

Workday-Prism-Analytics Complete Exam Dumps - Certification Workday-Prism-Analytics Sample Questions

Workday Pro Prism Analytics Certification Exam Guide

BONUS!!! Download part of TorrentVCE Workday-Prism-Analytics dumps for free: https://drive.google.com/open?id=10yUHpDlknckw0hG8x1_fquqCCVs-p4MU

Workday-Prism-Analytics actual test not only are high-quality products, but also provided you with a high-quality service team. Our TorrentVCE platform is an authorized formal sales platform. Since the advent of Workday-Prism-Analytics prep torrent, our products have been recognized by thousands of consumers. Everyone in Workday-Prism-Analytics exam torrent ' team has gone through rigorous selection and training. We understand the importance of customer information for our customers. And we will strictly keep your purchase information confidential and there will be no information disclosure. At the same time, the content of Workday-Prism-Analytics Exam Torrent is safe and you can download and use it with complete confidence.

With vast experience in this field, TorrentVCE always comes forward to provide its valued customers with authentic, actual, and genuine Workday-Prism-Analytics exam dumps at an affordable cost. All the Workday-Prism-Analytics questions given in the product are based on actual examination topics. TorrentVCE regularly updates Workday-Prism-Analytics Practice Exam material to ensure that it keeps in line with the test. In the same way, TorrentVCE provides a free demo before you purchase so that you may know the quality of the Workday-Prism-Analytics dumps.

Certification Workday Workday-Prism-Analytics Sample Questions - New

Workday-Prism-Analytics Exam Name

Although a lot of products are cheap, but the quality is poor, perhaps users have the same concern for our Workday-Prism-Analytics learning materials. Here, we solemnly promise to users that our product error rate is zero. Everything that appears in our products has been inspected by experts. In our Workday-Prism-Analytics learning material, users will not even find a small error, such as spelling errors or grammatical errors. It is believed that no one is willing to buy defective products, so, the Workday-Prism-Analytics study materials have established a strict quality control system.

Workday Pro Prism Analytics Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

The Prism use case is to classify workers based on their pay. You must create a field that evaluates worker pay and returns a value that represents various pay ranges. How would you add this field for inclusion on the Prism data source?

- A. Add the additional field to your raw data before you ingest into Prism.
- B. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay.
- **C. Create a derived dataset and build a CASE calculated field to classify workers against their pay.**
- D. Build a CASE calculated field function on the TBL directly to ease later transformation.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, classifying workers into pay ranges based on their pay requires creating a new field that evaluates the pay values and assigns them to defined ranges (e.g., "Low," "Medium," "High").

According to the official Workday Prism Analytics study path documents, the recommended approach is to create a derived dataset (DDS) and build a CASE calculated field to classify workers against their pay (option B). The CASE function in a calculated field allows users to define conditional logic (e.g., CASE WHEN pay < 50000 THEN "Low" WHEN pay < 100000 THEN "Medium" ELSE "High" END), which is ideal for creating pay range classifications. This calculated field is added within a derived dataset, which can then be published as a Prism data source, making the new field available for reporting and analytics.

The other options are not optimal:

* A. Add the additional field to your raw data before you ingest into Prism: Modifying raw data outside Prism is unnecessary and less flexible, as Prism's transformation capabilities (like CASE) are designed for such tasks.

* C. Build a CASE calculated field function on the TBL directly to ease later transformation: Calculated fields cannot be created directly on a table (TBL) in Prism Analytics; they must be defined in a derived dataset.

* D. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay: Prism Analytics does not use "Prism business objects" for calculated fields, and "Evaluate Expression" is not a standard function; this option is not applicable.

Using a CASE calculated field in a derived dataset provides a flexible and maintainable way to classify workers by pay ranges, ensuring the field is included in the final Prism data source.

NEW QUESTION # 11

A Prism data administrator is ready to create a Prism data source. As data is updated in Prism, the goal is to update the data in the Prism data source concurrently, enabling immediate incremental updates. How should the administrator create the Prism data source?

- A. Create a table and select Publish.
- B. Set Data Source Security on a derived dataset and select Publish.
- C. Publish a derived dataset with the Prism Default to Dataset Access Domain.
- **D. Create a table and select the Enable for Analysis checkbox.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, creating a Prism data source that supports immediate incremental updates as data is updated in Prism requires a specific configuration. According to the official Workday Prism Analytics study path documents, the administrator should create a table and select the Enable for Analysis checkbox (option A). The "Enable for Analysis" option, when selected during table creation, allows the table to be used directly as a Prism data source with real-time updates. This setting ensures that as data in the table is updated (e.g., through a Data Change task), the changes are immediately reflected in the Prism data source, enabling incremental updates without the need for republishing. This is particularly useful for scenarios requiring near- real-time data availability in reporting or analytics.

The other options do not achieve the goal of immediate incremental updates:

* B. Create a table and select Publish: Publishing a table creates a static Prism data source, but updates to the table require republishing, which does not support immediate incremental updates.

* C. Publish a derived dataset with the Prism: Default to Dataset Access Domain: Publishing a derived dataset creates a data source, but updates to the underlying data require republishing the dataset, which is not concurrent or incremental.

* D. Set Data Source Security on a derived dataset and select Publish: Setting security and publishing a derived dataset follows the same process as option C, requiring republishing for updates, which does not meet the requirement for immediate updates.

Selecting the "Enable for Analysis" checkbox when creating a table ensures the Prism data source supports concurrent, incremental updates as data changes in Prism.

NEW QUESTION # 12

You have a number of Workday reports that use a Prism data source. When are the values of the Prism calculated fields in the Workday reports calculated?

- A. At time of publishing.
- B. At dataset creation time.
- C. At report run time.
- D. At the calculated field creation time.

Answer: A

NEW QUESTION # 13

A report that uses a Prism data source that you created has a brand new requirement that Expense Partner by Location should only see expense reports for workers for the locations they support. Given that you have the Location Hierarchy (instance) field in your dataset used for publishing, how can you adjust to meet the requirement?

- A. Run the Edit Data Source Security task to update row-level security and then republish the PDS.
- B. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS.
- C. Run the Edit Data Source Security task to update the Securing Entities.
- D. Run the Edit Data Source Security task to update row-level security.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, restricting access to specific rows in a Prism data source (PDS) based on a field like Location Hierarchy for users such as Expense Partners requires implementing row-level security.

According to the official Workday Prism Analytics study path documents, to meet the requirement that Expense Partners only see expense reports for the locations they support, you should run the Edit Data Source Security task to update row-level security and then republish the PDS (option B).

The Location Hierarchy (instance) field in the dataset can be used to define row-level security rules, ensuring that each Expense Partner only sees data for their assigned locations. The Edit Data Source Security task allows you to configure row-level security by mapping the Location Hierarchy field to the user's security profile (e.g., their assigned locations). After updating the security settings, republishing the Prism data source is necessary to apply the changes, ensuring the updated security rules take effect in the reports that use the data source.

The other options are incorrect:

* A. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS:

Securing Entities are used to control overall access to the data source (e.g., via security domains), not to restrict data at the row level

based on a field like Location Hierarchy.

* C. Run the Edit Data Source Security task to update row-level security: While updating row-level security is correct, the changes will not take effect in reports until the data source is republished, making this option incomplete.

* D. Run the Edit Data Source Security task to update the Securing Entities: As with option A, updating Securing Entities does not address row-level security for location-based restrictions.

Updating row-level security and republishing the PDS ensures that Expense Partners only see the relevant expense reports, meeting the requirement while maintaining security governance.

NEW QUESTION # 14

You created a derived dataset that imports data from a table, which will become your Stage 1. What can you add to this dataset?

- A. As many transformation stages of any type as long as they are in a particular order.
- B. Up to five transformation stages.
- C. Up to two Manage Fields transformation stages.
- **D. As many transformation stages of any type as your scenario requires.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a derived dataset (DDS) allows users to transform data by adding various transformation stages after the initial import stage (Stage 1). According to the official Workday Prism Analytics study path documents, you can add as many transformation stages of any type as your scenario requires (option A). Prism Analytics supports a variety of transformation stages, such as Join, Union, Filter, Manage Fields, and Calculate Field, among others. There are no strict limits on the number of stages or their types, and they can be added in any order that makes sense for the data transformation logic, as long as the stages are configured correctly to produce the desired output. This flexibility allows users to build complex transformation pipelines tailored to their specific use case.

The other options are incorrect:

* B. As many transformation stages of any type as long as they are in a particular order: While the order of stages matters for the transformation logic (e.g., a Filter before a Join), there is no predefined order requirement for all stages; the order depends on the scenario.

* C. Up to five transformation stages: There is no limit of five transformation stages in Prism Analytics; you can add more as needed.

* D. Up to two Manage Fields transformation stages: There is no restriction to only two Manage Fields stages; you can add as many as required.

The ability to add as many transformation stages as needed provides maximum flexibility in shaping the data within a derived dataset.

NEW QUESTION # 15

.....

The actual Workday Prism Analytics exam questions are in PDF format for the one who wants to study offline. The actual Workday Prism Analytics exam questions are in simple PDF form. The PDF format is suitable both for smartphones as well as tablets. You can print documents and study anywhere. The plus point is that the PDF version is updated regularly to improve its Workday-Prism-Analytics Exam Questions and reflect changes in the syllabus of the exam.

Certification Workday-Prism-Analytics Sample Questions: <https://www.torrentvce.com/Workday-Prism-Analytics-valid-vce-collection.html>

Workday-Prism-Analytics materials are not only the more convenient way to pass exam, but at only little time and money you get can access to all of the exams from every certification vendor, We can assure to all people that our Workday-Prism-Analytics study materials will have a higher quality and it can help all people to remain an optimistic mind when they are preparing for the Workday-
