

Workday - Fantastic Workday-Prism-Analytics - Valid Workday Pro Prism Analytics Exam Exam Cram

What is Workday Prism Analytics?

BTW, DOWNLOAD part of Actual4test Workday-Prism-Analytics dumps from Cloud Storage: https://drive.google.com/open?id=1NSRS6aasqHY_b2plqWeUwNUhLv2s0m81

With all of these Workday-Prism-Analytics study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our Workday-Prism-Analytics training prep thoroughly. They are great help to catch on the real knowledge of Workday-Prism-Analytics exam and give you an unforgettable experience. Do no miss this little benefit we offer.

The Actual4test believes in customer satisfaction and strives hard to make the entire certification Workday Workday-Prism-Analytics exam journey the easiest and most successful. To meet this goal the Actual4test is offering the real, updated, and error-free Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) Questions in three different but easy-to-use formats. These Actual4test Workday-Prism-Analytics exam questions formats are web-based practice test software, desktop practice test software and Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) PDF dumps files.

Training Workday-Prism-Analytics Kit, Valid Workday-Prism-Analytics Test Labs

Our Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) practice exam can be modified in terms of length of time and number of questions to help you prepare for the Workday real test. We're certain that our Workday-Prism-Analytics Questions are quite similar to those on Workday-Prism-Analytics real exam since we regularly update and refine the product based on the latest exam content.

Workday Pro Prism Analytics Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

While viewing your lineage, you realize you have forgotten to add a description to some of your derived datasets. From the lineage, you double-click on a dataset to view the dataset details. What is the next step to add the missing descriptions?

- **A. Select Related Actions next to the dataset name and Edit Transformations.**
- B. Select Add Field from the dataset details to create a description.
- C. Select the pencil icon next to the dataset name and Edit Transformations.
- D. Select the pencil icon next to the Import stage to update the description.

Answer: A

Explanation:

To add or update the description of a derived dataset in Workday Prism Analytics, you should access the Edit Dataset Transformations task. This can be done by selecting the Related Actions next to the dataset name and choosing Edit Transformations. This method allows you to modify various aspects of the dataset, including its description.

This process is outlined in the Workday Prism Analytics User Guide, which states:

"If you have permission to edit a dataset, you can access the Edit Dataset Transformations task using these methods:

- * Right-click the dataset name on the Data Catalog report and select Edit Transformations.
- * Select Edit Transformations from the Quick Actions on the View Dataset Details report.
- * Access the Edit Dataset task and select the dataset name that you want to edit." Once in the Edit Dataset Transformations task, you can update the dataset's description by clicking on the configuration icon (often represented as a gear or pencil icon) and editing the description field.

Reference: Workday Prism Analytics User Guide, "Concept: Dataset Workspace" section

NEW QUESTION # 37

You are adding a Join stage and choose Join type of Left Outer Join, causing Workday to search for a matching row in the imported pipeline. What happens if no matching rows exist?

- A. Included fields from both pipelines will have NULL values.
- B. A duplicate row will be generated.
- **C. Included fields from the imported pipeline will have NULL values.**
- D. The row will be omitted.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Left Outer Join in a Join stage includes all rows from the primary pipeline (the left pipeline) and attempts to match them with rows from the imported pipeline (the right pipeline) based on the join condition. According to the official Workday Prism Analytics study path documents, if no matching rows exist in the imported pipeline for a given row in the primary pipeline, the row from the primary pipeline is still included in the output, but the fields from the imported pipeline will have NULL values. This behavior ensures that all data from the primary pipeline is retained, while the absence of a match in the imported pipeline is represented by NULLs for the corresponding fields.

The other options are incorrect:

- * A. A duplicate row will be generated: A Left Outer Join does not generate duplicate rows; duplicates would occur only if multiple matches exist in the imported pipeline, which is not the case here.
- * B. The row will be omitted: In a Left Outer Join, rows from the primary pipeline are never omitted, even if no match is found; this behavior is specific to an Inner Join.
- * D. Included fields from both pipelines will have NULL values: Only the fields from the imported pipeline will have NULL values; the fields from the primary pipeline retain their original values.

This behavior of Left Outer Join ensures that all records from the primary pipeline are preserved, with NULLs indicating the absence of matching data from the imported pipeline.

NEW QUESTION # 38

You want to use a custom report containing prompts as a source connection for a table. What must you ensure to make this possible?

- A. The report is built on an indexed data source.
- B. The prompts are mapped at the data change task level.
- **C. The custom report prompts have default values assigned on the report definition.**
- D. The prompts are marked as required.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when using a custom report with prompts as a source connection for a table, the custom report must be configured to ensure compatibility with the Prism data ingestion process. According to the official Workday Prism Analytics study path documents, the key requirement is that the custom report prompts have default values assigned in the report definition. This is necessary because Prism Analytics does not support interactive prompting during data ingestion. Default values ensure that the report can run automatically without requiring user input, allowing the Data Change task to retrieve the data consistently and load it into the target table.

The other options are not correct in this context:

* A. The report is built on an indexed data source: While indexed data sources can enhance performance for certain reports, they are not a requirement for using a custom report as a source for a Prism table.

* B. The prompts are mapped at the data change task level: Prompts are not mapped in the Data Change task; instead, the task relies on the report's default values to execute the data retrieval.

* D. The prompts are marked as required: Marking prompts as required does not address the need for automatic execution; default values are still needed to avoid manual intervention.

By assigning default values to prompts in the custom report definition, the report can be seamlessly integrated as a source connection for Prism Analytics, ensuring reliable data loading into the table.

NEW QUESTION # 39

When should a Prism configurator leverage advanced filter logic over basic filter logic?

- **A. The filter needs a combination of AND/OR operators.**
- B. The filter needs to use operators such as "equal to" or "not equal to".
- C. The filter needs to leverage operators such as "greater than or equal to" or "less than or equal to".
- D. The filter needs to remove NULL values.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, filters in a derived dataset can be applied using either basic (Simple) or advanced filter logic.

According to the official Workday Prism Analytics study path documents, a Prism configurator should leverage advanced filter logic over basic filter logic when the filter needs a combination of AND/OR operators (option A). Basic filter logic (Simple Filter) allows for a list of conditions with a single operator ("If All" for AND, "If Any" for OR), but it cannot handle nested or mixed logical expressions (e.g., Condition1 AND (Condition2 OR Condition3)). Advanced filter logic, on the other hand, supports complex expressions with combinations of AND and OR operators, enabling more sophisticated filtering scenarios.

The other options do not necessitate advanced filter logic:

* A. The filter needs to remove NULL values: Removing NULL values (e.g., using ISNOTNULL(field)) can be done with a Simple Filter using a single condition, so advanced logic is not required.

* B. The filter needs to use operators such as "equal to" or "not equal to": These operators are supported in Simple Filters, so advanced logic is not necessary.

* C. The filter needs to leverage operators such as "greater than or equal to" or "less than or equal to":

These comparison operators are also supported in Simple Filters, making advanced logic unnecessary for this purpose.

Advanced filter logic is specifically required when combining AND and OR operators to create complex filtering conditions,

providing the flexibility needed for such scenarios.

NEW QUESTION # 40

A Prism data administrator needs to add an Explode stage to a derived dataset to create a new single-instance type field. What is the only field type you can select in the Explode stage?

- A. Single-Instance
- B. Text
- C. Numeric
- **D. Multi-Instance**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, an Explode stage is used in a derived dataset to transform a multi-instance field into multiple rows, effectively creating single-instance fields for each instance. According to the official Workday Prism Analytics study path documents, the only field type you can select in the Explode stage is Multi-Instance (option B). A multi-instance field, often sourced from Workday data, contains multiple values for a single record (e.g., a list of certifications for a worker). The Explode stage "explodes" this field into separate rows, one for each instance, while converting the multi-instance field into a single-instance field in the output. For example, if a worker has three certifications in a multi-instance field, the Explode stage would create three rows, each with a single certification value.

The other options are incorrect:

* A. Numeric: Numeric fields are single-instance by nature and cannot be exploded, as they do not contain multiple values.

* C. Single-Instance: Single-instance fields contain one value per record and cannot be used in an Explode stage, which requires a multi-instance field to operate.

* D. Text: While a Text field can be single or multi-instance, the Explode stage specifically requires a Multi-Instance field, not just any Text field.

The requirement for a Multi-Instance field in the Explode stage ensures that the transformation can properly expand the data into multiple rows as intended.

NEW QUESTION # 41

.....

Workday-Prism-Analytics PDF questions can be read on various smart devices such as laptops, tablets, and smartphones.

Workday Workday-Prism-Analytics PDF format is easier to download and use. Our Workday Workday-Prism-Analytics exam questions in PDF file can be printed, making it easy to study via a hard copy. To be recognized by Workday Workday-Prism-Analytics candidates must pass the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) exam and the registration fee for the exam is high, between \$100 and \$1000. Therefore, candidates will never risk their precious time and money.

Training Workday-Prism-Analytics Kit: https://www.actual4test.com/Workday-Prism-Analytics_examcollection.html

Our actual lab questions are the positive results of many top IT experts in the world, all of the key points and the latest question patterns for the IT exam are included in our Workday-Prism-Analytics practice test, since there are no superfluous content in our study materials, you can finish practice all of the questions in our exam only in 20 to 30 hours, you need figure it out that the contents in our Workday-Prism-Analytics training materials are the panacea for the IT exam, after practicing you can feel that success is waiting for you, You fail, after you use our Workday Workday-Prism-Analytics dumps, 100% guarantee to FULL REFUND.

Now take a look at each link in turn, As freelancers they don't have job security or, in most cases, benefits, Our actual lab questions are the positive results of many top IT experts in the world, all of the key points and the latest question patterns for the IT exam are included in our Workday-Prism-Analytics Practice Test, since there are no superfluous content in our study materials, you can finish

practice all of the questions in our exam only in 20 to 30 hours, you need figure it out that the contents in our Workday-Prism-Analytics training materials are the panacea for the IT exam, after practicing you can feel that success is waiting for you.

Free PDF Quiz 2025 Workday-Prism-Analytics: Workday Pro Prism Analytics Exam – Reliable Valid Exam Cram

You fail, after you use our Workday Workday-Prism-Analytics dumps, 100% guarantee to FULL REFUND, Try our Workday-Prism-Analytics study materials, which are revised by hundreds of experts according Workday-Prism-Analytics to the changes in the syllabus and the latest developments in theory and practice.

After you finish the course, using your Workday-Prism-Analytics study plan, start your preparation, God wants me to be a person who have strength, rather than a good-looking doll.
