QUESTION 81

The compliance team is requesting a Veeam engineer complete the following tasks on the backup environment:

1. All image-level backups are to be tested and validated
2. Recovery verification with a well-known malware scan
3. Send an email to the Veeam engineer with test results

What is the recovery verification function to meet this requirement?

- A. On-Demand Sandbox
- B. SureBackup
- C. Quick Migration
- D. SureReplica

Answer: B

Explanation:

SureBackup is the Veeam technology that allows you to verify the recoverability of backups. It can automatically verify the integrity of the backup, test it for malware (with the aid of third-party antivirus software), and send email notifications upon the completion of the job. This is accomplished by running the backups in an isolated environment called a Virtual Lab, without making any changes to the actual production environment. By using SureBackup, Veeam engineers can ensure that image-level backups are recoverable, can be verified against malware, and can report the results via email, thus meeting the compliance team's requests.

QUESTION 82

An engineer sets up a backup job with direct backup to the AWS S3. The retention of the job is set to 31 days and the immutable period is set to 31 days. However, one full backup data is not removed automatically after 60 days. Which option could be the reason for this?

- A. The backup job is disabled accidentally.
- B. The backup data is encrypted.
- C. It is an active full backup, not synthetic full.
- D. A retention exception is enabled for the restore point.

Answer: C

Explanation:

In active full backups, the entire dataset is backed up each time the backup job runs, whereas in synthetic full backups, only the changes since the last full backup are backed up. If the engineer configured the backup job to run active full backups instead of synthetic full backups, it's possible that the data from the full backup taken 60 days ago is still being retained as part of the regular backup process. Therefore, it hasn't been removed automatically after 60 days as expected.

QUESTION 83

An engineer is configuring Veeam Backup and Replication for an organization to protect a VMware environment using

Um in der IT-Branche große Fortschritte zu machen, entscheiden sich viele ambitionierte IT-Profis dafür, die Veeam VMCE_v12 Zertifizierungsprüfung abzulegen und somit das IT-Zertifikat zu bekommen. Wegen des schwierigkeitsgrades der Veeam VMCE_v12 Zertifizierungsprüfung ist die Erfolgsquote sehr niedrig. Aber es ist doch eine weise Wahl, an der Veeam VMCE_v12 Zertifizierungsprüfung teilzunehmen, denn in der heutigen konkurrenzfähigen IT-Branche muss man sich immer noch verbessern. Und Sie können auch viele Methoden wählen, die Ihnen beim Bestehen der Prüfung helfen.

Veeam VMCE_v12 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Thema 2	Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.

Thema 3	Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Thema 4	Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Thema 5	Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Thema 6	Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Thema 7	Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Thema 8	Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Thema 9	Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Thema 10	Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Thema 11	Data protection strategies: This section of the exam covers an overview of data protection strategies.
Thema 12	Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Thema 13	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Thema 14	Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.

VMCE_v12 Schulungsangebot, VMCE_v12 Examsfragen

Leute aus verschiedenen Bereichen bemühen sich um ihre Zukunft. Bemühen Sie sich auch um Erhöhung Ihrer Fähigkeit? Haben Sie das Veeam VMCE_v12 Zertifikat? Wie viel wissen Sie über Veeam VMCE_v12 Zertifizierungsprüfung? Was sollen Sie machen, wenn Sie nicht genug Kenntnisse zur VMCE_v12 Prüfung beherrschen? Machen Sie sich keine Sorge. Zertpruefung kann Ihnen Hilfe bieten.

Veeam Certified Engineer v12 VMCE_v12 Prüfungsfragen mit Lösungen (Q72-Q77):

72. Frage

Veeam Agent for Linux has been installed in standalone mode on a Linux physical server.

The backup job is configured to write to a Veeam repository.

Which of the following media types is available as a recovery media?

- A. ISO image
- B. Object storage
- C. Tape
- D. Veeam Backup & Replication repository

Antwort: A

73. Frage

You want to deploy an On-Demand Sandbox. While creating the application group, which sources can be used to add virtual machines to the Application Group? (Choose three.)

- A. Replica on Cloud Connect VMware vSphere host
- **B. Backup on Backup Repository**
- **C. Replica on non-Cloud Connect VMware vSphere host**
- D. Backup in Cloud Repository
- E. Backup Copy in Backup repository
- **F. Storage Snapshot**

Antwort: B,C,F

74. Frage

Which of the following should be considered when estimating the amount of disk space necessary to store backups? Choose two options.

- **A. Retention period for backups**
- B. Type of disk (thick or thin)
- C. RAID configuration of the Backup Repository
- D. Veeam Backup & Replication edition
- E. Hypervisor and host version
- **F. Total size of used data for the VMs being backed up**

Antwort: A,F

75. Frage

For Veeam agent backup jobs, what feature is only available with Veeam Agent for Microsoft Windows?

- A. Application-aware processing of
- **B. Backup from storage snapshots**
- C. File-level backup
- D. Volume backup

Antwort: B

Begründung:

You can use Veeam Backup & Replication and Veeam Agent for Microsoft Windows operating in the managed mode (within the Veeam Agent management scenario) to create backups from native storage snapshots.

Native storage snapshots allow the following:

Veeam Backup & Replication to use backup proxy servers to process storage systems.

Veeam Agent to use hardware Volume Shadow Copy Service (VSS) provider and capabilities of native snapshots that are created on production storage systems to create backups.

https://helpcenter.veeam.com/docs/backup/agents/storage_systems.html?ver=120

76. Frage

Which of the following statements regarding bottleneck statistics is true?

- A. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target/None
- **B. The percentages displayed will always add up to 100% in total.**
- C. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target
- D. The bottleneck statistics are only displayed when you have a problem in your backup infrastructure.

Antwort: B

77. Frage
