Salesforce Certified Tableau Data Analyst Sample Questions (Q139-Q144):

NEW QUESTION # 139

You have the following data source in tableau Server.

You need to ensure that the data is updated every hour.
What should you select?

- A. Extract Refreshes
- B. New
- C. Connections
- D. Connected Workbooks

Answer: A

Explanation:

To ensure that the data is updated every hour, you need to select Extract Refreshes from the data source menu on Tableau Server. This will allow you to add a new extract refresh schedule or edit an existing one. You can specify the frequency and time of the refresh, as well as any custom options or credentials. New will create a new data source, Connected Workbooks will show you which workbooks use this data source, and Connections will show you which tables or files are connected to this data source.
