# XSIAM-Analyst New Exam Bootcamp - Reliable XSIAM-Analyst Dumps Ppt

The certification is necessary to get a job in your desired Palo Alto Networks company. Success in the test gives you an edge over the others because you will have certified skills that will make a good impression on the interviewer. Most people preparing for the Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) exam are confused about preparation. How will they get real and updated Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) exam questions? In the case of studying with outdated Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) practice questions, you will fail and lose your resources.

The Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) practice questions are designed by experienced and qualified XSIAM-Analyst exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) exam dumps. So rest assured that with the Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) exam dumps preparation but also get deep insight knowledge about Palo Alto Networks XSIAM-Analyst exam topics. So download Palo Alto Networks XSIAM Analyst (XSIAM-Analyst) exam questions now and start this journey.

# Reliable XSIAM-Analyst Dumps Ppt - Exam XSIAM-Analyst Simulator Free

Passing the XSIAM-Analyst exam has never been so efficient or easy when getting help from our XSIAM-Analyst training materials. This way is not only financially accessible, but time-saving and comprehensive to deal with the important questions emerging in the real exam. All exams from different suppliers will be easy to handle. Actually, this XSIAM-Analyst Exam is not only practical for working or studying conditions, but a manifest and prestigious show of your personal ability.

# Palo Alto Networks XSIAM Analyst Sample Questions (Q151-Q156):

# **NEW QUESTION #151**

What is the expected behavior when querying a data model with no specific fields specified in the query?

- A. The xdm core fieldset will be returned by default.
- B. The query will error out and not run.
- C. No fields will be returned by default.
- D. The default dataset=xdr data fields will be returned.

# Answer: A

## Explanation:

The correct answer is D - The xdm\_core fieldset will be returned by default.

In Cortex XSIAM, when no specific fields are selected in a data model query, thexdm\_core fieldset(which contains essential, core fields of the dataset) is automatically returned. This ensures analysts always have a baseline set of meaningful information in the results, even when fields are not explicitly specified.

"When no fields are specified in a data model query, Cortex XSIAM defaults to returning the xdm\_core fieldset, which contains key

# **NEW QUESTION #152**

Which of the following best defines a Cortex Data Model (XDM)? Response:

- A. A policy validation tool
- B. A script engine for executing remediation
- C. A user-specific threat intelligence feed
- D. A predefined schema for organizing and querying telemetry data

#### Answer: D

## **NEW QUESTION # 153**

What is required to create a custom prioritization rule in Cortex XSIAM? Response:

- A. Access to Cortex CLI
- B. Specific alert attributes or tags
- C. Scheduled report exports
- D. Read-only role permissions

#### Answer: B

## **NEW QUESTION #154**

Match each component of custom prioritization with its use:

Component

- A) Alert tag condition
- B) Endpoint group mapping
- C) Alert field weight
- D) Scoring rule

Use Case

- 1. Modify score for specific alert types
- 2. Elevate scoring for high-value assets
- 3. Increase impact of certain alert attributes
- 4. Combine logic to adjust incident priority

# Response:

- A. A-1, B-2, C-4, D-3
- B. A-1, B-2, C-3, D-4
- C. A-4, B-2, C-3, D-1
- D. A-1, B-3, C-2, D-4

## Answer: C

# **NEW QUESTION #155**

A Cortex XSIAM analyst in a SOC is reviewing an incident involving a workstation showing signs of a potential breach. The incident includes an alert from Cortex XDR Analytics Alert source "Remote service command execution from an uncommon source." As part of the incident handling process, the analyst must apply response actions to contain the threat effectively.

Which initial Cortex XDR agent response action should be taken to reduce attacker mobility on the network?

- A. Isolate Endpoint: Prevent the endpoint from communicating with the network
- B. Block IP Address: Prevent future connections to the IP from the workstation
- C. Terminate Process: Stop the suspicious processes identified
- D. Remove Malicious File: Delete the malicious file detected

#### Answer: A

Explanation:

The correct answer is A - Isolate Endpoint.

The most effective initial response to contain a breach and reduce attacker mobility is toisolate the endpoint.

This action ensures that the compromised machine can no longer communicate with the network or external systems, effectively cutting off lateral movement and exfiltration by attackers, while still allowing controlled response operations.

"Isolate Endpoint is the primary response action used to immediately contain a threat by severing all network communication, thus limiting attacker movement during active incidents." Document Reference: EDU-270c-10-lab-guide\_02.docx (1).pdf Page: Page 40 (Incident Handling/SOC section)
