

What are the Benefits of Preparing with the ActualtestPDF SolarWinds SCP-NPM Exam Dumps?

Why Choose DumpsGroup?

Choosing DumpsGroup for your SCP-NPM exam preparation offers numerous benefits. Their materials are up-to-date, reflecting the latest exam content. The SCP-NPM Dumps from DumpsGroup are meticulously prepared by experts, ensuring accuracy and relevance. By practicing with their SCP-NPM Practice Test, you can identify your strengths and areas for improvement, increasing your confidence for the exam day.

Conclusion

In conclusion, preparing for the **SolarWinds** Network Performance Monitor (NPM) Exam is a significant step towards earning your SolarWinds Certified Professional certification. Utilize resources like SCP-NPM Dumps PDF and practice tests from DumpsGroup to ensure your success. Don't forget to use the coupon code "**SAVE20**" to get a **20% discount**. Achieving this certification not only validates your skills but also enhances your career opportunities in the IT and networking fields. Start your preparation today and unlock new career heights with the SCP-NPM certification.

If you need to purchase SCP-NPM training materials online, you may pay much attention to the money safety. We apply the international recognition third party for payment, therefore if you choose us, your account and money safety can be guaranteed. And the third party will protect your interests. In addition, SCP-NPM Exam Dumps cover most of knowledge points for the exam, and you can have a good command of them as well as improve your professional ability in the process of learning. In order to strengthen your confidence for SCP-NPM exam materials, we are pass guarantee and money back guarantee,

We know that your work is very busy, and there are many trivial things in life. There is not much time you can spend on research. But our SCP-NPM exam questions can promise to take the exam 20 to 30 hours after you use our products. The idea of SCP-NPM study materials is to let you learn the most valuable things in the shortest possible time. And it is proved and tested by tens of thousands of our loyal customers. And our SCP-NPM training engine can help you achieve success with 100% guarantee.

Test SCP-NPM Registration | Latest SCP-NPM Exam Duration

Preparing with outdated SCP-NPM exam questions results in failure and loss of time and money. You can get success in the exam

on first attempt and save your resources with the help of updated exam questions. We offer SolarWinds SCP-NPM real questions to help pupils in getting ready for the exam in a short time. Students who choose ActualtestPDF will get the latest and updated exam questions they need to prepare for the SCP-NPM examination in a short time.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) exam is an essential certification for IT professionals who are looking to validate their skills and knowledge in network performance monitoring. SolarWinds Network Performance Monitor (NPM) Exam certification is widely recognized in the industry and is considered to be an important credential for those who specialize in network management and monitoring. SCP-NPM Exam covers a wide range of topics related to network monitoring and is designed to test the candidate's knowledge and understanding of various network monitoring tools and techniques.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

You configured devices to send SNMP traps to NPM, but do not see the messages in the Orion Web Console. You verified that the firewall ports are open and the devices are correctly configured.

What can you verify to troubleshoot the cause?

- **A. Verify the SNMP trap service is running**
- B. Verify that you have the SNMP Trap module installed for NPM
- C. Verify you use Log Analyzer to view traps
- D. Verify you configured the SNMP Traps view in the Orion Web Console

Answer: A

NEW QUESTION # 27

How do you assign users access to select reports?

- A. Create the reports while logged in as each user and set permissions
- B. Configure the report and add a Report Limitation. Assign the limitation to users who need access to the report
- **C. Use custom properties and account limitations to control report access**
- D. Save the reports in different sub-directories and set the permissions for each user

Answer: C

Explanation:

To assign users access to select reports, you can use custom properties and account limitations to restrict the scope of data that users can view and report on. Custom properties are user-defined fields that you can assign to monitored objects, such as nodes, interfaces, or applications. Account limitations are rules that you can apply to user accounts to filter the network data that users can access and view. By using custom properties and account limitations together, you can create granular and flexible report access for different users or groups. For example, you can create a custom property called Department and assign it to nodes that belong to different departments in your organization. Then, you can create an account limitation based on the Department custom property and assign it to users who only need to see and report on the nodes in their own department. References: How to create different Orion Support Users and assign them different properties in NPM, Define what users can access and do in the SolarWinds Platform

NEW QUESTION # 28

You want to create an alert that notifies you when packet loss meets or exceeds 50%, but only for a select set of nodes in your network. How do you accomplish this?

- **A. Set an alert limitation for the nodes to be included in the alert**
- B. Set the alert trigger evaluation to evaluate nodes to be included in the alert
- C. Set the scope of the alert to only apply to nodes to be included in the alert
- D. Create separate SWQL trigger condition for each node to be included in the alert

Answer: A

Explanation:

An alert limitation is a filter that restricts the scope of an alert to a specific set of objects, such as nodes, interfaces, applications, or groups. You can use an alert limitation to create an alert that only applies to a select set of nodes in your network, and exclude the

rest. To set an alert limitation for the nodes to be included in the alert, follow these steps1:

Click Alerts & Activity > Alerts > Manage Alerts.

Find the alert that you want to edit or create a new alert.

On the Trigger Condition tab, define the condition that triggers the alert, such as Percent Loss is greater than or equal to 50.

On the Scope of Alert tab, select Limit the scope of this alert to a specific subset of objects.

Choose the method to define the subset of objects, such as Select objects manually, Use a custom SWQL query, or Use a custom SQL query.

Select or enter the criteria to filter the objects, such as the node name, IP address, group, custom property, or any other attribute.

Click Add Selected Objects to add the objects to the alert limitation.

Click Next and complete the rest of the alert configuration.

You can now save and enable the alert, and it will only notify you when packet loss meets or exceeds 50% for the nodes that you have selected in the alert limitation. Reference: 1: Limit the objects an alert applies to

NEW QUESTION # 29

Your team member cannot see any reports in the Orion Console. What can cause this issue?

- A. The Report Writer is not installed
- B. The reports are configured with more than one limitation category
- C. The No Reports limitation is applied to the user account
- D. The SQL server is on a different system than the SolarWinds server

Answer: C

NEW QUESTION # 30

A custom poller has polled some results from nodes. Which of the following is a possible reason for NOT being able to show the polled results as charts on the Orion Web Console?

- A. Charts are only supported by out-of-the-box pollers
- B. The poller is not enabled and assigned to the devices
- C. You must use Device Studio to build the poller
- D. You did not set the poller to collect historical statistics

Answer: D

Explanation:

One possible reason for not being able to show the polled results as charts on the Orion Web Console is that you did not set the poller to collect historical statistics. Historical statistics are required for displaying charts and gauges in the web console, as they provide the data points for plotting the trends and values over time. If you only set the poller to collect current statistics, you will only be able to view the polled results as tables or lists in the web console. To set the poller to collect historical statistics, you need to edit the poller and select the Keep Historical Data option in the Poller Properties page. You can also specify the retention settings for the historical data, such as the frequency and duration of data collection and storage1. Reference: Create a custom poller

NEW QUESTION # 31

.....

If you prefer to practice SCP-NPM questions and answers on paper, then our SCP-NPM exam dumps are your best choice. SCP-NPM PDF version is printable, and you can print them into a hard one and take notes on them, and you can take them with you. SCP-NPM exam bootcamp offers you free demo for you to have a try before buying, so that you can have a better understanding of what you are going to buy. SCP-NPM Exam Materials contain both questions and answers, and you can have a convenient check after practicing.
