Reliable Oracle 1z0-1118-23 Exam Voucher | 1z0-1118-23 Exam Testking

It is certain that the pass rate among our customers is the most essential criteria to check out whether our 1z0-1118-23 training materials are effective or not. The good news is that according to statistics, under the help of our 1z0-1118-23 training materials, the pass rate among our customers has reached as high as 98% to 100%. Our training materials have been honored as the panacea for the candidates for the exam since all of the contents in the 1z0-1118-23 Guide materials are the essences of the exam.

Consequently, with the help of our study materials, you can be confident that you will pass the exam and get the related certification easily. So what are you waiting for? Just take immediate actions!

Oracle 1z0-1118-23 Exam Syllabus Topics:

Topic	Details
Topic 1	• Configure Global Parameters • Configure Reporting parameters • Pre-requisites for Data Validation
Topic 2	• Describe Oracle Fusion Analytic Cloud Solutions • Oracle Fusion Analytics Warehouse
Topic 3	• FAW - Administrations and Maintenance • Bulk uploads and tools for rapid deployment
Topic 4	• FAW - Configure Data Pipeline • FAW - Provisioning (Creating) a FAW instance
Topic 5	• User Experience Customization • Upgrade and Release Management (Beta) • Semantic Model Customization
Topic 6	• Migrate model from test to production • Manage incremental uploads from Fusion Application
Topic 7	• Fusion Application prerequisites • FAW - Pre-requisites before Provisioning instance

Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which two capabilities are available through Semantic Model Extensions?

- A. Add a new dimension.
- B. Add additional data sources to the semantic model.
- C. Create a union between two tables.
- D. Add a new fact.

Answer: A,D

Explanation:

Explanation

Semantic Model Extensions provide various capabilities to customize the semantic model, such as adding a new dimension, adding a new fact, extending a dimension, extending a fact, creating a new subject area, reorganizing a subject area, and adding additional data sources⁵. Creating a union between two tables is not supported by Semantic Model Extensions.

NEW QUESTION # 44

You have decided to use Data Augmentation to bring additional content from Fusion Applications. What is the best way to identify the Fusion Applications object that you want to extract?

- A. The Public View Object (PVO) that contains the content you are looking for.
- B. You have to identify the physical database table in Fusion Applications that contains the content you are looking for.
- C. You must open an SR to identify the required Public View Object (PVO).

Answer: A

Explanation:

Explanation

The best way to identify the Fusion Applications object that you want to extract using Data Augmentation is to find the Public View

Object (PVO) that contains the content you are looking for. A PVO is a Business Intelligence view object that is exposed for external consumption and is available for Data Augmentation³. You do not need to open an SR or identify the physical database table in Fusion Applications to use Data Augmentation.

NEW QUESTION # 45

Oracle Fusion Analytics Warehouse (FAW) offers certain functionality as preview features for you to try. You want to enable the preview features in your environment.

What would you do?

- **A. Ask your FAW Service Administrator to enable the preview features in your existing FAW instant**
- B. Provision a new FAW instance
- C. Open a Support Request (SR) with Oracle support.

Answer: A

Explanation:

Explanation

The way that you can enable the preview features in your environment is to ask your FAW Service Administrator to enable the preview features in your existing FAW instance. The FAW Service Administrator can use the Enable Features option on the Console page to turn on or off individual preview features at any time⁵. You do not need to open a Support Request (SR) with Oracle support or provision a new FAW instance for this purpose

NEW QUESTION # 46

In FAW there are many Subject Areas, with their corresponding data, available for you to use when creating and editing analyses and reports.

How are the Subject Areas secured?

- A. There is no need to secure Subject Areas as the data security provides the necessary security access.
- **B. Duty roles secure the access to FAW Subject Areas.**
- C. Unlike Fusion Applications, the Subject Areas are not secured in FAW. Any FAW-licensed user can access them.

Answer: B

Explanation:

Explanation

The way that the Subject Areas are secured in FAW is by using duty roles. Duty roles define the functional security for a user, such as which tasks they can perform or which objects they can view. Duty roles also determine which subject areas a user can access based on their job functions¹. There is a need to secure Subject Areas as the data security alone does not provide the necessary security access. Unlike Fusion Applications, the Subject Areas are not open to any FAW-licensed user, but only to those who have the appropriate duty roles

NEW QUESTION # 47

You want to move external data to the Oracle Autonomous Data Warehouse that comes with FAW.

M4 Which facilities in FAW enable this?

- A. You must use an ETL that connects to ADW as there are no such facilities in FAW.
- B. The only available option is to use OCI Data Integration to move data.
- **C. Use "Manage Connections" to create a connection to available sources. Data Augmentation can be used against the connections to bring data into AC**

Answer: C

Explanation:

Explanation

To move external data to ADW that comes with FAW, you can use Manage Connections to create a connection to available sources, such as Oracle Database, Oracle Autonomous Database, Oracle Object Storage, Oracle Applications Cloud, and others⁴. Data Augmentation can then be used against these connections to bring data into ADW⁵. You can also use OAC Data Replication feature to replicate data from other sources into ADW⁶
