

Web-Based Scrum Alliance CSM Practice Test

CSM - Certified SCRUM Master - Practice Test 2022 Questions and Answers with complete solution

By the end of a Sprint, the Product Increment must be "Potentially Release-able". Which answer best describes "Potentially Release-able" in this context?

- a) All PBIs for a release must be in the product increment before it can be released
- b) The increment is NOT "Potentially Release-able" until the Product Owner confirms it is
- c) By the end of the SPRINT, the increment must be in a usable condition and confirm to the team's Definition of DONE
- d) We must meet the minimum Viable Product specification before the increment is "Potentially Release-able" Answer- c) By the end of the SPRINT, the increment must be in a usable condition and confirm to the team's Definition of DONE

At what frequency should the Sprint Review occur during the Sprint?

- a) After each PBI reaches a "Potentially Release-able" state
- b) One time and at the end of the SPRINT
- c) After each Daily SCRUM
- d) Whenever the stakeholders have time Answer- b) One time and at the end of the SPRINT

How would you educate your organization on the reason why we want to limit our Dev Team size to 9 or below?

- a) Because the Scrum Guide says so
- b) Too many items would be in progress at a given time (eroding our WIP limits)
- c) The larger team size creates too much complexity and communication patterns for empiricism
- d) Too many people in meetings make the meeting go longer, thus is waste Answer- c) The larger team size creates too much complexity and communication patterns for empiricism

In Scrum, roles and responsibilities are provided and designed with tension built in between the roles. What is a significant responsibility of the Scrum Master?

- a) Encourage the team and organization to experiment with new ways of working

Scrum Alliance CSM Instant Download & Dumps CSM Vce

We provide 24-hour online service for all customers who have purchased CSM test guide. You can send us an email to ask questions at anytime, anywhere. For any questions you may have during the use of CSM exam questions, our customer service staff

will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, CSM Torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, CSM test guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.

Scrum Alliance Certified ScrumMaster Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

What is the purpose of the Sprint Retrospective?

- A. Plan the incomplete work for the next Sprint and submit reasons to the Product Owner
- B. Explain what Backlog items have been done and what has not been done
- C. Identify Developers who did not perform well in the Sprint
- **D. Inspect how the last Sprint went with regards to individuals, interactions, processes, tools and Definition of Done**

Answer: D

Explanation:

The Sprint Retrospective is a formal opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. This event focuses on continuous improvement by reviewing processes, collaboration, tools, and their adherence to the Definition of Done.

According to the 2020 Scrum Guide, the Sprint Retrospective serves the following purposes:

* To inspect how the last Sprint went in terms of individuals, interactions, processes, tools, and the Definition of Done.

* To identify and agree upon actionable improvements that will increase the team's effectiveness in future Sprints.

Why the other options are incorrect:

* B. Plan the incomplete work for the next Sprint and submit reasons to the Product Owner: This is not the purpose of the Sprint Retrospective. Sprint Planning is the event where the team plans the upcoming Sprint.

* C. Explain what Backlog items have been done and what has not been done: This describes the Sprint Review, where the team discusses completed and incomplete Product Backlog Items with stakeholders.

* D. Identify Developers who did not perform well in the Sprint: Scrum encourages collaboration, respect, and continuous improvement, not blaming individuals for shortcomings.

NEW QUESTION # 47

How should Scrum teams plan work to be performed within Sprints?

- **A. One Sprint at a time, adapting each Sprint Backlog according to what was learned from the last Sprint**
- B. One project at a time, adjusting each Sprint Backlog Item to meet the release date negotiated at inception
- C. One release at a time, adjusting the number of Sprints to the prior releases' average velocity
- D. One Sprint at a time in the Product Backlog Refinement meeting with participation of stakeholders

Answer: A

Explanation:

Scrum teams plan work one Sprint at a time, using the Sprint Planning event to adapt the Sprint Backlog based on what was learned in previous Sprints. This approach aligns with Scrum's empirical process control, which relies on inspection and adaptation to plan effectively.

According to the 2020 Scrum Guide:

* Sprint Planning creates a Sprint Backlog, which includes the Sprint Goal, selected Product Backlog items, and the plan to deliver them.

* Teams adjust their plans Sprint by Sprint, responding to new information, feedback, and changing circumstances.

Why the other options are incorrect:

* A. One release at a time, adjusting the number of Sprints to the prior releases' average velocity:

Scrum does not prescribe release-driven planning or adjusting Sprint duration based on velocity.

* C. One project at a time, adjusting each Sprint Backlog Item to meet the release date negotiated at inception: Scrum encourages iterative planning within Sprints, not fixed plans tied to predetermined release dates.

* D. One Sprint at a time in the Product Backlog Refinement meeting with participation of stakeholders: Product Backlog Refinement is an ongoing activity, not a Sprint planning process.

Stakeholders typically participate in Sprint Reviews, not in backlog refinement.

NEW QUESTION # 48

What is a characteristic of a done Increment?

- A. Released
- B. Estimable
- C. Prescriptive
- **D. Usable**

Answer: D

Explanation:

A done Increment is usable, meaning it meets the Scrum Team's Definition of Done and can be used or inspected by stakeholders. While the Increment may not always be released to end users, it must be in a usable state to ensure transparency and enable feedback.

According to the 2020 Scrum Guide:

* An Increment is a concrete step toward the Product Goal.

* Each Increment must meet the Definition of Done, ensuring it is usable and provides value, regardless of whether it is immediately released.

Why the other options are incorrect:

* A. Prescriptive: Scrum is not prescriptive about how work is done, and "prescriptive" is not a characteristic of a done Increment.

* B. Estimable: "Estimable" applies to Product Backlog items but is not a characteristic of a done Increment.

* D. Released: While an Increment may be released, it is not a required characteristic. It simply must be in a usable state.

NEW QUESTION # 49

Product Backlog refinement is

- A. a recurring event in the middle of each Sprint.
- B. an opportunity for the Developers to estimate Product Backlog items.
- **C. the act of breaking down and further defining Product Backlog items.**
- D. a pre-planning meeting to shorten the length of Sprint Planning.

Answer: C

Explanation:

Product Backlog refinement is the act of breaking down and further defining Product Backlog items into smaller, clearer, and more actionable items. This process ensures that the Product Backlog is well-organized, understood, and ready for the upcoming Sprint Planning. Refinement helps the Developers and Product Owner collaborate to add detail, order, and estimates to Product Backlog items.

According to the 2020 Scrum Guide:

* Product Backlog refinement is an ongoing activity that occurs throughout the Sprint.

* It is not a formal event, and its timing and structure are determined by the Scrum Team.

* Refinement improves clarity and helps the team better understand upcoming work.

Why the other options are incorrect:

* A. A recurring event in the middle of each Sprint: Product Backlog refinement is not a time-boxed event. It occurs continuously, as needed.

* C. an opportunity for the Developers to estimate Product Backlog items: While estimation may occur during refinement, the primary purpose is breaking down and clarifying items, not solely estimation.

* D. a pre-planning meeting to shorten the length of Sprint Planning: Product Backlog refinement is not a pre-planning meeting but an ongoing activity to prepare for future Sprints.

NEW QUESTION # 50

How often are Sprint Reviews conducted or held?

- A. Daily
- B. One in the middle and one at the end of every Sprint
- **C. Once at the end of every Sprint**
- D. Once at the beginning of the Sprint

Answer: C

Explanation:

The Sprint Review is held once at the end of every Sprint. It is a time-boxed event where the Scrum Team and stakeholders collaborate to inspect the Increment, review progress toward the Product Goal, and adapt the Product Backlog as needed.

According to the 2020 Scrum Guide:

* The purpose of the Sprint Review is to discuss what was completed during the Sprint and what could be done next to optimize value delivery.

* It occurs once at the end of every Sprint, ensuring transparency and stakeholder involvement.

Why the other options are incorrect:

* B. One in the middle and one at the end of every Sprint: The Sprint Review is not conducted multiple times within a Sprint.

* C. Once at the beginning of the Sprint: The Sprint Review is held at the end of the Sprint, not the beginning.

* D. Daily: The Sprint Review is not a daily event. The Daily Scrum occurs daily.

NEW QUESTION # 51

.....

It is known to us that our CSM learning materials have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the CSM training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their CSM Exam and get the related certification. So if you buy the CSM study questions from our company, you will get the certification in a shorter time.

CSM Instant Download: https://www.actualpdf.com/CSM_exam-dumps.html

After practicing all of exam key contents in our CSM study materials it is unquestionable that you can clear the exam as well as get the certification as easy as rolling off a log. Now, there is good news for the candidates who are preparing for the CSM actual test, No matter you are a student, a working staff, or even a house wife, you will find the exact version of your CSM exam materials to offer you a pleasant study experience, We are confident about our Scrum Alliance CSM braindumps tested by our certified experts who have great reputation in IT certification.

Hope the materials would be helpful, I even like CSM the color of the low-lying smog. After practicing all of exam key contents in our CSM Study Materials it is unquestionable that CSM Accurate Study Material you can clear the exam as well as get the certification as easy as rolling off a log.
