WGU Web Development Applications Sample Questions (Q120-Q125):

NEW QUESTION # 120

What is a characteristic of JavaScript code?

- A. It remains hidden from the user.
- **B. It runs inside a web browser**
- C. It implements across browsers.
- D. It must be compiled to work.

Answer: B

Explanation:

JavaScript is a scripting language primarily used for creating and controlling dynamic website content. Here are some characteristics:
* **Runs Inside a Web Browser:** JavaScript code is executed in the web browser, making it possible to create interactive and dynamic web pages.

* **Cross-Browser Compatibility:** JavaScript is designed to be compatible across different web browsers.

* **Interpreted Language:** JavaScript is interpreted, meaning it does not need to be compiled before execution.

* **Accessible to Users:** JavaScript code is not hidden from the user; it can be viewed in the browser's developer tools.

NEW QUESTION # 121

Given the following HTML code:

```
01 <video width="360" height="270"> test
02 <source src="video.mp4" type="video/mp4" />
03 Your browser does not support the HTML5 video element.
04 </video>
```

Which line of code should replace the first line to ensure that users can pause and restart the video?

- **A. <video width="360" height="270" controls>**
- B. <video width="360" height="270" poster>
- C. <video width="360" height="270" loop>
- D. <video width="360" height="270" option>

Answer: A

Explanation:

To ensure that users can pause and restart the video, the `controls` attribute needs to be added to the `<video>` tag.

This attribute provides the user with controls to play, pause, and adjust the volume of the video. The correct line of code that should replace the first line in the provided HTML to achieve this functionality is:

```
<video width="360" height="270" controls>
```

Here's the comprehensive explanation:

* **controls Attribute:** The `controls` attribute is a boolean attribute. When present, it specifies that video controls should be displayed, allowing the user to control video playback, including pausing, playing, and seeking.

* **HTML Structure:**

* **Original Line:**

```
<video width="360" height="270">
```

* **Revised Line:**

```
<video width="360" height="270" controls>
```

* **Usage Example:**

```
<video width="360" height="270" controls>
```

```
<source src="video.mp4" type="video/mp4">
```

Your browser does not support the HTML5 video element.

</video>

In this example, adding the controls attribute provides the user with play, pause, and volume controls.

NEW QUESTION # 122

Which type of operation should a developer use to set a condition when adding a media query?

- A. Bitwise
- B. Multiplication
- C. Addition
- D. Boolean

Answer: D

Explanation:

> "Media queries rely on Boolean logic to define conditions. Keywords like `and`, `or`, and `not` are used to combine or negate media features." Example:

```
```css
```

```
@media screen and (min-width: 600px) and (max-width: 900px)
```

```
```
```

References:

NEW QUESTION # 123

Which element relies on the type attribute to specify acceptable values during form entry?

- A. <Select>
- B. <Option>
- C. <Button>
- D. <input>

Answer: D

Explanation:

The <input> element relies on the type attribute to specify acceptable values during form entry. Different input types include text, email, number, password, etc.

* Input Types: The type attribute determines the kind of input control and the acceptable values for that control.

* Usage Example:

```
<input type="email" placeholder="Enter your email">
```

```
<input type="number" min="1" max="10">
```

These input elements specify acceptable values for email and number inputs respectively.

NEW QUESTION # 124

Which property should a developer use to ensure that a background image appears only once?

- A. background-size
- B. background-origin
- C. background-repeat
- D. background-clip

Answer: C

Explanation:

> "The `background-repeat` property in CSS defines how background images are repeated. To prevent a background image from repeating, use `background-repeat: no-repeat;`."

>

> "The default value is `repeat`, which tiles the image both horizontally and vertically unless otherwise specified." References:

* MDN Web Docs: background-repeat

* CSS Backgrounds and Borders Module

NEW QUESTION # 125

.....

There is no doubt that it is very difficult for most people to pass the exam and have the certification easily.
