Verified Palo Alto Networks NGFW-Engineer PDF Cram Exam With Interarctive Test Engine & Efficient NGFW-Engineer Latest Study Materials

BTW, DOWNLOAD part of VerifiedDumps NGFW-Engineer dumps from Cloud Storage: https://drive.google.com/open?id=1NAYygiGRrfrdJEIVEy5Fn4zOJWJQ7xit

simulation tests of our NGFW-Engineer learning materials have the functions of timing and mocking exams, which will allow you to adapt to the exam environment in advance and it will be of great benefit for subsequent exams. After you complete the learning task, the system of our NGFW-Engineer test prep will generate statistical reports based on your performance so that you can identify your weaknesses and conduct targeted training and develop your own learning plan. For the complex part of our NGFW-Engineer Exam Question, you may be too cumbersome, but our system has explained and analyzed this according to the actual situation to eliminate your doubts and make you learn better.

Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings. |

| Topic 2 | Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA- Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics. |
|---------|---|
| Topic 3 | PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active active and active passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPSec, quantum-resistant cryptography, and GRE tunnels. |

NGFW-Engineer Latest Study Materials & Latest NGFW-Engineer Exam Book

Our NGFW-Engineer exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the NGFW-Engineer quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. Our NGFW-Engineer test prep take full account of your problems and provide you with reliable services and help you learn and improve your ability and solve your problems effectively. Once you choose our NGFW-Engineer Quiz guide, you have chosen the path to success. We are confident and able to help you realize your dream. A higher social status and higher wages will not be illusory. I will introduce you to the advantages of our NGFW-Engineer exam torrent.

Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q24-Q29):

NEW QUESTION #24

What are the phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution?

- A. Profiling, Policy Generation, Enforcement, Reporting
- B. Scanning, Isolation, Whitelisting, Logging
- C. Policy Generation, Discovery, Enforcement, Logging
- D. Discovery, Deployment, Detection, Prevention

Answer: D

Explanation:

The phases of the Palo Alto Networks AI Runtime Security: Network Intercept solution are designed to help identify and protect against potential threats in real time by using AI to detect and prevent malicious activities within the network.

Discovery: Identifying applications, services, and behaviors within the network to understand baseline activity.

Deployment: Implementing the solution into the network and integrating with existing security measures.

Detection: Monitoring traffic and activities to identify abnormal or malicious behavior.

Prevention: Taking action to stop threats once detected, such as blocking malicious traffic or stopping exploit attempts.

NEW QUESTION #25

Which statement applies to the relationship between Panorama-pushed Security policy and local firewall Security policy?

- A. The order of policy evaluation can be configured differently in different device groups.
- B. Panorama post-rules can be configured to be evaluated before local firewall policy for the purpose of troubleshooting.
- C. When a policy match is found in a local firewall policy, if any Panorama shared post-rule is configured, it will still be evaluated.

• D. Local firewall rules are evaluated after Panorama pre-rules and before Panorama post-rules.

Answer: D

Explanation:

Local firewall rules are evaluated after Panorama pre-rules (those applied before the firewall's local policies) and before Panorama post-rules (those applied after the firewall's local policies). This ensures that the local firewall rules do not override the central Panorama policy and are only applied in the appropriate order within the policy evaluation sequence.

NEW OUESTION #26

Which PAN-OS method of mapping users to IP addresses is the most reliable?

- A. Syslog
- B. Server monitoring
- C. GlobalProtect
- D. Port mapping

Answer: B

Explanation:

Server monitoring is the most reliable method for mapping users to IP addresses in PAN-OS. This method allows the firewall to monitor specific servers, such as Microsoft Active Directory (AD) or LDAP servers, to dynamically retrieve and update user-to-IP mappings. It provides a more accurate and up-to-date mapping of users to their associated IP addresses, as it directly queries user databases in real time.

NEW QUESTION #27

What must be configured before a firewall administrator can define policy rules based on users and groups?

- A. Authentication profile
- B. Group mapping settings
- C. User Mapping profile
- D. LDAP Server profile

Answer: B

Explanation:

Before a firewall administrator can define policy rules based on users and groups, the Group Mapping settings must be configured. These settings enable the firewall to map users to their respective Active Directory (AD) groups. This mapping allows the firewall to use user and group information to create policy rules based on group membership.

NEW QUESTION #28

After an engineer configures an IPSec tunnel with a Cisco ASA, the Palo Alto Networks firewall generates system messages reporting the tunnel is failing to establish.

Which of the following actions will resolve this issue?

- A. Validate the tunnel interface VLAN against the peer's configuration.
- B. Configure the Proxy IDs to match the Cisco ASA configuration.
- C. Check that IPSec is enabled in the management profile on the external interface.
- D. Ensure that an active static or dynamic route exists for the VPN peer with next hop as the tunnel interface.

Answer: B

Explanation:

The Proxy IDs (or Traffic Selectors) define the local and remote subnets that are allowed to communicate over the IPSec tunnel. If the Proxy IDs on the Palo Alto Networks firewall do not match the configuration on the Cisco ASA, the tunnel will fail to establish because the firewalls won't agree on which traffic to encrypt. Ensuring that the Proxy IDs match between the Palo Alto Networks firewall and the Cisco ASA will resolve the issue.

NEW QUESTION #29

....

We will free provide you part of the exercises of Palo Alto Networks Certification NGFW-Engineer Exam on the Internet to let you try to test our product's quality. After your trail you will find VerifiedDumps's exercises is the most comprehensive one and is what you want to.
