The more efforts you make, the luckier you are. As long as you never abandon yourself, you certainly can make progress. Now, our 156-582 exam questions just need you to spend some time on accepting our guidance, then you will become popular talents in the job market. As a matter of fact, you only to spend about 20 to 30 hours on studying our 156-582 Practice Engine and you will get your certification easily. Our 156-582 training guide can help you lead a better life.

CheckPoint Check Point Certified Troubleshooting Administrator - R81.20 Sample Questions (Q73-Q78):

NEW QUESTION # 73

Which type of NAT allows both incoming and outgoing connections?

- A. Hide NAT
- B. Static NAT
- C. Both Static and Hide NAT
- D. Port NAT

Answer: B

Explanation:

Static NAT allows for both incoming and outgoing connections by mapping a specific internal IP address to a fixed external IP address. This bidirectional mapping ensures that external entities can initiate connections to the internal host, and the internal host can initiate connections to external networks using the same IP address.

In contrast, Hide NAT primarily handles outgoing connections by translating multiple internal IPs to a single external IP, without necessarily allowing incoming connections.

NEW QUESTION # 74

Application Control and URL Filtering update files are located in which directory?

- A. SCPDIR/appi/update
- B. SCPDIR/apci/update
- C. SFWDIR/appi/update/
- D. SFWDIR/conf/update

Answer: C

Explanation:

Update files for Application Control and URL Filtering are typically stored in the SFWDIR/appi/update/ directory. This location houses the latest updates and definitions required for the proper functioning of these security features, ensuring that the gateway can effectively control applications and filter URLs based on the latest threat intelligence.

NEW QUESTION # 75

In the Security Management Architecture, what port and process SmartConsole uses to communicate with the management server?

- A. CPM and 18190

- B. FWM and 19009
- C. CPM 19009 and 18191
- **D. CPM and 19009**

Answer: D

Explanation:

SmartConsole communicates with the Security Management Server using the CPM (Check Point Management) process over port 19009. This communication is essential for managing policies, retrieving logs, and performing administrative tasks within the Check Point environment.

NEW QUESTION # 76

When accessing License Status In Smart Console, what information is available?

- A. License Status, Blade Name, Report available, Download
- **B. Blade Name, Expiration Date, Attached to, Status**
- C. Blade Name, License Status, Expiration Date, Additional info
- D. Expiration Date, Status, SKU, Signature Key

Answer: B

Explanation:

In SmartConsole, when accessing the License Status, the following information is available:

- * Blade Name: Identifies the specific security blade the license pertains to.
- * Expiration Date: Indicates when the license will expire.
- * Attached to: Shows which device or component the license is attached to.
- * Status: Reflects the current state of the license (e.g., active, expired).

This information helps administrators monitor and manage their licenses effectively, ensuring that all security features remain operational.

NEW QUESTION # 77

Which of the following files is commonly associated with troubleshooting crashes on a system such as SmartConsole?

- **A. crash dump**
- B. CPMILdump
- C. fw monitor
- D. tcpdump

Answer: A

Explanation:

A crash dump file is typically generated when an application like SmartConsole crashes. This file contains detailed information about the state of the system at the time of the crash, which is invaluable for diagnosing the cause of the failure. Analyzing crash dumps helps developers and support teams identify and fix underlying issues.

NEW QUESTION # 78

.....

The 156-582 guide torrent is compiled by the experts and approved by the professionals with rich experiences. The 156-582 prep torrent is the product of high quality compiled elaborately and gone through strict analysis and summary according to previous exam papers and the popular trend in the industry.
