level Expectations (SLEs) are key metrics that measure different aspects of the end-user experience. Each SLE focuses on a distinct area of network performance such as Connection, Roaming, Throughput, and Coverage. The Coverage SLE specifically measures whether wireless clients are receiving adequate signal strength (RSSI) and signal quality (SNR) from access points. According to the Juniper Mist AI Operations and SLE Analytics Guide, this metric is defined as: "The Coverage SLE quantifies the percentage of client sessions that meet the required signal strength and quality thresholds. Low coverage indicates areas with weak or inconsistent RF signal levels." When users experience weak signal or dead zones, the Coverage SLE provides insight into where and why these issues occur. Mist AI identifies sub-classifiers such as Signal Quality, Wi-

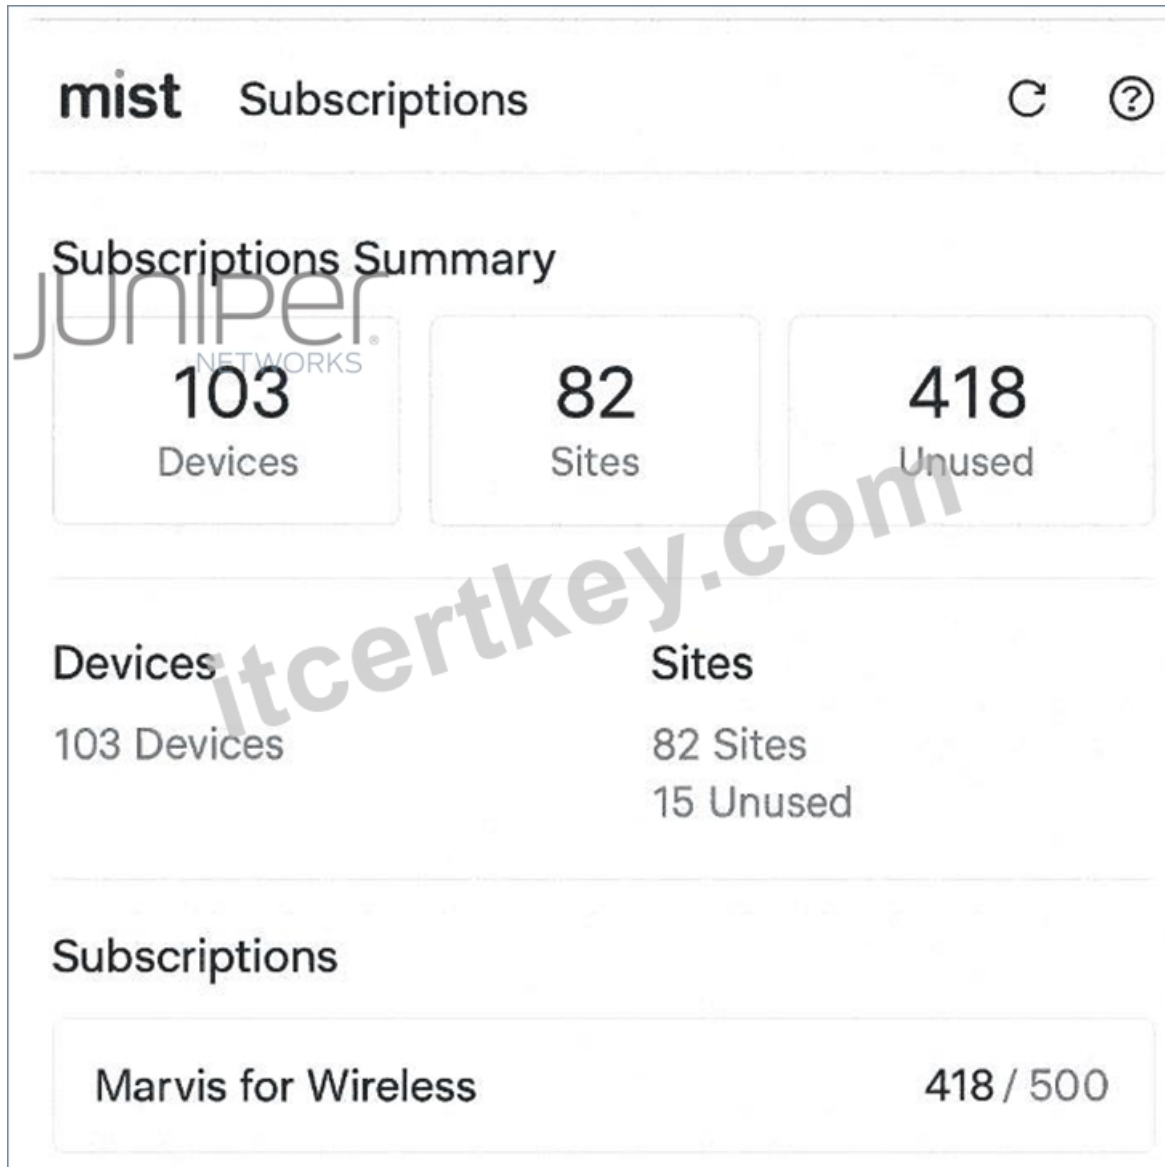

Fi Interference, or Airtime Utilization, allowing administrators to isolate the cause of poor signal conditions.

Therefore, in the exhibit shown, an administrator would investigate the Coverage SLE (79%), as it directly relates to signal weakness or RF coverage problems.

NEW QUESTION # 53

Exhibit:

Referring to the exhibit, how many sites have unused Marvis for Wireless subscriptions?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In the Juniper Mist Cloud, the Subscriptions page provides administrators with detailed information about the status of service licenses and subscriptions associated with devices, sites, and organizations. This includes visibility into the number of active devices, sites, and any unused subscriptions across the organization.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the "Sites" section under Subscriptions Summary shows:

"The total number of configured sites within the organization and the number of sites that currently do not have assigned subscriptions." In the exhibit, the summary shows:

* 82 Sitestotal

* 15 Unusedsites

This indicates that 15 sites currently have no active or assigned Marvis for Wireless subscriptions. The

"Unused" label under Sites refers specifically to the count of sites not yet utilizing their allocated subscription entitlements.

Therefore, the correct answer is B. 15.
