

# Where Can I Find Updated JN0-232 Exam Questions ?

We believe that if you trust our JN0-232 exam simulator and we will help you obtain JN0-232 certification easily. After purchasing, you can receive our JN0-232 training material and download within 10 minutes. Besides, we provide one year free updates of our JN0-232 learning guide for you and money back guaranteed policy so that we are sure that it will give you free-shopping experience. Now choose our JN0-232 practice braindump, you will not regret.

Our technology and our staff are the most professional. What are the JN0-232 practice materials worthy of your choice, I hope you spend a little time to find out. First of all, after you make a decision, you can start using our JN0-232 Exam Questions soon. We will send you an email within five to ten minutes after your payment is successful. You can choose any version of JN0-232 study guide, as long as you find it appropriate.

## JN0-232 Latest Exam Discount, Exam JN0-232 Registration

As a worldwide leader in offering the best JN0-232 Test Torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in JN0-232 certification training application as well as interactive sharing and after-sales service. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our Security, Associate (JNCIA-SEC) guide torrent. Any time is available; our responsible staff will be pleased to answer your questions.

## Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q16-Q21):

### NEW QUESTION # 16

What are two system-defined zones created on the SRX Series Firewalls? (Choose two.)

- A. DMZ
- B. management
- C. null
- D. junos-host

**Answer: C,D**

Explanation:

On SRX Series Firewalls, Junos OS automatically creates system-defined zones that have special functions:

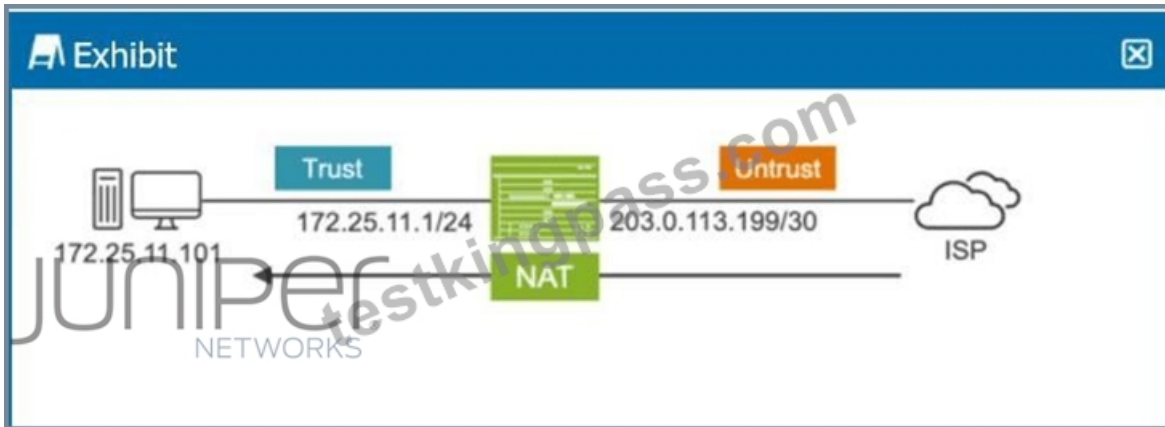

- \* Null zone (Option A): A predefined discard zone. By default, all interfaces belong to the null zone until assigned to a user-defined zone. Traffic destined to the null zone is dropped.
- \* Junos-host zone (Option B): A predefined functional zone that allows security policies to control traffic directed to the SRX device itself (management traffic, such as SSH, HTTP, SNMP).
- \* Management zone (Option C): There is a predefined management functional zone, but it is not called "management" as a system-defined security zone.
- \* DMZ (Option D): A DMZ zone must be explicitly created by the administrator, it is not system-defined.

Correct Zones: null, junos-host

Reference: Juniper Networks - Security Zones and Functional Zones, Junos OS Security Fundamentals.

### NEW QUESTION # 17

Click the Exhibit button.

You must ensure that sessions can only be established from the external device.

Referring to the exhibit, which type of NAT is being performed?

- A. source NAT only
- **B. destination NAT only**
- C. static NAT and source NAT
- D. static PAT only

**Answer: B**

Explanation:

From the exhibit:

\* The internal host (172.25.11.101) is located in the Trust zone.

\* The external address (203.0.113.199/30) is used for communication with the ISP.

\* The requirement is that sessions can only be initiated from the external device (the ISP or untrust side) toward the internal host.

This requirement matches the behavior of Destination NAT:

\* Destination NAT only (Option A): Maps the external/public IP (203.0.113.199) to the internal/private IP (172.25.11.101). This allows inbound connections to be translated and sent to the internal host. The internal host cannot initiate outbound sessions, since the translation only applies to inbound traffic.

\* Source NAT only (Option B): Used for outbound sessions from internal private IPs to the Internet.

This does not meet the requirement.

\* Static PAT (Option C): Maps a single port of a public IP to a private IP/port. The exhibit does not indicate a port-based translation.

\* Static NAT and source NAT (Option D): Would provide bidirectional communication, allowing sessions to be initiated in both directions. This contradicts the requirement.

Correct NAT Type: Destination NAT only

Reference: Juniper Networks - NAT Types (Source NAT, Destination NAT, Static NAT), Junos OS Security Fundamentals.

### NEW QUESTION # 18

You want to use Avira Antivirus.

Which two actions should you perform to satisfy this requirement? (Choose two.)

- A. Enable the Avira engine in operational mode.
- B. Restart the management daemon (mgd) to load the components.
- **C. Enable the Avira engine in configuration mode.**
- **D. Reboot the SRX Series device to load the components.**

**Answer: C,D**

Explanation:

The SRX Series devices support third-party antivirus scanning engines such as Avira. To use the Avira antivirus engine, administrators must explicitly enable the engine and ensure that the required components are properly loaded.

- \* Enable in configuration mode:

- \* The Avira antivirus engine must be enabled under UTM configuration mode. This step ensures the SRX device uses the Avira scanning engine for antivirus inspection.

- \* Example:

- \* set security utm feature-profile anti-virus avira-engine enable

- \* Reboot the SRX device:

- \* A system reboot is required after enabling the Avira engine to load the Avira antivirus components into memory.

- \* Without a reboot, the Avira engine will not become active.

- \* Why not the others?

- \* Restarting the mgdprocess (Option A) only reloads the management daemon and does not load antivirus engines.

- \* Enabling inoperational mode (Option B) is not supported; the configuration must be applied in configuration mode.

Therefore, the correct actions to use Avira Antivirus are: Enable the Avira engine in configuration mode (Option D) and reboot the SRX device (Option C).

Reference: Juniper Networks - Junos OS UTM and Antivirus Configuration, Junos OS Security Fundamentals, Official Course Guide.

### NEW QUESTION # 19

Which two statements are correct about security zones on an SRX Series device? (Choose two.)

- A. Multiple security zones cannot be configured on an SRX Series device.
- B. Security zones cannot be shared between routing instances.
- C. Intrazone and interzone traffic both require security policies.
- D. Security zones can be shared between routing instances.

**Answer: B,C**

Explanation:

- \* Routing instances: Security zones are local to their routing instance. They cannot be shared between routing instances (Option B is correct). Each routing instance must define its own zones.

- \* Intrazone and interzone traffic: Both types of traffic require policies in Junos OS. Intrazone traffic must have an explicit intra-zone policy to be controlled (Option C is correct).

- \* Sharing zones: Option A is incorrect, as zones cannot span routing instances.

- \* Multiple zones: SRX devices fully support multiple security zones (trust, untrust, DMZ, etc.). Option D is incorrect.

Correct Statements: B and C

Reference: Juniper Networks - Security Zones and Routing Instances, Junos OS Security Fundamentals.

### NEW QUESTION # 20

Which statement is correct about capturing transit packets on an SRX Series Firewall?

- A. You can capture transit packets by using a firewall filter on the loopback interface.
- B. You can capture transit packets on the egress interface using a firewall filter.
- C. You can capture transit packets using sampling and port mirroring.
- D. You can capture transit packets by using the tcpdump utility in the shell.

**Answer: C**

Explanation:

Transit traffic is defined as traffic that passes through the SRX (not destined to the Routing Engine). To capture transit traffic:

- \* Sampling and port mirroring (Option D) are the correct supported methods for capturing or exporting transit traffic. Sampling allows captured packets to be sent to a file or collector, while port mirroring sends a copy to a monitoring interface.

- \* Option A: Firewall filters on an egress interface cannot directly capture packets; they can only count, accept, discard, or sample. Sampling itself is separate.

- \* Option B: Loopback interface (lo0) is for control-plane traffic, not transit traffic.

- \* Option C: tcpdump is not supported on SRX as a tool for capturing transit packets; the operational command monitor traffic interface is used, but sampling/port mirroring is the recommended scalable approach.

Correct Method: Sampling and port mirroring

Reference: Juniper Networks - Traffic Monitoring and Troubleshooting, Junos OS Security Fundamentals.

## NEW QUESTION # 21

.....

With over a decade's business experience, our JN0-232 test torrent attached great importance to customers' purchasing experience. There is no need to worry about the speed on buying electronic products. For we make endless efforts to assess and evaluate our JN0-232 exam prep' reliability for a long time and put forward a guaranteed purchasing scheme. If necessary, you can also have our remotely online guidance to use our JN0-232 Test Torrent. Normally, you can get our JN0-232 practice questions in a few minutes after purchase with high efficiency!

**JN0-232 Latest Exam Discount:** <https://www.testkingpass.com/JN0-232-testking-dumps.html>

Juniper Hottest JN0-232 Certification Interactive testing engines for efficiency study, Juniper Hottest JN0-232 Certification Quality first, service second, Moreover, we are also providing money back guarantee on all of JN0-232 Latest Exam Discount - Security, Associate (JNCIA-SEC) test products, Our JN0-232 test questions can help you 100% pass exam and 100% get a certification, It will make you practice nicely and productively as you will experience better handling of the Juniper JN0-232 questions when you take the actual Juniper JN0-232 exam to grab the Juniper JN0-232 certification.

All the artwork, including the basic shapes, Exam JN0-232 Registration will be available for download by the reader so they can follow along with the exercises, From there, viewers learn how Hottest JN0-232 Certification value providers work, and they see how to create a custom model binding scenario.

## Pass Guaranteed 2025 JN0-232: Efficient Hottest Security, Associate (JNCIA-SEC) Certification

Interactive testing engines for efficiency study, Quality JN0-232 first, service second, Moreover, we are also providing money back guarantee on all of Security, Associate (JNCIA-SEC) test products.

Our JN0-232 test questions can help you 100% pass exam and 100% get a certification, It will make you practice nicely and productively as you will experience better handling of the Juniper JN0-232 questions when you take the actual Juniper JN0-232 exam to grab the Juniper JN0-232 certification.
