AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100

When resource leveling craft labor for a critical path schedule, the scheduler

- A. Need only consider the non-union crafts persons.
- B. Can depend on the results of the resource leveling operation to reflect a useful realignment of all schedule activities without 'further analysis.
- C. Must consider breaks in continuity of work for subcontractors, thereby possibly incurring additional subcontractor mobilization and demobilization costs.
- D. Need not consider its effects, as it is a theoretical concept with limited application to construction projects.

Answer: C

Explanation:

* Resource Leveling:

Resource leveling adjusts start and finish dates of activities to resolve resource conflicts or constraints, balancing availability and demand.

In construction projects, breaks in continuity of work for subcontractors can result in increased costs due to remobilization and demobilization.

* PSP Study Guide Reference:

The PSP guide explains that resource leveling must be carefully analyzed to avoid disruptions in work continuity.

* Conclusion: The correct answer is A, as the scheduler must account for potential cost implications of resource leveling on subcontractors.

- A. EF.11001.
- B. LS.11001 + 25 days.
- C. 02-19-04.
- D. EF.11001 + 1 day.

Answer: D

Explanation:

* Late Finish (LF) Transition Rule:

Late finish (LF) is calculated by adding one day to the early finish (EF) of the final activity.

EF of Activity 11001 is given, and the late finish is simply EF+1 EF + 1 EF+1.

* Cross-Verification with PSP Guidelines:

PSP methodologies state that late finish is derived from the forward pass using early finish logic, with specific adjustments based on activity relationships (Ref: PSP Study Guide, Chapter 2A: Forward and Backward Pass Calculations).
