

Well-Prepared UiPath-TAEPv1 Test Papers–Fantastic Test Cram Pdf for UiPath-TAEPv1: UiPath Test Automation Engineer Professional v1.0

BONUS!!! Download part of SurePassExams UiPath-TAEPv1 dumps for free: https://drive.google.com/open?id=1RNwa5jvtCqvsFjBDUt6LtDQjGJ_F1KDv

Our UiPath-TAEPv1 real exam is written by hundreds of experts, and you can rest assured that the contents of the UiPath-TAEPv1 study materials are contained. After obtaining a large amount of first-hand information, our experts will continue to analyze and summarize and write the most comprehensive UiPath-TAEPv1 learning questions possible. And at the same time, we always keep our questions and answers to the most accurate and the latest.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	- CI - CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI - CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 2	UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 3	UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 4	Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.

Topic 5	• UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 6	• Environments, Applications, and • or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 7	• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 8	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 9	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

Pass Guaranteed 2025 Professional UiPath-TAEPv1: UiPath Test Automation Engineer Professional v1.0 Test Papers

These formats are UiPath-TAEPv1 web-based practice test software, desktop practice exam software, and UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) PDF dumps files. All these three UiPath UiPath-TAEPv1 exam questions formats are easy to use and compatible with all devices and the latest web browsers. Just choose the right UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam dumps format and start UiPath-TAEPv1 exam questions preparation today.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q58-Q63):

NEW QUESTION # 58

How are test cases added dynamically to a Test Set based on labels in UiPath Test Manager?

- A. Test Cases with any of the selected labels are assigned to the Test Set.
- B. Only the manual and automated labels are used to assign Test Cases to the Test Set.
- C. Test Cases with a specified number of the selected labels are assigned to the Test Set.
- D. Test Cases with all of the selected labels are assigned to the Test Set.

Answer: A

Explanation:

In UiPath Test Manager, when using labels to dynamically assign test cases to a Test Set, any test case that matches any of the selected labels will be added. This enables flexible grouping based on shared characteristics.

NEW QUESTION # 59

What kind of changes can be made to test sets linked from Orchestrator in Test Manager?

- A. The name description, or version can not be edited. Any changes need to be made in Orchestrator.
- B. The description can not be edited, but the name and version can be edited in Test Manager.
- C. The name can not be edited, but the version and description can be edited in Test Manager.
- **D. The version can not be edited, but the name and description can be edited in Test Manager.**

Answer: D

Explanation:

When test sets are linked from Orchestrator in Test Manager, the version cannot be edited in Test Manager. However, the name and description of the test set can be modified within Test Manager to support better project documentation or categorization.

NEW QUESTION # 60

What happens to the arguments when creating a test case from a workflow?

- A. Arguments from the workflow are deleted and must be redefined.
- B. Arguments from the workflow are transformed into variables in the test case.
- **C. Arguments from the workflow are automatically imported into the test case.**
- D. Arguments from the workflow need to be manually imported into the test case.

Answer: C

Explanation:

When creating a test case from a workflow in UiPath Studio, the arguments from the workflow are automatically imported into the test case. This allows the test case to simulate the input/output behavior of the original workflow without needing to redefine the arguments.

NEW QUESTION # 61

What UiPath Studio tool is used to record and perform actions on real or simulated mobile devices?

- A. Mobile Testing Template
- B. Mobile Automation Activities
- C. Mobile Device Connection
- **D. Mobile Device Manager**

Answer: D

Explanation:

The Mobile Device Manager in UiPath Studio is the tool used to record and perform actions on real or simulated mobile devices. It facilitates mobile UI automation by connecting Studio to mobile environments.

NEW QUESTION # 62

What is the appropriate scenario to use the "Synchronize mock" action?

- A. To copy the workflows into mock files for mock testing.
- B. To sync the mock files into newly created workflow files.
- C. To sync the workflows into newly mock files for mock testing.
- **D. To sync the mock files with the source workflow files.**

Answer: D

Explanation:

The "Synchronize mock" action is used to sync the mock files with the source workflow files. This ensures that any changes made to the original workflows are reflected in the associated mock files, maintaining consistency during mock testing.

NEW QUESTION # 63

.....

Our UiPath-TAEPv1 exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done your work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our UiPath-TAEPv1 guide question dumps are beyond your imagination. You will regret if you throw away the good products. One of the significant advantages of our UiPath-TAEPv1 Exam Material is that you can spend less time to pass the exam. People are engaged in modern society. So our goal is to achieve the best learning effect in the shortest time.
