C-SIGDA-2403 Latest Test Vce & C-SIGDA-2403 Test Dumps Pdf

Perhaps you worry about that you have difficulty in understanding our C-SIGDA-2403 training questions. Frankly speaking, we have taken all your worries into account. Firstly, all knowledge of the C-SIGDA-2403 exam materials have been simplified a lot. Also, we have tested many volunteers who can prove that after studying our C-SIGDA-2403 Exam Questions for 20 to 30 hours, it is easy to pass the exam. The results show that our C-SIGDA-2403 study materials are easy for them to understand. In addition, they all enjoy learning on our C-SIGDA-2403 practice exam study materials.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q58-Q63):

NEW QUESTION # 58

What are the main capabilities of Process Mining?

- A. Process Conformance, Process Performance, Process Execution
- B. Process Discovery, Process Conformance, Process Documentation
- C. Process Performance, Process Improvement, Process Automation
- D. Process Discovery, Process Conformance, Process Performance

Answer: D

Explanation:

Process Mining in SAP Signavio provides a set of core capabilities to analyze and optimize business processes based on event log data. The SAP Signavio documentation outlines these capabilities explicitly:

* Exact Extract: "SAP Signavio Process Intelligence supports three main Process Mining capabilities:

* Process Discovery: Automatically reconstructs process models from event logs to visualize the actual process flow.

* Process Conformance: Compares actual process execution against a reference model (e.g., BPMN) to identify deviations and non-compliance.

* Process Performance: Analyzes key performance indicators (KPIs) such as cycle time, cost, or bottlenecks to assess process efficiency." (SAP Signavio Process Intelligence Overview, section on "Core Capabilities of Process Mining").

* Explanation:

* Option B (Process Discovery, Process Conformance, Process Performance): This is correct as it matches the three primary capabilities of Process Mining in SAP Signavio. Process Discovery reveals the as-is process, Process Conformance ensures alignment with standards, and Process Performance evaluates efficiency metrics.

* Option A (Process Discovery, Process Conformance, Process Documentation) is incorrect because Process Documentation is a feature of SAP Signavio Process Manager, not a core Process Mining capability.

* Option C (Process Performance, Process Improvement, Process Automation) is incorrect as Process Improvement and Process Automation are outcomes or subsequent steps, not direct Process Mining capabilities.

* Option D (Process Conformance, Process Performance, Process Execution) is incorrect because Process Execution is not a recognized Process Mining capability; it refers to process runtime, not analysis.

Reference: SAP Signavio Process Intelligence Overview, section on "Core Capabilities of Process Mining"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Process Mining Features.

NEW QUESTION # 59

What is the purpose of the BPMN token concept for business process models?

- A. Visualizes the distribution of information
- B. Shows IT-system support and automation potential
- C. Determines a complexity score
- D. Explains the performing behavior

Answer: D

Explanation:

The BPMN token concept is a fundamental part of the BPMN notation, used to simulate the behavior of business processes during analysis and design phases. The correct answer is:

* Option A (Explains the performing behavior): The token concept in BPMN is primarily used to explain the performing behavior of a process. Tokens are used to simulate the flow through a process model, representing instances of the process as they move from start to end. This helps in understanding how tasks are executed in sequence or in parallel, and how decisions within the process flow influence the path taken by a process instance.

References:

* BPMN 2.0 Specification

* SAP Signavio Process Manager User Documentation

NEW QUESTION # 60

What is the Diagram Widget used for? Note: There are 2 correct answers to this question.

Answer:

Explanation:

A.D

NEW QUESTION # 61

How can you capture relevant process tasks in a table-based approach?

- A. Use Process Documentation Template
- B. Use QuickModel
- C. Use Process Reporting
- D. Use Graphical Editor

Answer: B

NEW QUESTION # 62

How do you filter all published processes in the workspace?

- A. Switch to Advanced Search, and select the field "Publishing state".
- B. Type the word "Publish" in the Search field and press Enter.
- C. Type the word "Publishing state" in the search field and press Enter.
- D. Switch to Advanced Search, and select the field "Publishing date".

Answer: C

NEW QUESTION # 63

.....

We provide online customer service to the customers for 24 hours per day and we provide professional personnel to assist the client in the long distance online. If you have any questions and doubts about the SAP Certified Associate - Process Data Analyst - SAP Signavio guide torrent we provide before or after the sale, you can contact us and we will send the customer service and the professional personnel to help you solve your issue about using C-SIGDA-2403 Exam Materials. The client can contact us by sending mails or contact us online. We will solve your problem as quickly as we can and provide the best service. Our after-sales service is great as we can solve your problem quickly and won't let your money be wasted. If you aren't satisfied with our C-SIGDA-2403 exam torrent you can return back the product and refund you in full.
