The Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) certification is a valuable credential that assists you to enhance your existing skills and experience. By doing this you can stay updated and competitive in the market and achieve your career objectives in a short time period. To do this you just need to pass the one Workday Pro Prism Analytics Exam exam. Are you ready for this? If yes then enroll in Workday Workday-Prism-Analytics Exam Dumps and start this journey with 2Pass4sure. The 2Pass4sure offers real, valid, and updated Workday-Prism-Analytics Questions that surely will help you in exam preparation and enable you to pass the challenging Workday-Prism-Analytics exam with flying colors.

No software installation is required to go through the web-based Workday Workday-Prism-Analytics practice test. The PDF file of Workday-Prism-Analytics real exam questions is easy to use on laptops, tablets, and smartphones. We have added all the Workday Workday-Prism-Analytics Questions, which have a chance to appear in the Workday-Prism-Analytics real test. Our Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) dumps PDF exam questions are beneficial to prepare for the test in less time.

>> Workday-Prism-Analytics Reliable Test Experience <<

100% Pass Workday - Workday-Prism-Analytics - Workday Pro Prism Analytics Exam –High Pass-Rate Reliable Test Experience

You may feel astonished and doubtful about this figure; but we do make our Workday-Prism-Analytics exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our Workday-Prism-Analytics test braindumps have grown up and have made huge progress. Our Workday-Prism-Analytics Exam Dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the Workday certification.

Workday Pro Prism Analytics Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

What task or report should you access to view a Prism data source?

- A. View Dataset Details report
- B. Edit Data Source Security task
- **C. View Prism Data Source report**
- D. Edit Dataset Transformations task

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.

The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.

The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

NEW QUESTION # 43

The Prism use case is to classify workers based on their pay. You must create a field that evaluates worker pay and returns a value that represents various pay ranges. How would you add this field for inclusion on the Prism data source?

- **A. Create a derived dataset and build a CASE calculated field to classify workers against their pay.**
- B. Add the additional field to your raw data before you ingest into Prism.
- C. Build a CASE calculated field function on the TBL directly to ease later transformation.
- D. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, classifying workers into pay ranges based on their pay requires creating a new field that evaluates the pay values and assigns them to defined ranges (e.g., "Low," "Medium," "High").

According to the official Workday Prism Analytics study path documents, the recommended approach is to create a derived dataset (DDS) and build a CASE calculated field to classify workers against their pay (option B). The CASE function in a calculated field allows users to define conditional logic (e.g., CASE WHEN pay < 50000 THEN "Low" WHEN pay < 100000 THEN "Medium" ELSE "High" END), which is ideal for creating pay range classifications. This calculated field is added within a derived dataset, which can then be published as a Prism data source, making the new field available for reporting and analytics.

The other options are not optimal:

- * A. Add the additional field to your raw data before you ingest into Prism: Modifying raw data outside Prism is unnecessary and less flexible, as Prism's transformation capabilities (like CASE) are designed for such tasks.
- * C. Build a CASE calculated field function on the TBL directly to ease later transformation: Calculated fields cannot be created directly on a table (TBL) in Prism Analytics; they must be defined in a derived dataset.
- * D. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay: Prism Analytics does not use "Prism business objects" for calculated fields, and "Evaluate Expression" is not a standard function; this option is not applicable.

Using a CASE calculated field in a derived dataset provides a flexible and maintainable way to classify workers by pay ranges, ensuring the field is included in the final Prism data source.

NEW QUESTION # 44

You are asked to produce a Prism data source, which is going to be used in a matrix report that should display the minimum, maximum, total, average, and the median purchase order amount by location and month. What should you do to achieve the desired result?

- A. Add a Group By stage to your derived dataset.
- **B. Publish your detail data and build the summarizations in the matrix report.**
- C. Publish your detail data and build the summarizations in the advanced report.
- D. Add two Group By stages to your derived dataset.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a matrix report in Workday is designed to display summarized data in a grid format, with built-in capabilities to calculate aggregations like minimum, maximum, total, average, and median. According to the official Workday Prism Analytics study path documents, to produce a Prism data source for a matrix report that needs to display the minimum, maximum, total, average, and median purchase order amount by location and month, you should publish your detail data and build the summarizations in the matrix report (option A).

Publishing the detail data (i.e., the raw purchase order data with fields like location, month, and amount) as a Prism data source allows the matrix report to access the granular data. The matrix report can then apply the required aggregations (MIN, MAX, SUM, AVG, MEDIAN) directly, grouping by location and month as specified in the report configuration. This approach leverages Workday's reporting capabilities, reducing the need for additional transformations in Prism and ensuring flexibility for future reporting needs.

The other options are less efficient:

* B. Add a Group By stage to your derived dataset: A Group By stage in the derived dataset can compute some aggregations (e.g., SUM, AVG), but Prism does not natively support calculating the median in a Group By stage, and it would require multiple stages or calculated fields to compute all metrics, making it less practical than using the matrix report.

* C. Publish your detail data and build the summarizations in the advanced report: While an advanced report can perform some summarizations, it is not as well-suited as a matrix report for displaying multiple aggregations (like median) in a grid format by location and month.

* D. Add two Group By stages to your derived dataset: Using two Group By stages is unnecessary and still does not address the limitation of calculating the median in Prism, making this approach overly complex.

Publishing the detail data and letting the matrix report handle the summarizations is the most efficient and effective way to meet the requirements.

NEW QUESTION # 45

You explode the Language Skills multi-instance field on your derived dataset and you want to change the business object that the new Language Skills Exploded instance field is mapped to. What steps should you take?

- A. Click on the Related Actions next to the business object in the insight panel.
- B. Select from the list of suggested BO values in the Explode stage configuration.
- **C. Add a Manage Fields after the Explode stage and modify the business object.**
- D. Add a Manage Fields before the Explode stage and modify the business object.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, the Explode stage transforms a multi-instance field (e.g., Language Skills) into multiple rows, creating a new single-instance field (e.g., Language Skills Exploded). The resulting field inherits the business object (BO) mapping from the original multi-instance field, but this mapping can be modified if needed. According to the official Workday Prism Analytics study path documents, to change the business object that the new Language Skills Exploded instance field is mapped to, you should add a Manage Fields stage after the Explode stage and modify the business object (option D).

The Manage Fields stage allows you to edit field properties, including the business object mapping, for the exploded field. After the Explode stage creates the new single-instance field, the Manage Fields stage can be used to reassign the business object by selecting a different Workday business object (e.g., changing from a generic object to a specific one like "Language"). This step ensures the field is mapped correctly for downstream reporting or integration with Workday reports.

The other options are incorrect:

- * A. Select from the list of suggested BO values in the Explode stage configuration: The Explode stage does not provide an option to modify business object mappings during its configuration; it focuses on exploding the multi-instance field.
- * B. Click on the Related Actions next to the business object in the insight panel: The insight panel provides metadata insights but does not allow direct modification of business object mappings for fields.
- * C. Add a Manage Fields before the Explode stage and modify the business object: Modifying the business object before the Explode stage affects the original multi-instance field, but the Explode stage will still create the new field with the inherited mapping, so this does not achieve the goal.

Adding a Manage Fields stage after the Explode stage is the correct approach to modify the business object mapping of the new exploded field.

NEW QUESTION # 46

You want to apply a Filter stage to your derived dataset to show only expense reports submitted in the current month and where the expense report total amount is higher than 2000 USD. What should you do?

- A. Use a simple filter, three conditions, and "If All" operator.
- **B. Use a simple filter, two conditions, and "If All" operator.**
- C. Use a simple filter, three conditions, and "If Any" operator.
- D. Use a simple filter, two conditions, and "If Any" operator.

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Filter stage in a derived dataset is used to include only rows that meet specific criteria. The requirement here is to show expense reports that satisfy two conditions: (1) submitted in the current month, and (2) total amount higher than 2000 USD. According to the official Workday Prism Analytics study path documents, this can be achieved by using a simple filter with two conditions and the "If All" operator (option A).

The first condition would check the submission date, using a function like MONTH() to compare with the current month (e.g., MONTH(submission_date) = MONTH(CURRENT_DATE())). The second condition would compare the total amount (e.g., total_amount > 2000). The "If All" operator ensures that both conditions must be true for a row to be included, which aligns with the requirement that both criteria (current month AND amount > 2000 USD) must be met. A simple filter is sufficient because the logic involves straightforward comparisons without nested conditions.

The other options are incorrect:

- * B. Use a simple filter, two conditions, and "If Any" operator: The "If Any" operator would include rows where either condition is true (e.g., submitted in the current month OR amount > 2000 USD), which does not meet the requirement for both conditions to be true.
- * C. Use a simple filter, three conditions, and "If All" operator: Only two conditions are needed (submission month and amount), so

three conditions are unnecessary.

* D. Use a simple filter, three conditions, and "If Any" operator: This combines the issues of option B (wrong operator) and option C (too many conditions).

Using a simple filter with two conditions and the "If All" operator ensures the dataset includes only the expense reports that meet both criteria.

NEW QUESTION # 47

.....

In the era of information, everything around us is changing all the time, so do the Workday-Prism-Analytics exam. But you don't need to worry it. We take our candidates' future into consideration and pay attention to the development of our Workday Pro Prism Analytics Exam study training dumps constantly. Free renewal is provided for you for one year after purchase, so the Workday-Prism-Analytics latest questions won't be outdated. Among voluminous practice materials in this market, we highly recommend our Workday-Prism-Analytics Study Tool for your reference. Their vantages are incomparable and can spare you from strained condition. On the contrary, they serve like stimulants and catalysts which can speed up you efficiency and improve your correction rate of the Workday-Prism-Analytics real questions during your review progress.

Workday-Prism-Analytics Exam Consultant: <https://www.2pass4sure.com/Reporting-and-Analytics/Workday-Prism-Analytics-actual-exam-braindumps.html>

Workday Workday-Prism-Analytics Reliable Test Experience "The quality first, the service is supreme" is our all along objective, In addition, as for the Workday-Prism-Analytics PDF torrent you are able to print all the contents which are benefit for your notes, You have seen 2Pass4sure's Workday Workday-Prism-Analytics exam training materials, it is time to make a choice, Workday Workday-Prism-Analytics Reliable Test Experience This version of the software is extremely useful.

To see the songs on an album, move it into focus and tap its cover Workday-Prism-Analytics or tap the Info button, D Java control structures, "The quality first, the service is supreme" is our all along objective.

Precise Workday-Prism-Analytics Training Materials: Workday Pro Prism Analytics Exam Present Outstanding Exam Dumps - 2Pass4sure

In addition, as for the Workday-Prism-Analytics Pdf Torrent you are able to print all the contents which are benefit for your notes, You have seen 2Pass4sure's Workday Workday-Prism-Analytics exam training materials, it is time to make a choice.

This version of the software is extremely useful, What is more, there is no interminable cover charge for our Workday-Prism-Analytics practice engine priced with reasonable prices for your information.
