Topic 5	Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 6	Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 7	Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 8	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 9	Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 10	Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 11	Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 12	Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 13	Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 14	Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 15	Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 16	Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 17	Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.

Veeam Certified Engineer v12 Sample Questions (Q92-Q97):

NEW QUESTION # 92

For general data protection regulation (GDPR) compliance, Veeam can add a location tag to which component?

- A. Proxy server
- B. WAN accelerator
- C. File copy job
- **D. Scale-out Backup Repositories**

Answer: D

Explanation:

For GDPR compliance, Veeam provides the capability to add location tags to Scale-out Backup Repositories. Location tags in Veeam Backup & Replication are used to identify the location of data, which is essential for adhering to data sovereignty laws like GDPR. Location tagging helps ensure that data residency requirements are met by keeping data in a defined geographical area. In the context of GDPR, it's important to manage and control where personal data is stored and processed. Proxy servers, file copy jobs, and WAN accelerators do not have the functionality to be tagged for GDPR compliance in the same manner as repositories within Veeam Backup & Replication.

NEW QUESTION # 93

A customer currently has one backup job that runs every four hours to backup their VMs in a transaction consistent state. Which job configuration will keep all restore points safe in case the primary site and backups go down while still being able to do a point-in-time recovery of a SQL database from the backups on the second site?

- A. Configure a backup copy job in pruning mode and have it copy data every day, starting at midnight, to a repository on the second site
- **B. Configure a backup copy job in mirror mode, to a repository on the second site**
- C. Configure a backup copy job in pruning mode and schedule it to copy every four hours, starting at midnight, to a repository on the second site
- D. Configure a second VM backup job and schedule it to copy every four hours, starting at midnight, to a repository on the second site

Answer: B

Explanation:

NEW QUESTION # 94

Veeam ONE's _____ provides a single pane of glass view for all Veeam backup servers, proxies, and repositories in a backup infrastructure.

- A. Business View
- **B. Data Protection View**
- C. Infrastructure View
- D. System View

Answer: B

Explanation:

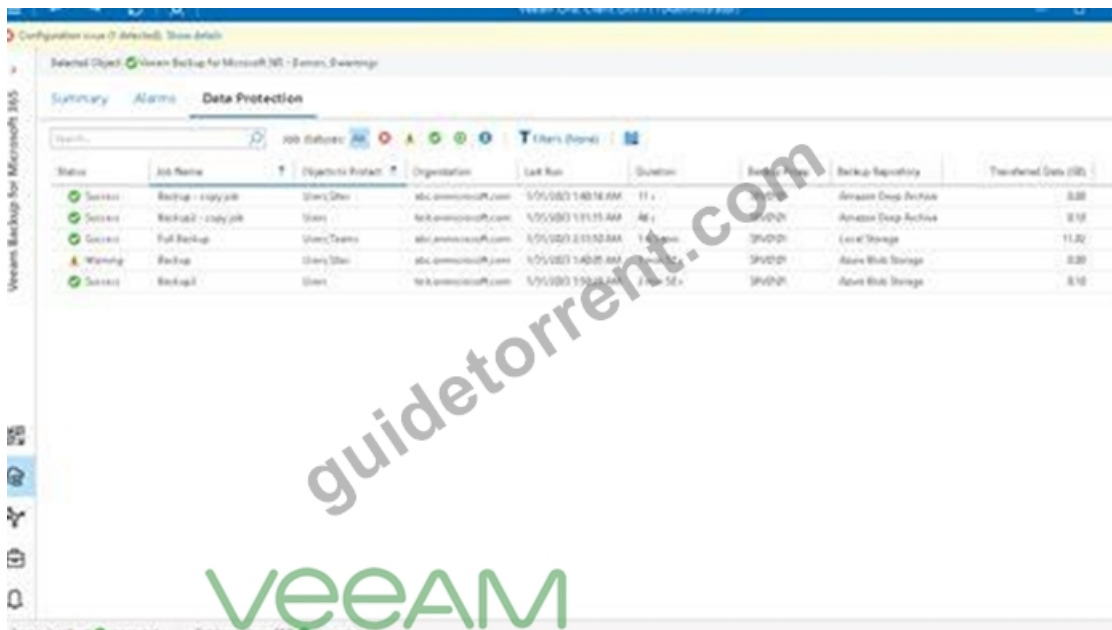

Explanation

https://helpcenter.veeam.com/docs/one/qsg/data_protection.html?ver=120

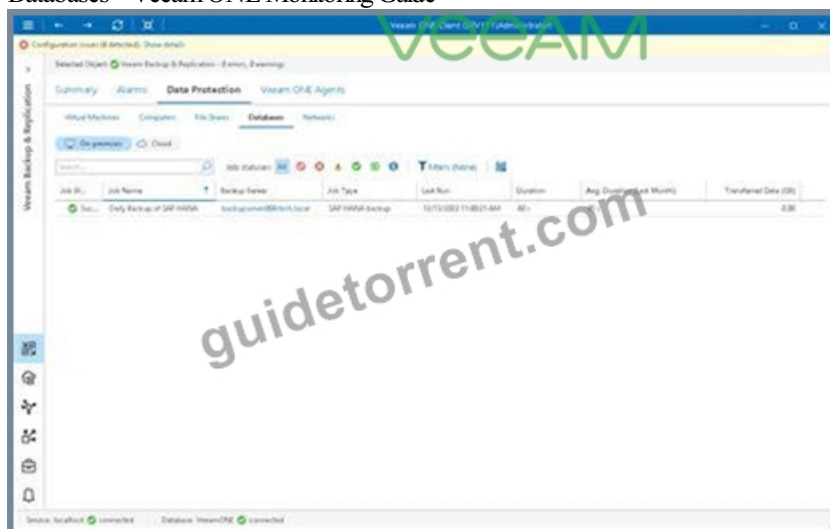

Veeam ONE's Data Protection View provides a single pane of glass view for all Veeam backup servers, proxies, and repositories in a backup infrastructure. This view allows you to monitor the overall state of the backup infrastructure, check the summary dashboards, view triggered alarms, check the latest job status, work with performance charts, and view the list of events¹. The Data Protection View also includes information about Veeam Backup for Microsoft 365 jobs and protected data². References:

NEW QUESTION # 95

An engineer has 3 Veeam Backup servers in 3 different data centers. The engineer needs a way to have centralized licensing and role-based access control. How should the engineer accomplish this with the least effort?

- A. Use the Veeam Web Portal
- B. Install the Remote console on a different client
- C. Create a web portal using REST API
- D. Deploy the Enterprise Manager

Answer: D

Explanation:

Veeam Enterprise Manager provides centralized management for Veeam Backup & Replication environments. It enables the administrator to manage licensing and role-based access control across multiple Veeam Backup servers in different locations, offering a unified control panel with minimal effort compared to other options that would require more complex setups or custom development work.

NEW QUESTION # 96

Which of the following are valid restore options for Microsoft Exchange server email items when using the Veeam Explorer for Microsoft Exchange? (Choose 2)

- A. Save as a .pst file
- B. Save attachment as file
- C. Save message as text file
- D. Save as an .msg file
- E. Save as a .zip file

Answer: A,D

NEW QUESTION # 97

.....
