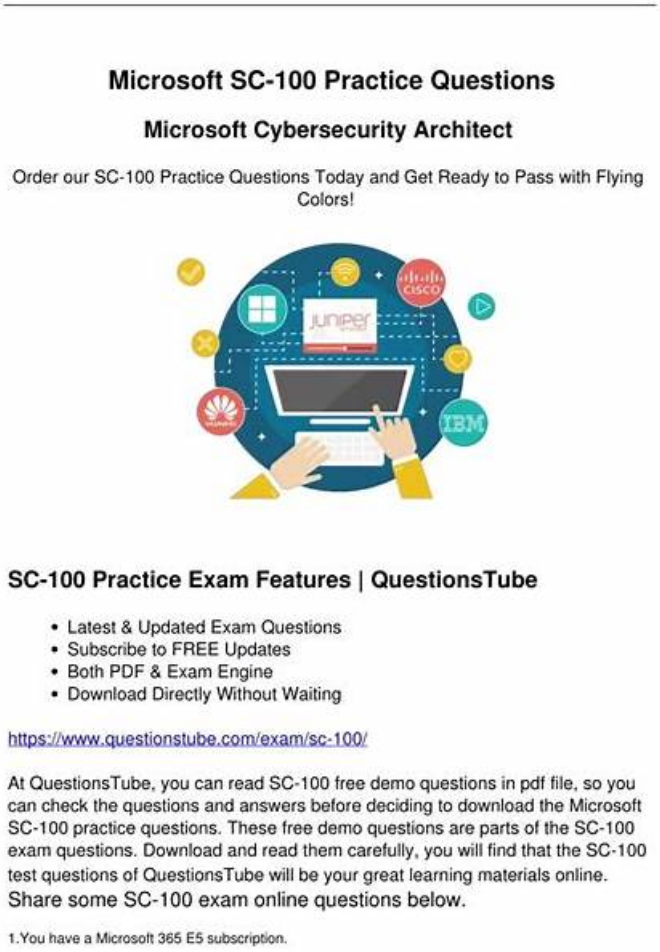
What Will be the Result of Preparing with Microsoft SC-401 Practice Questions?



What's more, part of that ExamTorrent SC-401 dumps now are free: https://drive.google.com/open?id=1X3sbJYL2IFdzi4Nlf_G1iAlhcjR9RrRd

Now you do not need to worry about the relevancy and top standard of ExamTorrent Administering Information Security in Microsoft 365 (SC-401) exam questions. These Microsoft SC-401 dumps are designed and verified by qualified SC-401 exam trainers. Now you can trust ExamTorrent Microsoft SC-401 Practice Questions and start preparation without wasting further time. With the SC-401 exam questions you will get everything that you need to learn, prepare and pass the challenging SC-401 exam with good scores.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Topic 2	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 3	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

After years of hard work, our SC-401 guide training can take the leading position in the market. Our highly efficient operating system for SC-401 learning materials has won the praise of many customers. If you are determined to purchase our SC-401 study tool, we can assure you that you can receive an email from our efficient system within 5 to 10 minutes after your payment, which means that you do not need to wait a long time to experience our learning materials. Then you can start learning our SC-401 Exam Questions in preparation for the exam.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q131-Q136):

NEW QUESTION # 131
You have a Microsoft 365 ES subscription that uses Microsoft Teams and contains the users shown in the following table.

Name	Team membership
User1	Team1, Team2
User2	Team2

You have the retention policies shown in the following table.

Name	Location	Included	Retain items for	Start the retention period	At the end of retention period
Policy1	Microsoft Teams channel messages	All teams	7 years	When items are created	Delete items automatically
	Microsoft Teams chats	User1			
Policy2	Microsoft Teams channel messages	Team1	5 years	When items are created	Delete items automatically
	Microsoft Teams chats	User2			

The users perform the actions shown in the following table.

User	Location	Action
User1	Team1 channel	Edits a message
User2	Private 1:1 chat with User1	Sends a message to User1
User1	Team2 channel	Deletes a message

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point

Answer:

Explanation:

Explanation:

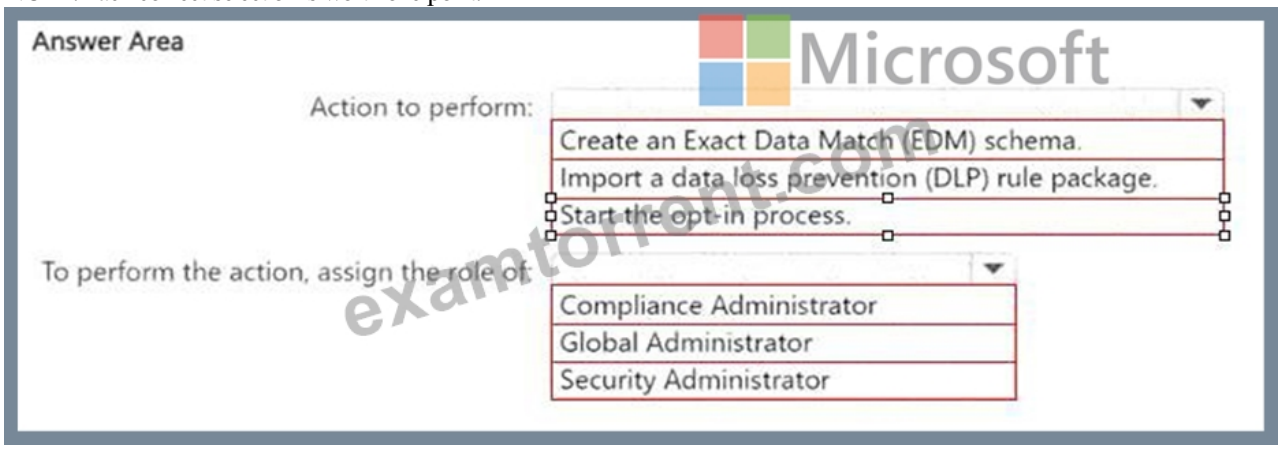
NEW QUESTION # 132

You have a new Microsoft 365 E5 tenant.

You need to create a custom trainable classifier that will detect product order forms. The solution must use the principle of least privilege.

What should you do first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.



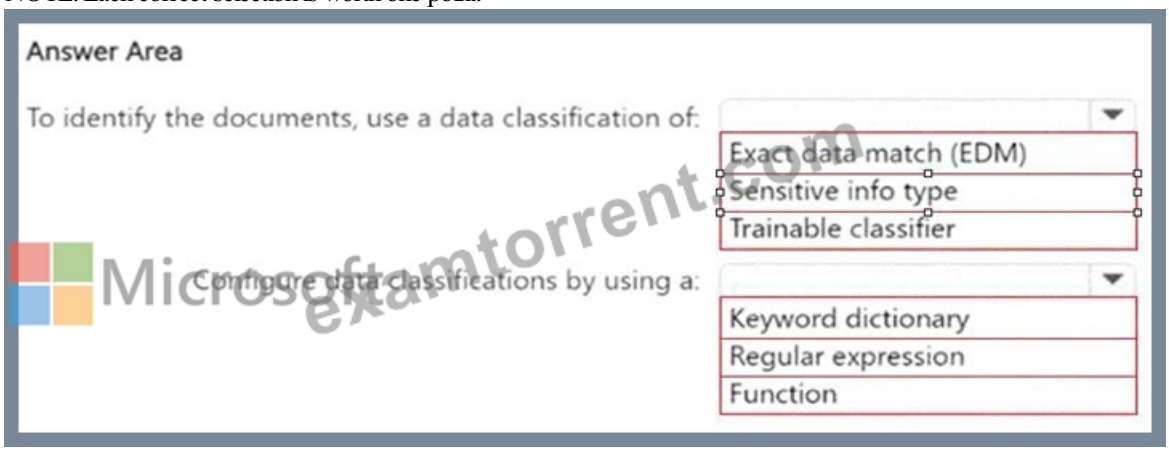
Answer:

Explanation:

Explanation:

To create a custom trainable classifier in Microsoft Purview (formerly Microsoft Compliance Center), you must first opt into the trainable classifier feature.
Before using custom trainable classifiers, Microsoft requires manual opt-in through the Microsoft Purview compliance portal. Without this step, you cannot create a new classifier.
The Compliance Administrator role has the necessary permissions to configure data classification, DLP policies, and trainable classifiers. Global Administrator has higher privileges but is not required for this task, violating the principle of least privilege. Security Administrator is focused on security-related settings but does not manage compliance features like classifiers.

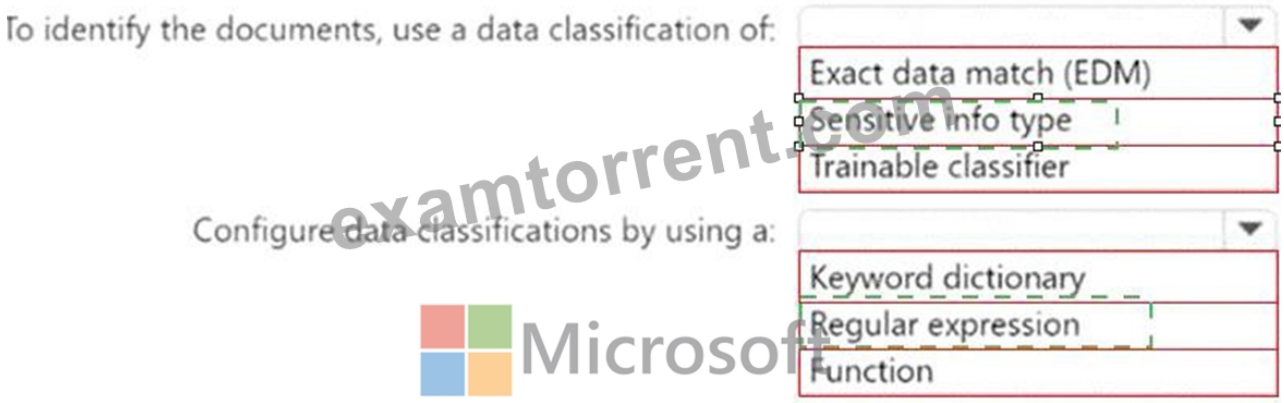
NEW QUESTION # 133
You have a Microsoft 365 E5 subscription.
You need to identify documents that contain patent application numbers containing the letters PA followed by eight digits, for example, PA 12345678. The solution must minimize administrative effort.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



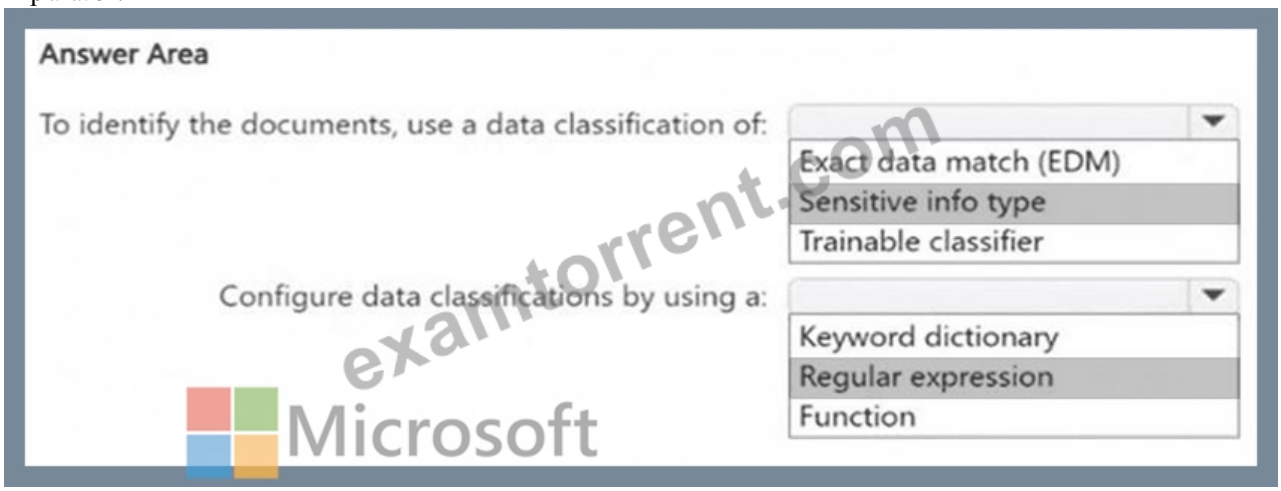
Answer:

Explanation:

Answer Area



Explanation:



Box 1: Since you are looking for a specific pattern (PA followed by eight digits, e.g., PA 12345678), the best classification method is Sensitive Info Type. Sensitive Info Types allow pattern-based matching to identify structured data. Exact Data Match (EDM) is not needed because you're not comparing against a fixed dataset.
Trainable classifier is not appropriate because this is a structured pattern, not an unstructured document classification.
Box 2: Since PA 12345678 follows a structured pattern, the most effective method is Regular Expression (Regex). A Regular Expression (Regex) can be written to match "PA" followed by exactly eight digits (e.g., PA\s\d{8}). Keyword dictionary is not ideal because it works for predefined words, not number patterns.
Function is unnecessary because there is no need for checksum validation or predefined validation rules.

NEW QUESTION # 134
You have a Microsoft 365 E5 subscription that uses Microsoft Purview.
You are creating an exact data match (EDM) classifier named EDM1.
For EDM1, you upload a schema file that contains the fields shown in the following table.

Column name	Match mode
PP	EU Passport Number
Name	All Full Names
DateOfBirth	Single-token
AccountNumber	Multi-token

What is the maximum number of primary elements that EDM1 can have?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
In Microsoft Purview Exact Data Match (EDM) classifiers, a primary element is a unique, identifying field used for data matching. EDM allows up to two primary elements per schema.
From the provided table, the Match mode indicates how data is analyzed:
PP (EU Passport Number) # Likely a primary element because it's unique.
Name (All Full Names) # Typically not a primary element as names are common.
DateOfBirth (Single-token) # Usually a secondary element, not unique.
AccountNumber (Multi-token) # Can be a primary element, as it's a unique identifier.
Since EDM supports a maximum of two primary elements, the correct answer is 2.

NEW QUESTION # 135
You have Microsoft 365 E5 subscription.
You create two alert policies named Policy1 and Policy2 that will be triggered at the times shown in the following table.

Policy	Time (hh:mm:ss)
Policy1	10:00:00
Policy2	10:00:03
Policy1	10:00:04
Policy2	10:00:31
Policy1	10:01:01
Policy1	10:04:45

How many alerts will be added to the Microsoft Purview portal?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: E

Explanation:
In Microsoft Purview, when multiple alert policies trigger alerts, duplicate alerts within a short period (typically 5 minutes) may be suppressed to avoid redundancy.
Step-by-step Analysis:

Policy	Time Triggered (hh:mm:ss)	New Alert?
Policy1	10:00:00	Yes
Policy2	10:00:03	Yes
Policy1	10:00:04	No (Duplicate within 5 min)
Policy2	10:00:31	No (Duplicate within 5 min)
Policy1	10:01:01	Yes
Policy1	10:04:45	Yes

Policy1 at 10:00:04 is ignored because Policy1 already triggered at 10:00:00, and it's within 5 minutes.
Policy2 at 10:00:31 is ignored because Policy2 already triggered at 10:00:03, and it's within 5 minutes.
Policy1 at 10:01:01 is a new alert because it's over 1 minute after the previous Policy1 alert.
Policy1 at 10:04:45 is a new alert because it's over 3 minutes after the previous Policy1 alert.

NEW QUESTION # 136
.....

As the most popular SC-401 exam questions in the field, the passing rate of our SC-401 learning questions has up to 98 to 100 percent. And our SC-401 preparation materials have three versions to satisfy different taste and preference: PDF version, Soft version and APP version. The three versions of SC-401 training prep have the same questions, only the displays are different. You can buy according to your interest. In addition, SC-401 test engine is indispensable helps for your success.
