Microsoft PL-900 Latest Exam Question - PL-900 Exam Assessment

The Getcertkey PL-900 exam questions are real, valid, and updated PL-900 exam questions that assist you in exam preparation and finally, you will be ready to pass the challenging PL-900 exam with good scores. The Getcertkey PL-900 exam questions are designed and verified by experienced and certified Microsoft PL-900 Exam trainers. They check and verified the answers of all PL-900 exam questions thoroughly and ensure the top standard of PL-900 exam questions.

Microsoft Power Platform Fundamentals Sample Questions (Q129-Q134):

NEW QUESTION # 129

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each option to its answer.

Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

App types

model-driven

dashboard

dataset

canvas

Answer Area**Definition**

Quickly create apps for very complex business processes with very little or no code.

Create simple apps with a highly customizable user interface

layouts.

**App type**

App type

App type

Answer:

Explanation:

App types	Answer Area	App type
model-driven	Definition Quickly create apps for very complex business processes with very little or no code. Create simple apps with a highly customizable user interface layouts.	canvas
dashboard		model-driven
dataset		
canvas		

Explanation:

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model - building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven

NEW QUESTION # 130

A company creates a Power Apps app named Inventory Management

Users report issues accessing the app.

You need to open a support ticket with Microsoft.

In which location should you create the support ticket?

- A. Microsoft Power Platform admin center
- B. Inventory Management app
- C. Maker portal
- D. Microsoft 365 admin center

Answer: D**NEW QUESTION # 131**

You plan to use Power Automate to monitor what people are saying about your company's products. You store the feedback for research and development purposes.

You need to recommend Power Automate components to use for the solution.

To answer drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split Car between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page. Enter the resulting posts into the product database. Combine author and link fields into a single field. Run a flow every hour.	Component
expression		Component
service		Component
trigger		Component

Answer:

Explanation:

Components	Requirement	Component
action	Retrieve the top five posts from your company's Facebook page. Enter the resulting posts into the product database. Combine author and link fields into a single field. Run a flow every hour.	Component
expression		Component

trigger		Component

NEW QUESTION # 132

You are creating a Power Automate flow.

You need to retrieve data from several sources including Microsoft Excel, Azure Data Lake, and GitHub.

What should you use? To answer, drag the appropriate components to the correct data sources. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Components	Requirement	Component
Connector	Retrieve data from the following data sources: Microsoft Excel Azure Data Lake GitHub	
Expression		
Formula		

Answer:

Explanation:

Components	Requirement	Component
Connector	Retrieve data from the following data sources: Microsoft Excel Azure Data Lake GitHub	Formula
Expression		Connector
Formula		Expression

Explanation

Components	Requirement	Component
Connector	Retrieve data from the following data sources: Microsoft Excel Azure Data Lake GitHub	Formula
Expression		Connector
Formula		Expression

Box 1: Formula

Reading an Excel document retrieves the data from the document, allowing it to be processed and modified in flows.

Read and extract data from an Excel document with the Read from Excel worksheet action.

Box 2: Connector

Azure Data Lake Store connector allows you to read and add data to an Azure Data Lake account. The Azure Data Lake connector is available for Power Automate.

Box 3: Expression

NEW QUESTION # 133

This question requires that you evaluate the BOLD text to determine if it is correct.

A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. a scheduled
- B. No change is needed.
- C. **an action**
- D. an instant

Answer: C

Explanation:

Explanation

Note: Create a flow (see step 6 below)

1. Sign in to PowerApps.
 2. In the left navigation bar, select Business logic, and then select Flows.
 3. In the upper-left corner of the My Flows page, select New, and then select Create from blank.
 4. Option to create a flow without using a template
- Near the bottom of the page that appears, select Search hundreds of connections and triggers.
5. In the search box, type PowerApps, and then select the PowerApps icon.
 6. Create a PowerApps trigger
 7. On the next page, select the PowerApps icon again, and then select New step.
 8. In the box that says Search connectors and actions, specify an action for your flow, as in this example:
