Exams-boost has made the Implementing and Configuring Cisco Identity Services Engine (300-715) exam dumps after consulting with professionals and getting positive feedback from customers. The team of Exams-boost has worked hard in making this product a successful Cisco 300-715 Study Material. So we guarantee that you will not face issues anymore in passing the Cisco 300-715 certification test with good grades.

What Is There in 300-715 Exam?

Such Cisco validation will assess how well a candidate understands the Cisco Identity Services Engine, including aspects such as Web Auth, policy enforcement, profiler, deployment, architecture, guest services, BYOD, device administration, network access, and endpoint compliance. When it comes to its details, 300-715 is of 90-minute duration and will feature numerous question-types such as fill in the blanks, simulation, and drag and drops. To sit for the Cisco 300-715 SISE test, candidates must register through Pearson VUE. This way, candidates can take the official exam at local testing centers or online with a proctor. The test is available globally in two languages, which are Japanese and English. As for prep, examinees can use the various study guides available online to prepare for the actual test, or they can sign up for Executing & Configuring Cisco Identity Services Engine (SISE)', the official training course offered by Cisco for 300-715.

Latest 300-715 Exam Discount & 300-715 Pdf Torrent

If you are on the bus, you can choose the APP version of 300-715 training engine. On one hand, after being used for the first time in a network environment, you can use it in any environment. The APP version of 300-715 Study Materials can save you traffic. And on the other hand, the APP version of 300-715 exam questions can be applied to all kinds of electronic devices, so that you can practice on the IPAD or phone.

To pass the Cisco 300-715 Certification Exam, candidates must have a deep understanding of the ISE architecture and features, as well as the ability to deploy and configure ISE solutions. Additionally, candidates must be able to troubleshoot ISE issues and integrate ISE with other Cisco security technologies. With this certification, candidates will be well-equipped to take on critical roles in organizations that require strong network security expertise.

Cisco 300-715 certification is highly valued in the IT industry, as it demonstrates that the candidate has the skills and knowledge required to implement and manage Cisco ISE solutions. Implementing and Configuring Cisco Identity Services Engine certification is recognized globally and is a valuable asset for IT professionals who want to advance their careers in network security. Moreover,

the certification provides a competitive edge over others in the job market and opens up various job opportunities.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q112-Q117):

NEW QUESTION # 112

An engineer is deploying Cisco ISE to use 802.1X authentication for controlling access to the company's wired network. The request from company management is to minimize the impact on users during the rollout of 802.1X on the company switches. Which mode must be used first in a phased 802.1X deployment to fulfill this request?

- **A. Monitor**
- B. Low-impact
- C. Open
- D. Closed

Answer: A

NEW QUESTION # 113

A network administrator is configuring authorization policies on Cisco ISE. There is a requirement to use AD group assignments to control access to network resources. After a recent power failure and Cisco ISE rebooting itself, the AD group assignments no longer work. What is the cause of this issue?

- A. The network devices ports are shut down.
- B. The AD DNS response is slow.
- C. The certificate checks are not being conducted.
- **D. The AD join point is no longer connected.**

Answer: D

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/ise/2-3/ise_active_directory_integration/b_ISE_AD_integration_2x.html#ID612

NEW QUESTION # 114

Which two methods should a sponsor select to create bulk guest accounts from the sponsor portal? (Choose two.)

- **A. Random**
- B. Imported
- **C. Known**
- D. Daily
- E. Monthly

Answer: A,C

Explanation:

Section: Web Auth and Guest Services

Explanation/Reference: https://www.cisco.com/c/en/us/td/docs/security/ise/1-3/sponsor_guide/b_spons_SponsorPortalUserGuide_13/b_spons_SponsorPortalUserGuide_13_chapter_01.html

NEW QUESTION # 115

An organization has a fully distributed Cisco ISE deployment. When implementing probes, an administrator must scan for unknown endpoints to learn the IP-to-MAC address bindings. The scan is complete on one FPSN, but the information is not available on the others.

What must be done to make the information available?

- **A. Scanning must be initiated from the PSN that last authenticated the endpoint**
- B. Cisco ISE must be configured to learn the IP-MAC binding of unknown endpoints via RADIUS authentication, not via scanning

- C. Cisco ISE must learn the IP-MAC binding of unknown endpoints via DHCP profiling, not via scanning
- D. Scanning must be initiated from the MNT node to centrally gather the information

Answer: A

Explanation:

Given below is additional information related to the manual NMAP scan results:

- To detect unknown endpoints, NMAP should be able to learn the IP/MAC binding via NMAP or a supporting SNMP scan.
- ISE learns IP/MAC binding of known endpoints via Radius authentication or DHCP profiling.
- The IP/MAC bindings are not replicated across PSN nodes in a deployment. Therefore, you must trigger the manual scan from the PSN, which has the IP/MAC binding in its local database (for example, the PSN against which a mac address was last authenticated with).
- The NMAP scan results do not display any information related to an endpoint that NMAP had previously scanned, manually or automatically.

NEW QUESTION # 116

When setting up profiling in an environment using Cisco ISE for network access control, an organization must use non-proprietary protocols for collecting the information at layer 2.

Which two probes will provide this information without forwarding SPAN packets to Cisco ISE?

(Choose two.)

- A. DHCP SPAN probe
- B. NetFlow probe
- C. SNMP query probe
- D. DNS probe
- E. RADIUS probe

Answer: C,E
