

Well-Prepared SDLCSA Pdf Exam Dump & Leader in Qualification Exams & Trustable SDLCSA New Dumps

BONUS!!! Download part of ITExamReview SDLCSA dumps for free: <https://drive.google.com/open?id=1DXy7-4WxOkD6SgXKTPRmxAyIW6AMij2g>

The best valid and most accurate Supermicro SDLCSA exam study material can facilitate your actual test and save your time and money. Generally, you are confused by various study material for SDLCSA preparation. Now, please pay attention to ITExamReview SDLCSA reliable study material, which is the best validity and authority training material for your preparation. The SDLCSA actual test will bring you full scores.

Our SDLCSA test guide is suitable for you whichever level you are in right now. Whether you are in entry-level position or experienced exam candidates who have tried the exam before, this is the perfect chance to give a shot. A growing number of exam candidates are choosing our SDLCSA Exam Questions, why are you still hesitating? As long as you have made up your mind, our Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam study question is available in five minutes, so just begin your review now! This could be a pinnacle in your life.

Supermicro SDLCSA New Dumps - Reliable SDLCSA Exam Prep

The Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) exam preparation material is available in three different formats for the customers. The formats are PDF format, web-based software, and Supermicro SDLCSA desktop practice exam software. The portable PDF format means customers can access real Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) exam questions on their smartphones, tablets, and laptops. The PDF format can be printed and customers can also make proper SDLCSA exam notes.

Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

What are the full steps and proper order for replacing a failed power supply unit in the SYS-421GE-TNHR2- LCC system?

- A. Lift the blue lock to unlock the release lever > Push the release lever down and in until it clicks > Ensure the red lock on the release lever is locked
- B. Lift the red lock to unlock the release lever > Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one > Ensure the gold connector pins are on the top > Push the new power supply unit into the tray > Push the release lever down and in until it clicks > Ensure the red lock on the release lever is locked
- C. Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one > Push the new power supply unit into the tray > Push the release lever down and in until it clicks
- D. Lift the yellow lock to unlock the release lever > Lift the release lever and use it to pull out the failed power supply unit > Replace the failed power supply unit with a new one

Answer: B

Explanation:

Replacing a PSU in Supermicro's SYS-421GE-TNHR2-LCC follows a detailed, safety-focused process:

Lift the red lock to unlock the release lever: Red is a common Supermicro color for PSU locks.

Lift the release lever and use it to pull out the failed PSU: Standard hot-swap mechanism.

Replace the failed PSU with a new one: Swap the unit.

Ensure the gold connector pins are on the top: Correct orientation for connection.

Push the new PSU into the tray: Slide it in fully.

Push the release lever down and in until it clicks: Locks the PSU.

Ensure the red lock is locked: Confirms security.

Option B covers all steps comprehensively, aligning with Supermicro's DLC system PSU replacement (e.g., SYS-420 manuals). A is incomplete, C reverses steps, and D skips locking, making B correct.

References: Supermicro PSU replacement guides, DLC system power protocols.

NEW QUESTION # 27

How do you know when the DIMM has been properly inserted back into the slot?

- A. You should see a green lit button on the DIMM
- B. You shouldn't hear a click after you've pressed the DIMM down into the slot
- C. You should still be able to wiggle the DIMM after you've pressed the DIMM down into the slot
- D. You should hear a click after you've pressed the DIMM down into the slot

Answer: D

Explanation:

When inserting a DIMM in Supermicro systems, proper seating is confirmed by a click as the slot latches snap into place, securing the module (e.g., SYS-420GP-TNAR manuals). This audible feedback is standard in DLC systems for reliable memory installation. B (green button) isn't a feature, C contradicts correct insertion, and D (wiggling) indicates failure. Supermicro's design ensures firm DIMM placement, making A the verified sign. References: Supermicro DIMM installation guides, DLC system component reliability.

NEW QUESTION # 28

What safety feature prevents the motherboard tray from being removed too quickly and potentially dropped?

- A. A safety cable
- B. A safety switch
- C. A safety latch
- D. A safety pin

Answer: C

Explanation:

In Supermicro servers like the SYS-421GE-TNHR2-LCC, the motherboard tray is a critical component, often heavy with CPUs and DLC cold plates. A safety latch is the standard feature to prevent rapid removal and accidental drops, as seen in manuals (e.g., SYS-420GP-TNAR). Latches on both sides must be released deliberately, ensuring controlled extraction. A cable (A) might tether but not prevent speed, a switch (B) controls electronics, and a pin (D) is less common for trays. Supermicro's DLC systems prioritize safe handling, making C the correct safety mechanism.

References: Supermicro motherboard tray removal guides, DLC system safety features.

NEW QUESTION # 29

What 2 add-on component(s) are located inside the side bracket of the SYS-421GE-TNHR2-LCC?

- A. AOM-PCIe card and GPU card
- B. AOC NIC card and PCIe card
- C. GPU card and PCIe card
- D. AOM-PCIe card and AOC NIC card

Answer: D

Explanation:

The side bracket in the SYS-421GE-TNHR2-LCC likely houses networking or management add-ons. The AOM-PCIe card (e.g., AOM-GP401-PCIE module) and AOC NIC card (network interface card) are common components in Supermicro's DLC systems, enhancing connectivity (e.g., high-speed NICs for AI workloads).

A (GPU/PCIe) mixes unrelated categories, C pairs an AOM with a GPU (less likely), and D (AOC/PCIe) lacks specificity. B aligns with Supermicro's DLC networking focus, making it correct. References: Supermicro add-on card specs, DLC system networking components.

NEW QUESTION # 30

In order to remove the AOM cage, best describe the location of the 4 screws that need to be removed.

- A. 4 screws on the top, 0 screws on the side
- B. 3 screws on the top, 1 screw on the side
- C. 3 screws on the side, 1 screw on the top
- D. 2 screws on the top, 2 screws on the side

Answer: D

Explanation:

The AOM (Add-On Module) cage in the SYS-421GE-TNHR2-LCC is secured with 2 screws on the top and 2 on the side, a balanced approach in Supermicro's modular designs (e.g., SYS-420GP-TNAR). This ensures stability and accessibility in DLC systems. A and B skew placement, while C (all top) ignores side support. D matches Supermicro's chassis engineering, making it correct. References: Supermicro AOM cage specs, DLC system structural design.

NEW QUESTION # 31

.....

ITExamReview is a website to achieve dreams of many IT people. ITExamReview provide candidates participating in the IT certification exams the information they want to help them pass the exam. Do you still worry about passing Supermicro certification SDLCSCA exam? Have you thought about purchasing an Supermicro certification SDLCSCA exam counseling sessions to assist you? ITExamReview can provide you with this convenience. ITExamReview's training materials can help you pass the certification exam. ITExamReview's exercises are almost similar to real exams. With ITExamReview's accurate Supermicro Certification SDLCSCA Exam practice questions and answers, you can pass Supermicro certification SDLCSCA exam with a high score.
