Nowadays the competition in the society is fiercer and if you don't have a specialty you can't occupy an advantageous position in the competition and may be weeded out. Passing the Veeam Certified Engineer v12 test certification can help you be competent in some area and gain the competition advantages in the labor market. If you buy our VMCE_v12 Study Materials you will pass the test smoothly. With a high pass rate as 98% to 100%, you will know that our VMCE_v12 practice engine can provide you with the best pass percentage.

Our company has authoritative experts and experienced team in related industry. To give the customer the best service, all of our company's VMCE_v12 learning materials are designed by experienced experts from various field, so our VMCE_v12 Learning materials will help to better absorb the test sites. One of the great advantages of buying our product is that can help you master the core knowledge in the shortest time. At the same time, our VMCE_v12 learning materials discard the most traditional rote memorization methods and impart the key points of the qualifying exam in a way that best suits the user's learning interests, this is the highest level of experience that our most authoritative think tank brings to our VMCE_v12 Learning Materials users. Believe that there is such a powerful expert help, our users will be able to successfully pass the qualification test to obtain the qualification certificate.

Reliable VMCE_v12 Study Materials - VMCE_v12 Exam Objectives Pdf

According to the survey, the average pass rate of our candidates has reached 99%. High passing rate must be the key factor for choosing, which is also one of the advantages of our VMCE_v12 real study dumps. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the VMCE_v12 prep guide in 5-10 minutes, so you can get our VMCE_v12 Exam Questions at first time. And then you can start your study after downloading the VMCE_v12 exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our VMCE_v12 real study dumps we guarantee that you won't be regret of your decision.

Veeam Certified Engineer v12 Sample Questions (Q41-Q46):

NEW QUESTION # 41

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup & Replication servers. The administrator needs to check the remaining capacity on each of the backup repository servers. Where can they see this information?

- A. Under Infrastructure View, look up the Veeam Backup & Replication servers to see the guest disk space.
- B. Under Business View, look up the backup repository servers to see the remaining capacity.
- **C. Under Data Protection View, look up the backup repository servers to see the remaining capacity**
- D. Under Infrastructure View, look up the backup repository servers to see the guest disk space.

Answer: C

Explanation:

In Veeam ONE, the remaining capacity of each backup repository server can be viewed under the Data Protection View. This

section provides detailed information about the storage utilization and remaining capacity of backup repositories, allowing administrators to effectively monitor and manage storage resources.

NEW QUESTION # 42

Veeam ONE has been installed and configured. The administrator needs to monitor the VMware datastore capacity. Where can this information be found?

- A. Under Infrastructure View, select the Datastores group and view the disk space.
- B. Under Infrastructure View, select all VMs to calculate the remaining datastore disk space.
- C. Under Business View, select VMs to see the total amount of used disk space.
- D. Under Business View, select Hosts to see each datastore and its disk space.

Answer: A

Explanation:

Veeam ONE is a monitoring and reporting tool for Veeam Backup & Replication, as well as virtual environments like VMware vSphere and Microsoft Hyper-V. In Veeam ONE, you can monitor the capacity of VMware datastores by using the "Infrastructure View". Within this view, there is a specific group for "Datastores" which provides comprehensive information, including the capacity and free space available on each datastore. This feature is designed to help administrators manage storage effectively and ensure they are alerted before reaching critical capacity limits.

The "Infrastructure View" provides a more direct and focused way to monitor resources like datastores compared to "Business View", which is typically used for categorizing and viewing the infrastructure based on business needs, rather than direct resource monitoring.

NEW QUESTION # 43

An administrator needs to dynamically add VMware VMs that have a custom application installed to a backup job. How can this job be created?

- A. In Enterprise Manager, create a dynamic group of VMs that contain both tags.
- B. Create a backup job based on vSphere tags.
- C. Use the RESTful API to scan the VM inventory for machines that match the criteria.
- D. Modify a custom CSV file to be scanned before the start of each job.

Answer: B

Explanation:

To dynamically include VMware VMs with a custom application installed in a backup job, the most efficient approach is C: Create a backup job based on vSphere tags. VMware vSphere tagging allows administrators to assign metadata to VMs, making it easier to categorize and manage them according to various criteria, such as application type, department, or any custom criteria relevant to the organization. Veeam Backup & Replication can leverage these tags to dynamically include VMs in backup jobs. By setting up a backup job to include VMs tagged with a specific identifier related to the custom application, any VM tagged accordingly will be automatically included in the backup job. This approach simplifies management, ensures consistency, and allows for the flexible and dynamic grouping of VMs based on changing criteria without the need for manual adjustments to the backup job configuration.

NEW QUESTION # 44

An engineer needs to test the impact of operating system updates on app functionality in an isolated non-production environment. What Veeam Backup and Replication feature can be used to facilitate this?

- A. Replication
- B. Virtual Labs
- C. Instant Recovery
- D. Direct Storage Snapshots

Answer: B

Explanation:

Virtual Labs is the ideal feature for testing the impact of operating system updates in an isolated environment. Virtual Labs allow you to create a secure, isolated copy of your production environment where you can test updates, patches, and other changes without

affecting the live environment.

NEW QUESTION # 45

What happens if there are more than five unsuccessful attempts to enter the confirmation code during MFA login?

- A. The user is locked out for 24 hours.
- B. The user is permanently locked out.
- C. The user is locked out for 1 minute.
- D. The user is locked out for 1 hour.

Answer: C

Explanation:

If there are more than 5 unsuccessful attempts, the user can reopen the console and try to log in again after waiting for at least one minute. If the problem persists, the backup administrator can reset MFA by request.
