For example, our Workday-Pro-HCM-Core prepare questions are the learning product that best meets the needs of all users. There are three version of our Workday-Pro-HCM-Core training prep: PDF, Soft and APP versions. And you can free download the demo of our Workday-Pro-HCM-Core learning guide before your payment. Just rush to buy our Workday-Pro-HCM-Core exam braindump!

Workday Pro HCM Core Certification Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

You need to create a new supervisory organization and it needs to inherit attributes from an existing supervisory organization. What task do you use?

- **A. Create Subordinate**
- B. Assign Roles
- C. Assign Included Organizations
- D. Create Supervisory Organization

Answer: A

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organizations Setup and Management Guide 2023R2):

When creating a new supervisory organization that should inherit attributes such as staffing model, company, and cost center from an existing organization, you use the Create Subordinate task.

This task creates the new subordinate organization directly under a superior supervisory organization. It automatically copies inherited settings such as visibility, organization assignments, and staffing model, ensuring hierarchical alignment and simplifying setup.

Option B (Create Supervisory Organization) creates a brand-new top-level supervisory org without inheritance.

Option A (Assign Roles) only assigns role-based permissions after creation.

Option C (Assign Included Organizations) is used for related org relationships, not for hierarchical creation.

Thus, Create Subordinate is the correct task when the new org must inherit settings from a superior one.

Reference (Paraphrased Source):

Workday Pro HCM Core - Organizations Configuration Guide (2023R2), Section: "Creating Subordinate Supervisory Organizations and Inherited Attributes."

NEW QUESTION # 31

You need to prevent Contingent Workers from accessing the Pay App (Delivered Worklet) on their Home landing page. How do you accomplish this?

- A. Add the security group to the domain security policy.
- **B. Remove the security group from the domain security policy.**
- C. Remove the security group from the business process security policy.
- D. Add the security group to the business process security policy.

Answer: B

Explanation:

To prevent Contingent Workers from accessing the Pay app (worklet), the correct action is to remove their associated security group from the domain security policy that governs access to the pay-related data.

Workday uses domain security policies to control access to data and reports, including worklets on the home page. The Pay worklet is driven by access to certain domains such as "View Payslip," "View Pay Results," and "Worker Pay." If Contingent Workers are part of a security group (e.g., Contingent Worker View Only) that is granted access to these domains, they will see the Pay worklet. By removing this group from the domain policy, you revoke their access to the data and thus remove the visibility of the worklet itself. Workday Pro HCM -Core Security Fundamentals, "Domain Security Policies and Worklet Access" section.

NEW QUESTION # 32

Which staffing models are available for supervisory organizations? (Select two correct answers.)

- A. Customer Defined Staffing Model

- B. Job Management
- C. Headcount Management
- D. Position Management

Answer: B,D

Explanation:

The correct answers are C - Position Management and D - Job Management.

In Workday, supervisory organizations can only use one of two delivered staffing models:

* Position Management: Each position is a distinct entity that must be created and approved before hiring. It supports detailed tracking of vacancies and headcount.

* Job Management: Hiring is managed at the job level, allowing multiple workers to be hired under a single job requisition without individual position control.

Workday does not deliver "Headcount Management" or "Customer Defined Staffing Models" as valid options.

The staffing model is selected when creating or editing a supervisory organization and determines how headcount, hiring, and reporting are managed.

Reference: Workday Pro HCM - Staffing Models Overview, "Position Management vs. Job Management."

NEW QUESTION # 33

What HR organization type is required for every worker?

- A. Matrix
- B. Supervisory
- C. Company
- D. Cost Center

Answer: B

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organizations and Staffing Structure Guide, 2023R2):

In Workday, every worker must belong to exactly one Supervisory Organization. The Supervisory Organization defines the management hierarchy and reporting structure for workers and positions. It serves as the foundation for staffing, business process routing, security role assignment, and approval workflows.

When hiring or transferring a worker, assigning them to a supervisory organization ensures that the worker's manager, HR partner, and other role-based participants are correctly identified. Without this relationship, the worker cannot be successfully staffed or managed within the tenant.

Options B (Matrix), C (Cost Center), and D (Company) may also be required for organizational reporting or accounting, but only Supervisory Organizations are mandatory for all workers because they define managerial oversight and operational hierarchy.

Reference (Paraphrased Source):

Workday Pro HCM Core - Organizations Configuration Guide (2023R2), Section: "Supervisory Organizations as the Basis of Staffing Structure."

NEW QUESTION # 34

What is a Workday standard report?

- A. A delivered predefined report
- B. An ad-hoc report for on-the-fly analytics
- C. A customized report for specific organizational needs
- D. A report to export data for external analysis

Answer: A

Explanation:

A Workday standard report refers to a delivered, predefined report that is built and maintained by Workday.

These reports are available out-of-the-box and are designed to support common and essential business processes and analytics across HCM, Finance, and other Workday modules. Users can run standard reports immediately without needing to create them from scratch, and they often serve as a base for custom reporting when further refinement or filtering is necessary.

Workday provides hundreds of these reports covering a broad range of functionality—examples include

"Employee Roster", "All Positions", "Business Process Transactions", etc. These reports are typically domain-secured, which means access to them is governed by user security and data access permissions.

As per the Workday Pro HCM Reporting Study Guide, standard reports are also known as "delivered reports" and often include pre-configured prompts and formatting that align with Workday best practices.

Workday Pro HCM -Reporting and Analytics Fundamentals, "Standard Reports Overview" section.
