Web-Based SAP C_CPI_2506 Practice Test - Compatible with All Major

Choose C_CPI_2506 premium files, you will pass for sure. Each questions & answers of C_CPI_2506 free training pdf are edited and summarized by our specialist with utmost care and professionalism. The SAP C_CPI_2506 latest online test is valid and really trustworthy for you to rely on. The highly relevant content & best valid and useful C_CPI_2506 Exam Torrent will give you more confidence and help you pass easily.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 3	• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C_CPI_2506 Exam Book & New C_CPI_2506 Exam Price

Passing the C_CPI_2506 exam rests squarely on the knowledge of exam questions and exam skills. Our C_CPI_2506 training quiz has bountiful content that can fulfill your aims at the same time. We know high efficient C_CPI_2506 practice materials play crucial roles in your review. Our experts also collect with the newest contents of C_CPI_2506 Study Guide and have been researching where the exam trend is heading and what it really want to examine you.

SAP Certified Associate - Integration Developer Sample Questions (Q52-Q57):

NEW QUESTION # 52
Which data store operation can you use to save a customer ID?

- A. GET
- B. POST
- C. WRITE
- D. SELECT

Answer: C

Explanation:
To save a customer ID in a data store, you can use the WRITE operation. The WRITE operation allows you to store a value in a data store entry with a specified key. You can use the WRITE operation to create or update a data store entry with a customer ID as the key and a value as the payload. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 53
You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. SFTP
- B. AMQP
- C. Mail
- D. OData

Answer: D

Explanation:
For a synchronous call to a remote HTTP API in an integration flow:
The OData adapter (or HTTP adapter) is used to perform synchronous request-reply communication with REST-based services.
AMQP # Messaging protocol, not synchronous.
SFTP # File-based transfer, asynchronous.
Mail # For SMTP/IMAP, not synchronous API calls.
Thus, the correct adapter for a synchronous remote API call is OData (or HTTP adapter, depending on configuration).

NEW QUESTION # 54
Using the Test Connectivity function, you want to test a connection to a backend system. The connection is provided by a Cloud Connector. Which parameter is required for the connection test?

- A. Connector ID
- B. Subaccount ID
- C. Host
- D. Location ID

Answer: D

Explanation:
To test a connection to a backend system that is provided by a Cloud Connector, you must specify the location ID as a parameter for the connection test. The location ID is a unique identifier that represents a Cloud Connector instance in a specific network location. It is used to route requests from SAP Integration Suite to the correct Cloud Connector instance and then to the backend system. You can find the location ID in the Cloud Connector administration UI under Configuration Location ID. Reference: Cloud Connector Connectivity Tests | SAP Help Portal, Cloud Connector Configuration | SAP Help Portal

NEW QUESTION # 55
Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Trace
- B. Debug
- C. Error
- D. Info

Answer: A

Explanation:
To examine the payload at specific processing steps in an integration flow, you must use the Trace log level. The Trace log level provides the most detailed information about the message processing, including the payload content and the headers at each step. You can use the Message Processing Log to view the trace logs for a specific message. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 56
What are API Management components?Note: There are 2 correct answers to this question.

- A. API Designer
- B. API Entity
- C. Authorization server
- D. Product

Answer: A,D

Explanation:
Key API Management components in SAP Integration Suite:
API Designer # Used to design APIs, import specifications (OpenAPI, RAML), and define metadata.
Product # Groups one or more APIs into a package that can be published to API Business Hub Enterprise.
Other options:
Authorization Server # Part of security infrastructure, not a direct API Management component.
API Entity # Not a defined component; the actual entities are API Proxies, Providers, and Products.
Thus, correct components are API Designer and Product.

NEW QUESTION # 57
......

Our C_CPI_2506 study prep has a pass rate of 98% to 100% because of the high test hit rate. So our C_CPI_2506 study materials are not only effective but also useful.
