Huawei HCSA-Presales-Transmission & Access Sample Questions (Q25-Q30):

NEW QUESTION # 25

What is the maximum exchange capacity of the new brand OLT EA5800-X7 in the company?

- A. 1920Gbit/s
- B. 7.2Tbit/s
- C. 480Gbit/s
- D. 3.6Tbit/s

Answer: D

NEW QUESTION # 26

What are the advantages of the PONDER board in Huawei's financial data center transmission solution? (Multiple choice)

- A. Applicable to P2P networking
- B. Low latency
- C. Highly integrated and slot-saving
- D. Support multi-service access

Answer: A,B,C,D

NEW QUESTION # 27

On the main railway line, what is the recommended bandwidth of the main MS-OTN solution at the interval layer?

- A. 2.5G
- B. 40G
- C. 10G
- D. 622M

Answer: C

NEW QUESTION # 28

POL can be sold independently in all office scenarios.

- A. True
- B. False

Answer: B

Explanation:

POL (Passive Optical LAN) is a solution designed for enterprise campus environments, leveraging PON technology to provide converged voice, data, and video services. While POL is highly versatile and can be deployed in various scenarios such as education, healthcare, hospitality, and office environments, it cannot always be sold independently in all office scenarios. The deployment of POL depends on factors such as the existing infrastructure, customer requirements, and the scale of the network. In some cases, additional components like Wi-Fi access points, routers, or switches may be required to complement the POL solution. Therefore, POL is typically sold as part of an integrated solution tailored to the customer's specific needs.
