

Workday-Prism-Analytics Paper | Workday-Prism-Analytics Reliable Exam Vce

P.S. Free 2025 Workday Workday-Prism-Analytics dumps are available on Google Drive shared by CertkingdomPDF:
<https://drive.google.com/open?id=1H7BpasS7TA5lmx80k8hJPIY1YWjOHnN2>

Our Workday Pro Prism Analytics Exam test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our Workday-Prism-Analytics certification training continued to pursue our passion for advanced performance and human-centric technology. Only 20-30 hours are needed for you to learn and prepare our Workday-Prism-Analytics test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our Workday-Prism-Analytics Exam Materials you will save your time and energy and focus your attention mainly on your most important thing. You only need several hours to learn and prepare for the exam every day.

The software keeps track of the previous Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) practice test immediately, which is an excellent way to understand which area needs more attention.

Workday-Prism-Analytics Paper Exam Pass at Your First Attempt | Workday-Prism-Analytics Reliable Exam Vce

The CertkingdomPDF guarantees their customers that if they have prepared with Workday Workday-Prism-Analytics practice test, they can pass the Workday Workday-Prism-Analytics certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual Workday Workday-Prism-Analytics Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score.

Workday Pro Prism Analytics Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23

You accidentally delete a Prism calculated field that is used in other Prism calculated fields or conditions. What is a possible outcome?

- A. The system will automatically adjust any dependencies accordingly.
- **B. Errors will result in any stage or calculated field that references the field.**
- C. The system will automatically reverse the deletion because the field is referenced elsewhere.
- D. Any calculated field referencing the deleted field defaults to zero.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, calculated fields are often interdependent, with one calculated field referencing another in its expression or being used in conditions within a dataset's transformation stages. According to the official Workday Prism Analytics study path documents, if a calculated field is deleted while other calculated fields or conditions depend on it, the system does not automatically handle the dependency. Instead, this deletion will cause errors in any stage or calculated field that references the deleted field. These errors occur because the dependent calculations or conditions can no longer resolve the reference to the deleted field, leading to failures in the dataset's transformation pipeline or when the dataset is processed or published.

The other options are incorrect:

A: The system will automatically reverse the deletion because the field is referenced elsewhere: Prism Analytics does not have an automatic reversal mechanism for deletions; users must manually restore the field if needed.

B: Any calculated field referencing the deleted field defaults to zero: The system does not default to zero; it will instead throw an error due to the unresolved reference.

D: The system will automatically adjust any dependencies accordingly: Prism does not automatically adjust dependencies; the user must manually update the dependent fields or conditions to resolve the issue.

The resulting errors highlight the importance of carefully managing dependencies when deleting calculated fields, ensuring that all references are updated or removed to avoid disruptions in the dataset's transformation logic.

NEW QUESTION # 24

For a Prism use case, you have two datasets: one contains daily sales data, and the other contains monthly budget allocations. Before performing a join between these datasets, what transformation stage should you apply to the sales data to ensure it matches the granularity of the budget data?

- A. Manage Fields
- B. Union
- C. Filter
- **D. Group By**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, joining datasets with different levels of granularity requires aligning their granularity to ensure a meaningful match. The sales data is at a daily level (one row per day), while the budget data is at a monthly level (one row per month). According to the official Workday Prism Analytics study path documents, to match the granularity of the monthly budget data, you should apply a Group By stage to the sales data (option B). The Group By stage aggregates the daily sales data into monthly totals (e.g., summing sales amounts by month), reducing the granularity from daily to monthly. This allows the sales data to be joined with the monthly budget data on a common key, such as the month.

For example, a Group By stage could group the sales data by a derived month field (e.g., using a function like `EXTRACT(YEAR_MONTH, sale_date)`) and aggregate the sales amounts using a function like `SUM(sales_amount)`. The resulting dataset would have one row per month, matching the budget data's granularity.

The other options are incorrect:

* A. Union: A Union stage appends rows from one dataset to another but does not change granularity; it cannot aggregate daily data into monthly data.

* C. Manage Fields: The Manage Fields stage modifies field properties (e.g., type, name) but does not aggregate data to change

granularity.

* D. Filter: A Filter stage removes rows based on conditions but does not aggregate data to align granularity levels.

The Group By stage is the appropriate transformation to align the sales data's granularity with the monthly budget data for a successful join.

NEW QUESTION # 25

What report can you run to edit and maintain your Prism import and publish schedules?

- A. Prism Usage
- B. Prism Activities Monitor
- C. Prism Management Console
- **D. Scheduled Future Processes**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, managing schedules for importing data into tables or publishing datasets as Prism data sources is a key administrative task. According to the official Workday Prism Analytics study path documents, the Scheduled Future Processes report (option A) is the tool used to edit and maintain Prism import and publish schedules. This report provides a centralized view of all scheduled processes in Workday, including Prism-related tasks such as Data Change tasks (for imports) and dataset publish schedules. Users can access this report to view, edit, or cancel scheduled processes, ensuring that data imports and publishes occur at the desired frequency and time.

The other options are incorrect:

* B. Prism Management Console: The Prism Management Console provides an overview of Prism activities and resources but does not allow for editing or maintaining schedules.

* C. Prism Activities Monitor: This report monitors the status of Prism activities (e.g., running or completed tasks) but does not manage schedules.

* D. Prism Usage: The Prism Usage report tracks usage metrics for Prism Analytics but does not handle scheduling tasks.

The Scheduled Future Processes report is the correct tool for managing Prism import and publish schedules, ensuring efficient data updates.

NEW QUESTION # 26

You want to use a custom report containing prompts as a source connection for a table. What must you ensure to make this possible?

- A. The report is built on an indexed data source.
- B. The prompts are marked as required.
- C. The prompts are mapped at the data change task level.
- **D. The custom report prompts have default values assigned on the report definition.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when using a custom report with prompts as a source connection for a table, the custom report must be configured to ensure compatibility with the Prism data ingestion process. According to the official Workday Prism Analytics study path documents, the key requirement is that the custom report prompts have default values assigned in the report definition. This is necessary because Prism Analytics does not support interactive prompting during data ingestion. Default values ensure that the report can run automatically without requiring user input, allowing the Data Change task to retrieve the data consistently and load it into the target table.

The other options are not correct in this context:

- * A. The report is built on an indexed data source: While indexed data sources can enhance performance for certain reports, they are not a requirement for using a custom report as a source for a Prism table.
- * B. The prompts are mapped at the data change task level: Prompts are not mapped in the Data Change task; instead, the task relies on the report's default values to execute the data retrieval.
- * D. The prompts are marked as required: Marking prompts as required does not address the need for automatic execution; default values are still needed to avoid manual intervention.

By assigning default values to prompts in the custom report definition, the report can be seamlessly integrated as a source connection for Prism Analytics, ensuring reliable data loading into the table.

NEW QUESTION # 27

A Prism data administrator needs to add an Explode stage to a derived dataset to create a new single-instance type field. What is the only field type you can select in the Explode stage?

- A. Text
- B. Numeric
- C. Single-Instance
- **D. Multi-Instance**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, an Explode stage is used in a derived dataset to transform a multi-instance field into multiple rows, effectively creating single-instance fields for each instance. According to the official Workday Prism Analytics study path documents, the only field type you can select in the Explode stage is Multi-Instance (option B). A multi-instance field, often sourced from Workday data, contains multiple values for a single record (e.g., a list of certifications for a worker). The Explode stage "explodes" this field into separate rows, one for each instance, while converting the multi-instance field into a single-instance field in the output. For example, if a worker has three certifications in a multi-instance field, the Explode stage would create three rows, each with a single certification value.

The other options are incorrect:

- * A. Numeric: Numeric fields are single-instance by nature and cannot be exploded, as they do not contain multiple values.
- * C. Single-Instance: Single-instance fields contain one value per record and cannot be used in an Explode stage, which requires a multi-instance field to operate.
- * D. Text: While a Text field can be single or multi-instance, the Explode stage specifically requires a Multi-Instance field, not just any Text field.

The requirement for a Multi-Instance field in the Explode stage ensures that the transformation can properly expand the data into multiple rows as intended.
