

# Workday Workday-Prism-Analytics Questions and Start Preparation Today [2025]

DOWNLOAD the newest Prep4sures Workday-Prism-Analytics PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=1P7lkipWOjq2WW0LF1ahYAI-1crSDjZD>

The Workday Workday-Prism-Analytics exam offers a great opportunity for beginner and experienced to validate their expertise in a short time period. To do this they just need to pass the Workday Pro Prism Analytics Exam Workday-Prism-Analytics Certification Exam which is not an easy task. And Prep4sures offers latest Workday-Prism-Analytics exam practice, exam pattern and practice exam online.

At the Prep4sures, we guarantee that our customers will receive the best possible Workday-Prism-Analytics study material to pass the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) certification exam with confidence. Joining this site for the Workday-Prism-Analytics exam preparation would be the greatest solution to the problem of outdated material. The Workday-Prism-Analytics would assist applicants in preparing for the Workday Workday-Prism-Analytics Exam successfully in one go. Workday-Prism-Analytics would provide Workday-Prism-Analytics candidates with accurate and real Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) Dumps which are necessary to clear the Workday-Prism-Analytics test quickly. Students will feel at ease since the content they are provided with is organized rather than dispersed.

## Workday Workday-Prism-Analytics Exam | Workday-Prism-Analytics Latest Braindumps Pdf - Ensure You Pass Workday-Prism-Analytics Exam For Sure

Tech firms award high-paying job contracts to Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) certification holders. Every year many aspirants appear in the Workday-Prism-Analytics test of the certification, but few of them cannot crack it because of not finding reliable Workday Pro Prism Analytics Exam prep materials. So, you must prepare with real exam questions to pass the certification exam. If you don't rely on actual exam questions, you will fail and lose time and money.

### Workday Pro Prism Analytics Exam Sample Questions (Q47-Q52):

#### NEW QUESTION # 47

When should a Prism configurator leverage advanced filter logic over basic filter logic?

- A. The filter needs to leverage operators such as "greater than or equal to" or "less than or equal to".
- B. The filter needs to remove NULL values.
- C. The filter needs to use operators such as "equal to" or "not equal to".
- **D. The filter needs a combination of AND/OR operators.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, filters in a derived dataset can be applied using either basic (Simple) or advanced filter logic. According to the official Workday Prism Analytics study path documents, a Prism configurator should leverage advanced filter logic over basic filter logic when the filter needs a combination of AND/OR operators (option D). Basic filter logic (Simple Filter) allows for a list of conditions with a single operator ("If All" for AND, "If Any" for OR), but it cannot handle nested or mixed logical expressions (e.g., Condition1 AND (Condition2 OR Condition3)). Advanced filter logic, on the other hand, supports complex expressions with combinations of AND and OR operators, enabling more sophisticated filtering scenarios.

The other options do not necessitate advanced filter logic:

\* A. The filter needs to remove NULL values: Removing NULL values (e.g., using ISNOTNULL(field)) can be done with a Simple Filter using a single condition, so advanced logic is not required.

\* B. The filter needs to use operators such as "equal to" or "not equal to": These operators are supported in Simple Filters, so advanced logic is not necessary.

\* C. The filter needs to leverage operators such as "greater than or equal to" or "less than or equal to":

These comparison operators are also supported in Simple Filters, making advanced logic unnecessary for this purpose.

Advanced filter logic is specifically required when combining AND and OR operators to create complex filtering conditions, providing the flexibility needed for such scenarios.

### NEW QUESTION # 48

You created a derived dataset that imports data from a table, which will become your Stage 1. What can you add to this dataset?

- A. As many transformation stages of any type as your scenario requires.
- B. Up to two Manage Fields transformation stages.
- C. As many transformation stages of any type as long as they are in a particular order.
- D. Up to five transformation stages.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a derived dataset (DDS) allows users to transform data by adding various transformation stages after the initial import stage (Stage 1). According to the official Workday Prism Analytics study path documents, you can add as many transformation stages of any type as your scenario requires (option A). Prism Analytics supports a variety of transformation stages, such as Join, Union, Filter, Manage Fields, and Calculate Field, among others. There are no strict limits on the number of stages or their types, and they can be added in any order that makes sense for the data transformation logic, as long as the stages are configured correctly to produce the desired output. This flexibility allows users to build complex transformation pipelines tailored to their specific use case.

The other options are incorrect:

\* B. As many transformation stages of any type as long as they are in a particular order: While the order of stages matters for the transformation logic (e.g., a Filter before a Join), there is no predefined order requirement for all stages; the order depends on the scenario.

\* C. Up to five transformation stages: There is no limit of five transformation stages in Prism Analytics; you can add more as needed.

\* D. Up to two Manage Fields transformation stages: There is no restriction to only two Manage Fields stages; you can add as many as required.

The ability to add as many transformation stages as needed provides maximum flexibility in shaping the data within a derived dataset.

### NEW QUESTION # 49

You want to configure access to a published Prism data source to use it in reporting and discovery boards.

What action must you take?

- A. Schedule the recurring publish process.
- B. Share the imported Workday report to provide users with access to the published Prism data source.

- C. Share the dataset with appropriate users.
- D. Edit the data source security and select a domain.

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, configuring access to a published Prism data source for use in reporting and discovery boards requires managing its security settings. According to the official Workday Prism Analytics study path documents, the necessary action is to edit the data source security and select a domain (option A).

After a dataset is published as a Prism data source, access is controlled through security domains. By editing the data source security and assigning it to an appropriate security domain (e.g., a domain that grants access to specific user groups like report writers or analysts), you ensure that authorized users can access the data source for reporting and discovery boards. This aligns with Workday's configurable security framework, ensuring that only users with the appropriate permissions can view or use the data source.

The other options are incorrect:

\* B. Share the dataset with appropriate users: Sharing the dataset itself does not grant access to the published Prism data source; access to the data source is controlled through its security settings, not the dataset's sharing settings.

\* C. Share the imported Workday report to provide users with access to the published Prism data source:

Sharing an imported Workday report does not affect access to the Prism data source; the data source's security must be configured directly.

\* D. Schedule the recurring publish process: Scheduling a recurring publish process ensures the data source is updated regularly, but it does not configure access for reporting or discovery boards.

Editing the data source security and selecting a domain is the critical step to enable access for reporting and discovery boards.

## NEW QUESTION # 50

Using three different source files, you want to load rows of data into an empty table through a Data Change task. What needs to be the same about the three source files?

- A. Schema
- B. Size
- C. Source
- D. Naming convention

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Data Change task is used to load or update data into a table, which can involve importing data from multiple source files. According to the official Workday Prism Analytics study path documents, when loading rows from multiple source files into an empty table, the source files must share the same schema. The schema defines the structure of the data, including the column names, data types, and their order, which ensures that the data from all source files can be consistently mapped and loaded into the target table without errors.

The schema is critical because the Data Change task relies on a predefined table structure to process the incoming data. If the schemas of the source files differ (e.g., different column names or data types), the task will fail due to inconsistencies in data mapping. The other options are not required to be the same:

\* Source: The source files can originate from different systems or locations (e.g., Workday, external systems, or file uploads) as long as the schema aligns.

\* Naming convention: The names of the source files do not need to follow a specific convention for the Data Change task to process them.

\* Size: The size of the source files (e.g., number of rows or file size) can vary, as the task processes the data based on the schema, not the volume.

Thus, the requirement for the source files to have the same schema ensures seamless data loading into the table, maintaining data integrity and consistency during the transformation process.

### NEW QUESTION # 51

You want to remove data within a Prism data source without deleting any dependent custom reports. What task can you use to do this?

- **A. Delete Published Rows**
- B. Delete Dataset
- C. Inactivate Dataset
- D. Unpublish Dataset

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, removing data from a Prism data source (PDS) without affecting dependent custom reports requires a careful approach to preserve the data source's structure and dependencies.

According to the official Workday Prism Analytics study path documents, the task to use is Delete Published Rows (option D). This task removes the data rows within the Prism data source while keeping the data source's metadata (e.g., field definitions) and structure intact. Since custom reports depend on the data source's structure rather than the specific data rows, deleting the published rows will not break the reports. After deleting the rows, you can republish the dataset with updated data, and the reports will continue to function with the new data, assuming the structure remains unchanged.

The other options are incorrect:

\* A. Inactivate Dataset: Inactivating a dataset disables it but does not remove data from the published data source, and it may still affect reports by making the data source inaccessible.

\* B. Delete Dataset: Deleting the dataset entirely will also delete the Prism data source, breaking any dependent custom reports.

\* C. Unpublish Dataset: Unpublishing the dataset removes the Prism data source, which will break dependent reports until the dataset is republished.

The Delete Published Rows task ensures that data is removed from the Prism data source without impacting the dependent custom reports, allowing for seamless data updates.

### NEW QUESTION # 52

.....

Now passing Workday-Prism-Analytics exam is not easy, so choosing a good training tool is a guarantee of success to get the Workday-Prism-Analytics certificate. If you choose our Workday-Prism-Analytics exam materials, we will free update within one year after you purchase. That is to say we can ensure that we will provide you with exam information and exam practice questions and answers immediately. It can let you be fully prepared for exam, and almost have 100% pass rate of Workday-Prism-Analytics Exam. We can not only allow you for the first time to participate in Workday-Prism-Analytics exam to pass it successfully, but also help you save a lot of valuable. Don't miss such a good opportunity because of your hesitation.
