Trend Deep-Security-Professional Exam Dumps - Obtain Brilliant Result [2025]

You can enter the company you want and improve your salary if you have the certification for this field. Deep-Security-Professional test materials of us can help you pass the exam and obtain the certification successfully. Deep-Security-Professional exam dumps offer you free demo for you to have a try, so that you can know what the complete version is like. In addition, we provide you with free update for 365 days after purchasing Deep-Security-Professional Training Materials, and our system will send you the latest version for Deep-Security-Professional exam dumps automatically. We have online and offline chat service, and if you have any questions for Deep-Security-Professional exam materials, you can contact us.

Trend Micro Certified Professional for Deep Security Sample Questions (Q40-Q45):

NEW QUESTION # 40

What is IntelliScan?

- A. IntelliScan reduces the risk of viruses entering your network by blocking real-time compressed executable files and pairs them with other characteristics to improve mal-ware catch rates.
- B. IntelliScan is a method of identifying which files are subject to malware scanning as determined from the file content. It uses the file header to verify the true file type.
- C. IntelliScan is a mechanism that improves scanning performance. It recognizes files that have already been scanned based on a digital fingerprint of the file.
- D. IntelliScan is a malware scanning method that monitors process memory in real time. It can identify known malicious

processes and terminate them.

Answer: B

Explanation:

IntelliScan is a Trend Micro technology that determines which files to scan for malware based on the actual file type, rather than just the file extension. This is done by analyzing the file header, allowing Deep Security to correctly scan files even if their extension has been changed to disguise their true nature.

From the official documentation:

"IntelliScan is a scanning method that identifies the true file type by examining the file header, instead of relying only on the file extension. This ensures that malicious files cannot evade detection simply by renaming extensions." Option A is correct and matches the official explanation.

Options B, C, and D are incorrect and describe features not provided by IntelliScan.

NEW QUESTION # 41

Multi-tenancy is enabled in Deep Security and new tenants are created. Where does the new tenant data get stored when using SQL Server as the Deep Security database?

- A. An additional database is created in SQL Server for each new tenant to store its data.
- B. An additional user is created for each new tenant in the SQL Server database to store its data.
- C. An additional table is created for each new tenant in the existing database in the SQL Server database to store its data.
- D. The new tenant data is added to the existing SQL Server database.

Answer: A

Explanation:

With Microsoft SQL and PostgreSQL, there's one main database and an additional database for each tenant. With Oracle, all tenant information is in one Deep Security Manager database, but an additional user is created for each tenant. Each user has its own tables.

Explication: Study Guide - page (409)

NEW QUESTION # 42

Based on the script displayed in the exhibit, which of the following statements are correct? Select all that apply.

- A. Deep Security Agents deployed using this script are activated against a specific tenant.
- B. Deep Security Agents deployed using this script will be assigned a specific policy when activated.
- C. Deep Security Agents deployed using this script will be activated against Tenant 0 in a multi-tenant environment.
- D. This script will deploy the Deep Security Agent on a server, but will not automatically activate it.

Answer: A,B

NEW QUESTION # 43

The details for an event are displayed in the exhibit. Based on these details, which Protection Module generated the event?

Firewall

BraindumpsQA
IT Exam Study materials/Braindumps

- A. Intrusion Prevention
- B. Integrity Monitoring
- C. Application Control
- D. Firewall

Answer: A

NEW QUESTION # 44

Which of the following statements is FALSE regarding Firewall rules using the Bypass action?

- A. Applying a Firewall rule using the Bypass action to traffic in one direction automatically applies the same action to traffic in the other direction.
- B. Firewall rules using the Bypass action can be optimized, allowing traffic to flow as efficiently as if a Deep Security Agent was not there.
- C. Firewall rules using the Bypass action do not generate log events.

- D. Firewall rules using the Bypass action allow incoming traffic to skip both Firewall and Intrusion Prevention analysis.

Answer: A

Explanation:

The Bypass action is directional; it does not automatically apply to both directions. If you wish to bypass both directions, you must create separate rules for each. Options B, C, and D are true-bypass skips firewall and IPS analysis, does not log events, and optimizes traffic flow.
