Wenn Sie Pass4Test wählen, steht der Erfolg schon vor der Tür. Und bald können Sie Veeam VMCE_v12 Zertifikat bekommen. Das Produkt von Pass4Test bietet Ihnen 100%-Pass-Garantie und auch einen kostenlosen einjährigen Update-Service.

Veeam VMCE_v12 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Thema 2	Data protection strategies: This section of the exam covers an overview of data protection strategies.
Thema 3	Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Thema 4	Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Thema 5	Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Thema 6	Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Thema 7	Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Thema 8	Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Thema 9	Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Thema 10	Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.

Thema 11	Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Thema 12	Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Thema 13	Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Thema 14	Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Thema 15	Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.

VMCE_v12 echter Test & VMCE_v12 sicherlich-zu-bestehen & VMCE_v12 Testguide

Falls Sie nicht wissen, wie die Veeam VMCE_v12 Prüfungen hocheffektiv zu bestehen, können Sie eine gute Online-Bildung auswählen, sehr effektiv diese Veeam VMCE_v12 Zertifizierungsprüfungen zu bestehen. Wir Pass4Test bemühen uns um Prüfungsteilnehmer originale Zertifizierungsunterlagen anzubieten und Die Dumps zur Veeam VMCE_v12 Zertifizierungsprüfung von Pass4Test sind die Produkte, die von Lieferanten Genehmigungen bekommen und vielfältige Inhalte abdecken. Damit können Sie viel Zeit und Energie sparen. Und es kann Ihnen gewährleisten, einmal Erfolg zu machen. Ansonst geben wir Ihnen voll Geld zurück.

Veeam Certified Engineer v12 VMCE_v12 Prüfungsfragen mit Lösungen (Q16-Q21):

16. Frage

You fail back a VM replica to the original location. Which of the following requirements needs to be met to be able perform quick rollback during a failback of a replica?

- A. The VM replica must be created with the "Use Changed Block Tracking data" option enabled
- B. The VM replica must have access to the repository where the full backup of the VM resides
- C. Perform failback to VM within the same subnet
- D. Indexing must be enabled for the original VM

Antwort: A

Begründung:

Reference: https://helpcenter.veeam.com/docs/backup/vsphere/failback_quick_rollback.html?ver=100

17. Frage

The administrator of a VMware environment backed up by Veeam Backup & Replication has a critical server that has crashed and will not reboot. They were able to bring it back online quickly using Instant VM Recovery so people could continue to work. What else is required to complete the recovery?

- A. Commit failover
- B. Migrate to production
- C. Merge delta file
- D. Commit tailback

Antwort: B

Begründung:

After using Instant VM Recovery to bring a critical crashed server back online quickly, the final step required to complete the recovery process is A: Migrate to production. Instant VM Recovery allows a VM to run directly from the backup file in a temporary location, enabling rapid recovery and minimal downtime. However, because the VM is running in this provisional state, it's essential to migrate it back to the production environment to ensure long-term stability and performance. The "Migrate to production" operation involves moving the running VM from the backup storage to the production storage, typically involving a storage vMotion in VMware environments or a similar process in other hypervisors. This step ensures that the VM is fully restored to its original or a new production environment, solidifying the recovery and allowing the VM to operate as part of the normal infrastructure once again.

18. Frage

What can Veeam service providers deploy in Service Provider Console 7.0?

- A. Veeam Backup for Microsoft 365
- B. Veeam Backup & Replication
- C. Veeam One
- D. Enterprise plugins

Antwort: A

Begründung:

In the Service Provider Console 7.0, Veeam service providers can deploy Veeam Backup for Microsoft 365.

This allows them to offer Microsoft 365 backup and recovery services to their customers, managing the protection of Microsoft 365 data including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams data. References:

* Veeam Service Provider Console Documentation: Backup for Microsoft 365

19. Frage

A Veeam administrator is creating a protection group that needs to back up all servers for the accounting department using Veeam Agent for Microsoft Windows. New accounting servers must be automatically added to the protection group. How is this accomplished?

- A. Install a configuration file on each of the accounting servers that adds it to the protection group.
- B. Create an Active Directory based protection group targeted at an Active Directory security group.
- C. Create a protection group that reads a CSV file listing the accounting servers.
- D. Create a protection group and set it to automatically scan every three hours for new servers.

Antwort: B

Begründung:

To ensure that all servers for the accounting department are backed up and any new servers added to the department are automatically included in the protection group, the best approach is to use an Active Directory (AD) based protection group. Therefore, the correct answer is A:

Create an Active Directory based protection group targeted at an Active Directory security group.

By leveraging an AD-based protection group, the Veeam administrator can specify an AD security group that encompasses all user accounts or computer accounts (in this case, servers) associated with the accounting department. As new servers are introduced and added to this AD security group, Veeam Backup & Replication will automatically detect these new members during its periodic rescan (which can be scheduled as per the administrator's preferences) and include them in the protection group. This method not only automates the inclusion of new servers into the backup routine but also simplifies the management of backup policies for dynamically changing environments such as the accounting department's server infrastructure.

20. Frage

Which of the following options describe the Veeam Data Mover Service function most accurately? Choose two options.

- A. Copies VM files
- B. Reduces load on the network and helps speed up restores
- C. Performs data compression, deduplication and data transfer
- D. Analyzes the system and installs and upgrades necessary components and services, depending on the role selected for the server

Antwort: A,C

21. Frage
