When preparing for the test AWS-Solutions-Associate certification, most clients choose our products because our AWS-Solutions-Associate learning file enjoys high reputation and boost high passing rate. Our products are the masterpiece of our company and designed especially for the certification. Our AWS-Solutions-Associate latest study question has gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and place great hopes on our AWS-Solutions-Associate Exam Dump. They treat our products as the first choice and the total amounts of the clients and the sales volume of our AWS-Solutions-Associate learning file is constantly increasing.

If you buy our AWS-Solutions-Associate exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our AWS-Solutions-Associate practice materials. We can promise that we will provide you with quality products, reasonable price and professional after sale service on our AWS-Solutions-Associate learning guide.

Amazon AWS-Solutions-Associate Exam | AWS-Solutions-Associate Real Braindumps - Purchasing AWS-Solutions-Associate Latest Study Questions Safely and Easily

Our AWS-Solutions-Associate exam questions have a 99% pass rate. What does this mean? As long as you purchase our AWS-Solutions-Associate exam simulating and you are able to persist in your studies, you can basically pass the exam. This passing rate is not what we say out of thin air. This is the value we obtained from analyzing all the users' exam results. It can be said that choosing AWS-Solutions-Associate study engine is your first step to pass the exam. Don't hesitate, just buy our AWS-Solutions-Associate practice engine and you will succeed easily!

Amazon AWS Certified Solutions Architect - Associate (SAA-C02) Sample Questions (Q88-Q93):

NEW QUESTION # 88

A medical company wants to perform transformations on a large amount of clinical trial data that comes from several customers. The company must extract the data from a relational database that contains the customer data. Then the company will transform the data by using a series of complex rules. The company will load the data to Amazon S3 when the transformations are complete.

All data must be encrypted where it is processed before the company stores the data in Amazon S3. All data must be encrypted by using customer-specific keys.

Which solution will meet these requirements with the LEAST amount of operational effort?

- A. Create one Amazon EMR cluster for each customer. Attach a security configuration to each cluster that uses server-side encryption with AWS KMS keys (SSE-KMS) to encrypt the data.
- B. Create one Amazon EMR cluster for each customer. Attach a security configuration to each cluster that uses client-side encryption with a custom client-side root key (CSE-Custom) to encrypt the data.
- C. Create one AWS Glue job for each customer. Attach a security configuration to each job that uses server-side encryption with Amazon S3 managed keys (SSE-S3) to encrypt the data.
- **D. Create one AWS Glue job for each customer. Attach a security configuration to each job that uses client-side encryption with AWS KMS managed keys (CSE-KMS) to encrypt the data.**

Answer: D

Explanation:

AWS Glue jobs are designed for extract, transform, and load (ETL) operations, which are perfect for transforming clinical trial data. AWS Glue integrates with AWS Key Management Service (KMS), allowing for customer-specific encryption keys, fulfilling the encryption requirement with minimal operational effort.

Client-side encryption with AWS KMS ensures that the data is encrypted before it is sent to S3, aligning with the security needs specified in the scenario.

Key aspects:

AWS Glue: This managed ETL service simplifies data transformation, reduces operational overhead, and integrates seamlessly with KMS.

CSE-KMS: Client-side encryption with KMS ensures that the data is encrypted with customer-specific keys before it is processed or stored in S3, offering robust security.

Minimal Operational Overhead: Compared to managing an EMR cluster, AWS Glue automates much of the process, making it a lower-effort solution.

AWS Documentation: According to the AWS Well-Architected Framework, encryption with AWS KMS offers strong security controls that meet the needs of industries requiring high levels of confidentiality.

NEW QUESTION # 89

If I want to run a database in an Amazon instance, which is the most recommended Amazon storage option?

- A. Amazon S3
- **B. Amazon EBS**
- C. You can't run a database inside an Amazon instance.
- D. Amazon Instance Storage

Answer: B

NEW QUESTION # 90

A company has a legal requirement to store point-in-time copies of its Amazon RDS PostgreSQL database instance in facilities that are at least 200 miles apart.

Use of which of the following provides the easiest way to comply with this requirement?

- A. Multiple Availability Zone snapshot copy
- B. Cross-region snapshot copy
- **C. Multiple Availability Zone read replica**
- D. Cross-region read replica

Answer: C

NEW QUESTION # 91

A company hosts a web application on multiple Amazon EC2 instances. The EC2 instances are in an Auto Scaling group that scales in response to user demand. The company wants to optimize cost savings without making a long-term commitment. Which EC2 instance purchasing option should a solutions architect recommend to meet these requirements?

- **A. Dedicated Instances only**
- B. A mix of On-Demand instances and Reserved instances
- C. A mix of On-Demand instances and Spot Instances
- D. On-Demand Instances only

Answer: A

NEW QUESTION # 92

A mobile application serves scientific articles from individual files in an Amazon S3 bucket. Articles older than 30 days are rarely read. Articles older than 60 days no longer need to be available through the application, but the application owner would like to keep them for historical purposes.

Which cost-effective solution BEST meets these requirements?

- A. Create a Lambda function to move files older than 30 days to Amazon EBS and move files older than 60 days to Amazon Glacier.
- **B. Create lifecycle rules to move files older than 30 days to Amazon S3 Standard Infrequent Access and move files older than 60 days to Amazon Glacier.**
- C. Create a Lambda function to move files older than 30 days to Amazon Glacier and move files older than 60 days to Amazon EBS.
- D. Create lifecycle rules to move files older than 30 days to Amazon Glacier and move files older than 60 days to Amazon S3 Standard Infrequent Access.

Answer: B
